

CELLULAR IMAGING

Course

Introduction: 14 June 2012 (12.00-17.00 hrs)
Course: 18 June - 5 July

A PhD Practical Course on Advanced Microscopy organized by the section *Molecular Imaging and Electron Microscopy* (Department of Cell Biology, UMCG).

Topics include fluorescence microscopy, electron microscopy, probes, live-cell imaging, data acquisition and analysis. Focus is on implementation of technical aspects in the participant's own PhD-project. The course will feature (inter)national speakers and a mini-symposium. Given the focus on practical implementation, the group-size is limited.

Deadline applications

For enrolment please send [application form](#) to Greetje Noppert before 31st of March, 2012.

Course: Cellular Imaging
Dates: Introduction: 14 June 2012 / Course: 18 June *up to and incl.*
5 July 2012 (~ 5 hrs/day)
Place: UMCG
