THE PILOCYTIC ASTROCYTOMA

IMMUNOHISTOCHEMICAL AND GENETIC STUDIES
IN RELATION TO TUMOR BEHAVIOR
Dirven, C.M.F.

ISBN 90 367 0915 6
NUGI 743

This investigation was performed at the following institutions:
Department of pathology and department of neurosurgery of the Groningen Academical Hospital; department of medical genetics of the University of Groningen and the Molecular Neuro-Oncology Laboratory, Harvard Medical School, Boston, U.S.A.

Financial support was given by: J. de Cock Stichting, Promedics Medical Systems.

THE PILOCYTIC ASTROCYTOMA

imunohistochemical and genetic studies
in relation to tumor behavior

Proefschrift

ter verkrijging van het doctoraat in de
Medische Wetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de
Rector Magnificus, dr. F. van der Woude,
in het openbaar te verdedigen op

woensdag 24 juni 1998
des namiddags te 4.15 uur

door

Clemens Maria Franciscus Dirven

geboren op 18 december 1959
te Noordoostpolder
PROMOTORES: PROF. DR. J.J.A. MOOIJ
PROF. DR. W.M. MOLENAAR

REFERENT: DR. J. KOUDSTAAL
CONTENT

Chapter 1 1
Introduction and purpose of this thesis.

Chapter 2 12
The cerebellar pilocytic astrocytoma: A treatment protocol based upon analysis of 73 cases and a review of the literature. 

Chapter 3 26
Introduction to the methods used for studying the biological behavior of pilocytic astrocytomas.
- AgNOR staining 27
- Ki-67 and MIB-1 labeling 39
- The TP53 gene and p53 protein 44
- The NF1 gene 52

Chapter 4 68
AgNOR staining may reflect the growth potential of pilocytic astrocytomas.
Submitted for publication.

Chapter 5 78
The proliferative potential of the pilocytic astrocytoma: the relation between MIB-1 labeling and clinical and neuro-radiological follow-up.

Chapter 6 90
TP53 is involved in pilocytic astrocytomas but has no relation to tumor behavior.
In progress for publication.

Chapter 7
Up-regulation of specific NF1 gene transcripts in sporadic pilocytic astrocytomas.

Chapter 8 114
General discussion and conclusions.

Chapter 9 125
Summary.
