March 2016
Faculty of Mathematics and Natural Sciences
Groningen, the Netherlands

Leading in diversity
Our faculty harbours a kaleidoscope of disciplines and research strengths. Our programmes in research and education range from nanomaterials and biomachinery to astronomy, from biology to pharmacy, and from computer science to neurosciences.

Our researchers pursue fundamental key questions while collaborating with partners from industry, the medical world and other realms of society. Frontline research groups explore new fields such as synthetic biology and sustainable energy use.
