THE TRAINING PROGRAMME
Our training programme is tailor-made to fit your individual needs. It supports your PhD project with courses in your field, and gives you the transferable skills you need to succeed in life. Career guidance activities help you shape your professional future. You will receive an individual training budget to financially support your training activities.

ADMISSION AND FEES
You need to hold a Master’s degree to be admitted to our PhD programme. If you have a Bachelor’s degree you can be admitted if you have proof of considerable research experience. You will also need to demonstrate your proficiency in English. There is no admission deadline, and you can be admitted throughout the year. Generally we do not charge tuition fees. In order to apply for admission, you need to have the explicit support of a supervisor as well as funding for the duration of your PhD project.

SUPERVISORS AND FUNDING
To find a suitable supervisor, have a look at our website. It lists all our research groups, and we encourage you to contact potential supervisors directly. Some research groups have vacancies for paid PhD positions, typically on pre-defined research projects. Vacancies can be found on www.rug.nl. We do not offer scholarships for PhD students. On www.grantfinder.nl you can search for scholarship options. We also welcome PhD students with scholarships by their home country.

What our PhD students say
“After I arrived in Groningen, I soon realized that I had made the right choice. The research facilities are excellent: there’s good supervision, excellent equipment and a pleasant environment to work in. When conditions are this good, you don’t have any excuse not to get a good result”.
Faris Nizamic, JBI

“I have access to everything I need to do my PhD. The quality of education is perfect. I’ve experienced a strong sense of collaboration and support. I’m glad to study here - not just for the university’s reputation, it’s also a very student-friendly city”.
Pariya Behrouzi, GBB

List of research institutes:
- Alice - Artificial Intelligence and Cognitive Engineering
- ENTEG - ENGineering and TEChtnology institute Groningen
- ESRIG - Energy and Sustainability Research Institute Groningen
- GBB - Groningen Biomolecular Sciences and Biotechnology Institute
- GELIFES - Groningen Institute for Evolutionary Life Sciences
- GRIP - Groningen Research Institute of Pharmacy
- IDO - Department of Education
- JBI - Johann Bernoulli Institute for Mathematics and Computer Science
- Kapteyn Astronomical Institute
- KVI-CART - Center for Advanced Radiation Technology
- Stratingh Institute for Chemistry
- Van Swinderen Institute for Particle Physics and Gravity
- Zernike Institute for Advanced Materials

About the Graduate School of Science
The Graduate School of Science (GSS) is the graduate school for PhD students at the Faculty of Mathematics and Natural Sciences of the University of Groningen. Our goal is to offer you an inspiring environment to do exciting research, follow tailor-made postgraduate training, and prepare you for your future career. If you are passionate about doing research, here is what our PhD programme has in store for you.

The GSS offers an international, all-English PhD programme. Renowned scientists supervise your research and help you develop into a fully-fledged scientist ready to succeed in academia or anywhere else. A PhD with the GSS is usually four years. At the end of it you will already have a number of publications to your name – and an internationally appreciated PhD degree.
