ACKNOWLEDGEMENTS

It is challenging to complete a PhD project. The current thesis, as an outcome of such a challenging but also intellectual journey, would not have been possible without support and help of many other people. Hereby I wish to convey my sincere gratitude towards all of you who turned this book into reality in the past three years.

First and foremost, I would like to give my sincerest appreciation to my great supervisors: Dr. Maya Schroovers, Prof. Adelita Ranchor, and Prof. Robbert Sanderman. Thank you for offering me this excellent opportunity to conduct this PhD project. You are super excellent supervisors! You have taught me how to become an independent researcher. Without your guidance, inspirations, encouragements, and constructive comments, I would not have been able to finish this PhD project. Maya, there is no way I would have made it this far without your support. Since the start of my master thesis project, you have been such a wonderful supervisor. Thank you for your enthusiasm, understanding, and excellent mentorship in the past years. Adelita, you did inspire me to work hard and explore well beyond the realm of possibilities. I would like to give my special thanks for your insightful guidance and advice, especially when I felt lost and confused. Robbert, without you, it might not have been possible for me to come to Groningen to start my Research Master and continue with my PhD. Thanks for your continuous encouragement in the last five years.

I would like to thank the members of the Assessment Committee, Prof. Neil Aaronson, Prof. Edwin van den Heuvel, and Prof. Jolanda de Vries. Thank you for your reading and your approval for the current thesis.

I would like to give my appreciations to those collaborators and co-authors who have been involved into this project. Special thanks to all cancer patients and psycho-oncological therapists in the IPSO institutions who have participated in the current research. Thanks a lot for your time and effort that spent on this study. Dr. Marije van der Lee and Dr. Bert Garssen, it has been a great pleasure to work with you. Thanks for the insightful comments on the manuscripts. Dr. Roy Stewart and Dr. Josué Almansa, thank you for your statistical training and support, especially on the complicated data analysis in Mplus. Roy, you are a very kind and friendly person. You also opened the door of Mplus for me; without your statistical support, I would not have been conducted the data analysis in this thesis. Josué, although you have been involved into my project only in my last year of PhD, you did help me a lot with the analysis. Special thanks for your concrete suggestions on the rebuttal letter. Prof. Vicki Helgeson, thanks for the inspiring and valuable feedbacks on the manuscript.
Acknowledgements

Now I would like to thank all of my colleagues at the Department of Health Psychology. Thank you very much for creating such a warm and enjoyable working environment. Annemieke, Carin, Eric, Truus, and Renate, thank you for all the kind assistance and brilliant advice. Ans, Daphne, Grieteke, James, Joke, Marrit, Mariet, Martine, and Nardi, it is wonderful working with you. Thank you for your help. Adriana, Alicia, Angelica, Annika, Coby, Corinne, Evelien, Esther, Fabiola, Franziska, Gemma, Katerina, Marike, Meirav, Monica, Moniek, Somayeh, Vicky, Ying, and Yvette, I have been so lucky to have you girls to be my PhD fellows. All of you are so kind, brilliant, and funny. We shared numerous precious moments together, we learned from each other, and we also made progress together. I wish all of you a very good luck and a big success in your future. Alicia and Evelien, thank you for translating the English summary into Dutch. Adriana, Annika, Evelien, and Moniek, I am really glad to have you to be my office mates. Thank you for making our working time so cheerful. Evelien and Moniek, thank you for being my ‘emotion therapists’. You really helped me a lot in dealing with the frustrations, stresses, and all the negative emotions, especially in my last year of PhD. Marike, my first Dutch friend, my classmate, and my PhD fellow, it was a great pleasure that we could share such a similar track in the past five years, from the start of Research Master until the end of PhD. Thank you for making this journey so enjoyable. Marike and Moniek, it is honoured to have you to be my paranimfen. Thank you very much for your time and effort in making the promotion so great.

My sincere appreciation goes to all my Chinese friends in Groningen: Nana Yu, Xiaoyun Zhou, He Sun, Xiaqiong Lin, Yanping Geng, Qiuyn Yang, Youtao Liu, Ming Li, Honghao Ren, and Jiawei Rong. Although it was difficult for us to go back to China very often, you guys really made my Dutch life less homesick and more Chinese. Thanks to you, we could celebrate traditional Chinese festivals together. Nana and Xiaoyun, thank you so much for being such great roommates. You are like my family in Groningen. Without you, my life in Groningen will be far less happier. I will remember all the cherished moments that we have spent together. He, you are so kind, funny, pretty and smart, and it is always happy to spend time with you. Thank you for making our ‘black forest’ trip so fun and relaxing.

Last but not the least, I would like to express my deepest gratitude to my family. You were always there for me whenever I need you! Daddy and Mummy, I am quite lucky to be your daughter. Thank you for giving me such a sweet, happy, warm, and lovely family! Your endless support and unconditional love is the power that has made me progress. Brother and sister-in-law, you always encourage me to pursue my dreams. Without your encouragements,
it would not have been possible for me to finish this thesis. **Yuxi**, my little niece, your beautiful eyes and sweet smiles can always make me forget troubles and cheer me up. This thesis is dedicated to all of you.

My life in Groningen will end soon. I am super lucky to have such an amazing and happy experience in this beautiful city. I will always remember those lovely people, the wonderful experience, and everything in Groningen in my heart. Thank you all!

**ABOUT THE AUTHOR**

**Lei Zhu (朱蕾)** was born on August 26th, 1987 in Henan, China. She obtained her Bachelor’s degree majoring in Psychology at the School of Psychology, Shaanxi Normal University (in Xi’an, China) in July 2009. After that, she came to the University Medical Center Groningen /University of Groningen in the Netherlands to start her Research Master programme ‘Clinical and Psychosocial Epidemiology’ and graduated in August 2011. Because of her interest in health psychology research, she started a three-year PhD project under the supervision of Dr. Maya Schroevers, Prof. Adelita Ranchor, and Prof. Robbert Sanderman, at the Department of Health Psychology, University Medical Center Groningen/University of Groningen.

About the author

Subtypes of depressive symptoms in cancer patients receiving psychological care

Conference presentations

*Oral presentation*, Aug 2014, at the 13th International Congress of Behavioral Science, Groningen, the Netherlands

*Oral presentation*, Nov 2013, at the 15th International Psycho-Oncology Society conference, Rotterdam, the Netherlands

*Oral presentation*, July 2013, at the 27th European Health Psychology Society Conference, Bordeaux, France

*Oral presentation (invited)*, Mar 2013, at the 5th Mplus User’s meeting Utrecht University, Utrecht, the Netherlands

*Oral presentation*, Aug 2012, at the 26th European Health Psychology Society Conference, Prague, Czech Republic

*Oral presentation*, Feb 2012, at the 2nd Association for Research in Psychology and Health Conference, Enschede, the Netherlands
SHARE and previous dissertation

This thesis is published within the Research Institute SHARE (Science in Healthy Ageing and healthcare) of the University Medical Center Groningen / University of Groningen. Further information regarding the institute and its research can be obtained from our website: www.share.umcg.nl. More recent theses can be found in the list below (supervisors and co-supervisors are between brackets)

2015

Sulkers E
Psychological adaptation to childhood cancer
(prof R Sanderman, prof PF Roodbol, prof ESJM de Bont, dr J Fleer, dr WJE Tissing)

Febrianna SA
Skin problems related to Indonesian leather & shoe production and the use of footwear in Indonesia
(prof PJ Coenraads, prof H Soebono, dr MLA Schuttelaar)

2014

Schneeberger C
Asymptomatic bacteruria and urinary tract infections in women: focus on diabetes mellitus and pregnancy
(prof RP Stolk, prof JJHM Erwich, dr SE Geerlings)

Skorvanek, M
Fatigue, apathy and quality of life in patients with Parkinson’s disease
(prof JW Groothoff, prof Z Gdovinova, dr JP van Dijk, dr J Rosenberger)

Kolvek G
Etiology and prognosis of chronic kidney disease in children: Roma ethnicity and other risk factors
(prof SAREiijevel, prof L Podracka, dr JP van Dijk, dr J Rosenberger)
SHARE and previous dissertation

Mikula P
Health related quality of life in people with multiple sclerosis; the role of coping, social participation and self-esteem
(prof JW Groothoff, prof Z Gdovinova, dr JP van Dijk, dr I Nagyova)

Amalia R
Improving a school-based dental programme through a sociodental risk group approach
(prof RMH Schaub, prof JW Groothoff, prof N Widyanti)

Christoffers WA
Hand eczema; interventions and contact allergies
(prof PJ Coenraads, dr MLA Schuttelaar)

Troquete NAC
START-ing risk assessment and shared care planning in out-patient forensic psychiatry; results from a cluster randomized controlled trial
(prof D Wiersma, prof RA Schoevers, dr RHS van den Brink)

Golea E
Functioning of young individuals with upper limb reduction deficiencies
(prof CK van der Sluis, dr RM Bongers, dr HA Reinders-Messelink)

Nguyen HT
Medication safety in Vietnamese hospitals; a focus on medication errors and safety culture
(prof K Taxis, prof FM Haaijer-Ruskamp, prof JRBJ Brouwers, dr TD Nguyen)

Lehmann V
Singlehood and partnerships in healthy people and childhood cancer survivors; a focus on satisfaction
(prof M hagedoorn, prof R Sanderman, dr MA Tuinman)

Jaarsma EA
Sports participation and physical disabilities: taking the hurdle?!
(prof JHB Geertzen, prof PU Dijkstra, dr R Dekker)
Ockenburg SL van
Psychological states and physical fates; studying the role of psychosocial stress in the etiology of cardiovascular disease: a nomothetic versus an idiographic approach
(prof JGM Rosmalen, prof P de Jonge, prof ROB Gans)

Beijers CGHM
Unhealthy behaviors during pregnancy; who continues to smoke and consume alcohol, and is treatment of anxiety and depressive symptoms effective?
(prof J Ormel, prof CLH Bockting, dr H Burger)

Kerdijk W
Strategic choices in curriculum design to facilitate knowledge and competency development
(prof J Cohen-Schotanus, prof JW Snoek, dr R Tio)

Spaans F
Hemopexin activity and extracellular ATP in the pathogenesis of preeclampsia
(prof H van Goor, dr MM Faas, dr WW Bakker)

Brinksma A
Nutritional status in children with cancer
(prof PF Roodbol, prof R Sanderman, prof ESJM de Bont, dr WJE Tissing)

Prihodova L
Psychological and medical determinants of long-term patient outcomes; a specific focus on patients after kidney transplantation and with haemophilia
(prof JW Groothoff, dr JP van Dijk, dr I Rajnicova-Nagyova, dr J Rosenberger)

Snippe E
Understanding change in psychological treatments for depressive symptoms; the individual matters
(prof R Sanderman, prof PMG Emmelkamp, dr MJ Schroevers, dr J Fleer)

Groen B
Complications in diabetic pregnancy; role of immunology and Advanced Glycation End products
(prof TP Links, prof PP van den Berg, dr MM Faas)
SHARE and previous dissertation

**Visser L**
Early detection and prevention of adolescent alcohol use; parenting and psychosocial factors
*(prof SA Reijneveld, dr AF de Winter)*

**Tovote KA**
Acceptance or challenge? Psychological treatments for depressive symptoms in patients with diabetes
*(prof R Sanderman, prof PMG Emmelkamp, prof TP Links)*
