Appendices Teaching and Examination Regulations
Master’s Degree Programme 2010-2011

Mathematics

Appendix A Teaching outcomes of the degree programme (art. 1.3)

The degree programme aims to train the students in such a way that they acquire the insight, skills and knowledge that allows the recipient of the degree to establish a professional career in the field of Mathematics.

Appendix B Specializations of the degree programme (art. 2.2)

The degree programme has a P-variant and a M-variant (Science, Business and Policy) with the following specializations:

- Algebra and Geometry
- Dynamical Systems and Analysis
- Statistics and Probability

Appendix C Content of the degree programme (art. 2.3)

P-variant

The P-variant of the degree programme has the following specializations:

- Algebra and Geometry
- Dynamical Systems and Analysis
- Statistics and Probability

The master programme comprises 120 ECTS

The requirements on the programme are the following:

A. Student colloquium (5 ects)

B. At least five modules from the following list of local modules, the modules in the specialization area are compulsory (at least 25 ECTS)

- Specialization Algebra and Geometry:
  - Caput Algebra and Geometry (annual)
  - Applied Geometry (annual)

- Specialization Dynamical Systems and Analysis:
  - Dynamical Systems and Chaos (annual)
  - Caput Dynamical Systems (biennial, 2010-2011)
  - Caput Mathematical Physics (biennial, 2011-2012)

- Specialization Statistics and Probability:
  - Statistical Genomics (biennial, 2011-2012)
  - Contemporary Statistics with Applications (biennial, 2010-2011)
• **Specialization Computational Science and Numerical Mathematics:**
  - Computational Fluid Dynamics (annual)
  - Computational Engineering (biennial, 2010-2011)
  - Boundary Layers (biennial, 2011-2012)
• **Specialization Systems, Control and Optimization:**
  - Robust Control (annual)
  - Introduction to Optimization (biennial, 2011-2012)
  - Modeling and Identification (biennial, 2010-2011)

C. **At least three modules from the mastermath programme (at least 18 ECTS)**
From these modules at least two have to be in the specialization area and at least one has to be outside the specialization area.

D. **At most 10 ECTS of advanced modules of programmes taught at the RuG other than the master programmes mathematics and applied mathematics**
These modules have to be of at least third year bachelor level, and have to be relevant for the master Mathematics (at the discretion of the exam committee).

E. **Free choice (at most 5 ECTS)**

F. **Final Research Project (50 ECTS)**
Research project in the specialization area.

---

**M-variant:**

The M-variant of the degree programme is called **Science, Business and Policy**

The master programme comprises 120 ECTS and consists of a mathematical component (60 ECTS) and a Business and Policy component (60 ECTS).

The requirements on the programme are the following:

**Mathematical component (60 ECTS):**

**A. At least 15 ECTS from the following list of local modules. At least 10 ECTS have to be chosen from the modules of the specialization area.**

- **Specialization Algebra and Geometry:**
  - Caput Algebra and Geometry (annual)
  - Applied Geometry (annual)
- **Specialization Dynamical Systems and Analysis:**
  - Dynamical Systems and Chaos (annual)
  - Caput Dynamical Systems (biennial, 2010-2011)
  - Caput Mathematical Physics (biennial, 2011-2012)
- **Specialization Statistics and Probability:**
  - Statistical Genomics (biennial, 2011-2012)
  - Contemporary Statistics with Applications (biennial, 2010-2011)
- **Specialization Computational Science and Numerical Mathematics:**
  - Computational Fluid Dynamics (annual)
  - Computational Engineering (biennial, 2010-2011)
  - Boundary Layers (biennial, 2011-2012)
- **Specialization Systems, Control and Optimization:**
  - Robust Control (annual)
  - Introduction to Optimization (biennial, 2011-2012)
  - Modeling and Identification (biennial, 2010-2011)
B. At most three modules from the mastermath programme (at most 18 ECTS)

C. At most 10 ECTS of advanced modules of programmes taught at the RuG other than the master programmes mathematics and applied mathematics

These modules have to be of at least third year bachelor level, and have to be relevant for the master Mathematics (at the discretion of the exam committee).

D. Mathematical Research Project (30 ECTS)

Research project in the specialization area.

**Business and Policy component (60 ECTS):**

- Module Science, Business and Policy (20 ECTS)
- Internship Science, Business and Policy (40 ECTS)

The local Mathematics and Applied Mathematics modules are

The modules of the Business and Policy component are offered in Dutch language only.

For information on the modules of the Mastermath programme see http://www.mastermath.nl.

For information on the modules of programmes of the RuG other than the master programmes mathematics and applied mathematics see the teaching and examination regulations of the corresponding programme.

Appendix D Optional modules
(art. 2.4)

See Appendix C.

Appendix E Entry requirements and compulsory order of examinations
(art. 3.2)

The entry requirement for the internship Science, Business and Policy is a successful completion of the module Science, Business and Policy (20 ects) and the mathematical research project (30 ects)

Appendix F Admission to the degree programme and different specializations
(art. 4.1.1 + art. 4.2)

Holders of the following Bachelor’s degree from the University of Groningen are considered to have sufficient knowledge and skills and will be admitted to the Master’s degree programme in Mathematics on that basis:
- BSc Mathematics
- BSc Applied Mathematics

Appendix G Application deadlines for admission and deadlines for decision
(art. 4.5.1 +4.5.3)

Deadlines for application are:
- June 1st 2010 for EU student
- April 15th 2010 for non-EU students

Deadlines for decision are:
- July 1st 2010 for EU student
- June 15th 2010 for non-EU students
