Self-Guided Tour of the Zernike Complex

Finding your way around (*see floor plan below*)

Naming of buildings: The buildings on the map above are each indicated with a letter. These letters are also to be found on the signs on the campus. Apart from that, each (part of a) building is indicated with a number. This way you know exactly where you lecture will take place, for instance.

Numeration of rooms: The first 4 numbers refer to the building number. The last 4 refer to the floor and room numbers. E.g. 5419.0015 means building 5419, room 0015 (00=ground floor; 15= room 15. The first floor would have been 5419.0115. The second floor 5419.0215 etc.)
