Appendices Master’s degree programme
Computational Cognitive Science
2022 – 2023

I. Learning outcomes of the degree programme
II. Tracks/Specializations of the degree programme
III. Content of the degree programme
IV. Elective course units
V. Entry requirements and compulsory order of examinations
VI. Admission to the degree programme
VII. Transitional provisions
VIII. Additional requirements Open degree programmes
IX. Application deadlines
Appendix I  Learning outcomes of the degree programme (Article 3.1)

1. The master demonstrates knowledge, understanding and the ability to evaluate, analyse and interpret relevant data, all on a level that builds on and surpasses the level of the bachelor Artificial Intelligence, in at least three of the research areas below. In one research area of Computational Cognitive Science the master has specialised knowledge at an advanced level.
   a. Computational theories and models of cognitive processes
   b. Multivariate statistics
   c. Cognitive ergonomics
   d. Application of formal models of cognition in human-computer interaction and education
   e. Linguistics and language technology
   f. Cognitive neuroscience

2. The master demonstrates knowledge and understanding, on a level that builds on and surpasses the level of the bachelor Artificial Intelligence, in the empirical sciences (Psychology, Biology and Physics) and has experience applying and analysing results thereof.

3. The master demonstrates relevant knowledge and the ability to apply methods and techniques from mathematics and logic used in Computational Cognitive Science.

4. The master demonstrates relevant knowledge and the ability to use programming languages used in the field of Computational Cognitive Science.

5. The master has the ability to, on an international academic level, analyse problems, critically and constructively review both one’s own and other scientific results, even if incomplete, and to communicate about this both individually and in a group, both orally and in written form, also in a broader societal context, to both specialists and nonspecialists.

6. The master has the ability to critically reflect on his/her own working method and knowledge and to recognize the need for continued learning with a high degree of autonomy, and is able to understand the scientific developments within the field of Computational Cognitive Science.
Appendix II  Tracks/Specializations of the degree programme  
(Article 3.6)

The Computational Cognitive Science MSc Programme has no tracks.

The programme does make use of specializations. These specializations are a mandatory direction that guarantees a student is able to take a graduation project in the relevant area by the end of the specialization.

Students must choose one of the following specializations:

a)  specialization Cognitive Modelling
b)  specialization Cognitive Engineering
c)  specialization Computational Cognitive Neuroscience
d)  specialization Cognitive Language Modelling
Appendix III  Content of the degree programme (Article 3.8)

1. The degree programme consists of the following mandatory course units:

<table>
<thead>
<tr>
<th>Mandatory Course Units (35 ECTS credit points)</th>
<th>with a study load of 5 ECTS credit points, unless stated otherwise</th>
</tr>
</thead>
<tbody>
<tr>
<td>Advanced Statistical Modelling [WMCC005-05]</td>
<td></td>
</tr>
<tr>
<td>Cognitive Modelling: Basic Principles and Methods [WMCC006-05]</td>
<td></td>
</tr>
<tr>
<td>First-Year Research Project (15 ECTS credit points) [WMCC012-15]</td>
<td></td>
</tr>
<tr>
<td>Formal Models of Cognition [WMCC002-05]</td>
<td></td>
</tr>
<tr>
<td>Methods in CCS [WMCC015-05]</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Final Research Project (45 ECTS credit points)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Final Research Project (45 ECTS credit points) [WMCC901-45]</td>
</tr>
<tr>
<td>or</td>
</tr>
<tr>
<td>Final Research Project (30 ECTS credit points) [WMCC901-30] plus Internship (15 ECTS credit points) [WMCC902-15]</td>
</tr>
</tbody>
</table>

2. In addition to having to take the fixed mandatory programme, students have to take the mandatory course units of one of the four programme specializations as referred to in Appendix II. The different specialisations contain the following course units:

**Cognitive Modelling**

<table>
<thead>
<tr>
<th>Mandatory Course Units (15 ECTS credit points)</th>
<th>with a study load of 5 ECTS credit points, unless stated otherwise</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cognitive Modelling: Complex Behaviour [WMCC008-05]</td>
<td></td>
</tr>
<tr>
<td>Computational Cognitive Neuroscience [WMCC010-05]</td>
<td></td>
</tr>
<tr>
<td>User Models [WMCC004-05]</td>
<td></td>
</tr>
</tbody>
</table>
### Cognitive Engineering

**Mandatory Course Units (20 ECTS credit points)**  
with a study load of 5 ECTS credit points, unless stated otherwise

<table>
<thead>
<tr>
<th>Course</th>
<th>Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>Applied Cognitive Engineering</td>
<td>WMCC007-05</td>
</tr>
<tr>
<td>Cognitive Engineering</td>
<td>WMCC001-05</td>
</tr>
<tr>
<td>Neuro-ergonomics</td>
<td>WMCC011-05</td>
</tr>
<tr>
<td>User Models</td>
<td>WMCC004-05</td>
</tr>
</tbody>
</table>

### Computational Cognitive Neuroscience

**Mandatory Course Units (15 ECTS credit points)**  
with a study load of 5 ECTS credit points, unless stated otherwise

<table>
<thead>
<tr>
<th>Course</th>
<th>Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>Computational Cognitive Neuroscience</td>
<td>WMCC010-05</td>
</tr>
<tr>
<td>Cognitive Modelling: Complex Behaviour</td>
<td>WMCC008-05</td>
</tr>
<tr>
<td>Machine Learning</td>
<td>WMAI010-05</td>
</tr>
</tbody>
</table>

### Cognitive Language Modelling

**Mandatory Course Units (15 ECTS credit points)**  
with a study load of 5 ECTS credit points, unless stated otherwise

<table>
<thead>
<tr>
<th>Course</th>
<th>Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>Computational Simulations of Language</td>
<td>WMCC009-05</td>
</tr>
<tr>
<td>Language Modelling</td>
<td>WMCC003-05</td>
</tr>
<tr>
<td>Language Technology Project</td>
<td>LIX025M05</td>
</tr>
</tbody>
</table>
Appendix IV  Elective course units  
(Article 3.9.1)

In addition to the mandatory fixed programme and the programme specializations, the programme consists of 20/25 ECTS credit points in elective course units (depending on the specialization). Students will have to fill this space of 20/25 credit points with one of the following three options (or combinations thereof):

1. A student may choose one or more of the following pre-approved elective course units that are offered by Computational Cognitive Science or Artificial Intelligence:

<table>
<thead>
<tr>
<th>Pre-approved Elective Course Units</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>with a study load of 5 ECTS, unless otherwise stated</td>
<td></td>
</tr>
<tr>
<td>Applied Cognitive Engineering [WMAI19004]</td>
<td></td>
</tr>
<tr>
<td>Arguing Agents [WMAI001-05]</td>
<td></td>
</tr>
<tr>
<td>Auditory Biophysics [WMAI013-05]</td>
<td></td>
</tr>
<tr>
<td>Cognitive Engineering [WMCC001-05]</td>
<td></td>
</tr>
<tr>
<td>Cognitive Modelling: Complex Behaviour [WMCC008-05]</td>
<td></td>
</tr>
<tr>
<td>Cognitive Robotics [WMAI003-05]</td>
<td></td>
</tr>
<tr>
<td>Collective Intelligence [WMAI023-05]</td>
<td></td>
</tr>
<tr>
<td>Computational Cognitive Neuroscience [WMCC010-05]</td>
<td></td>
</tr>
<tr>
<td>Computational Simulations of Language [WMCC009-05]</td>
<td></td>
</tr>
<tr>
<td>Computational Social Choice [WMAI016-05]</td>
<td></td>
</tr>
<tr>
<td>Deep Learning [WMAI017-05]</td>
<td></td>
</tr>
<tr>
<td>Design of Multi-Agent Systems [WMAI004-05]</td>
<td></td>
</tr>
<tr>
<td>Handwriting Recognition [WMAI019-05]</td>
<td></td>
</tr>
<tr>
<td>Language Modelling [WMCC003-05]</td>
<td></td>
</tr>
<tr>
<td>Logical Aspects of Multi-Agent Systems [WMAI020-05]</td>
<td></td>
</tr>
<tr>
<td>Machine Learning [WMAI010-05]</td>
<td></td>
</tr>
<tr>
<td>Models of Human-Syntax Processing [WMCC014-05]</td>
<td></td>
</tr>
<tr>
<td>Neuro-ergonomics [WMCC011-05]</td>
<td></td>
</tr>
<tr>
<td>Robotics for Artificial Intelligence [WMAI011-05]</td>
<td></td>
</tr>
<tr>
<td>User Models [WMCC004-05]</td>
<td></td>
</tr>
</tbody>
</table>

2. A student may choose one or more of the following pre-approved elective course units taught by other degree programmes (the study load is 5 ECTS credit points unless stated otherwise). For the form of examination, refer to the TER or assessment plans of the relevant degree programmes:

- Advanced Self-Organisation of Social Systems [WMBY017-05]
- Applied Cognitive Neuroscience [PSMCB-4]
- Auditory and Visual Perception [WMBC002-05]
- Computational Semantics [LIX021M05]
- Computer-Mediated Communication [LIX022M05]
- Corpus Linguistics [LTR024M05]
- Introduction Science and Business a [WMSE001-10]
- Introduction Science and Policy a [WMSE002-10]
- Introduction to Data Science [WMCS002-05]
- Language Technology Project [LIX025M05]
- Natural Language Processing [LIX001M05]
- Philosophy of Neuroscience [FI184FR]
- Skills in Science Communication [WMEC006-05]
- Scientific Visualization [WMCS018-05]
- Trends in Cognitive Neuroscience [PSMCB-3]
- Semantic Web Technology [LIX002M05]
- User Interface Evaluation [LIX024M05]
- Web and Cloud Computing [WMCS005-05]

a) This course yields 10 ECTS credit points. You can take either Introduction Science and Business or Introduction Science and Policy, and will only be awarded credit points for one of the two course units.

3. Formal approval of the Board of Examiners is required, in case and before a student would like to deviate from these rules (e.g. including course units from other programmes and universities).
Appendix V  Entry requirements and compulsory order of examinations  
(Article 4.4)

<table>
<thead>
<tr>
<th>Course Unit Name</th>
<th>Entry Requirements a</th>
</tr>
</thead>
<tbody>
<tr>
<td>Applied Cognitive Engineering [WMCC007-05]</td>
<td>- Cognitive Engineering [WMCC001-05]</td>
</tr>
<tr>
<td>Final Research Project [WMCC901-45 or WMCC901-30]</td>
<td>- At least 60 ECTS credit points from the master’s programme</td>
</tr>
<tr>
<td></td>
<td>- Advanced Statistical Modelling [WMCC005-05]</td>
</tr>
<tr>
<td></td>
<td>- Cognitive Modelling: Basic Principles and Methods [WMCC006-05]</td>
</tr>
<tr>
<td></td>
<td>- First-Year Research Project [WMCC012-05]</td>
</tr>
<tr>
<td></td>
<td>- Formal Models of Cognition [WMCC002-05]</td>
</tr>
<tr>
<td></td>
<td>- Completion of the specialization relevant to the final research project</td>
</tr>
</tbody>
</table>

a)  In the event that a student has applied for a course to count as a course replacement, this replacement course also counts as a valid alternative for the course entry requirement in question.

b)  Students who passed Architectures of Intelligence [WBAI009-05] in the BSc AI are exempted from this rule.

Models of Human-Syntax Processing [WMCC014-05] has General Linguistics [WBAI022-05] as a strongly recommended course unit. Students who did not take the BSc Artificial Intelligence are advised to (have) take(n) a comparable course unit.
Appendix VI Admission to the degree programme (Article 2.1A)

1. Students in possession of a Dutch or foreign certificate of higher education that indicates that they have the following knowledge and skills shall be admitted to the degree programme:
   - knowledge of and insight in the subject of Artificial Intelligence
   - knowledge of and insight in the subject of Cognitive Psychology or Cognitive Science
   - knowledge of and insight in the subject of Statistics and Research methods
   - practical skills in Programming

2. The holder of a certificate from the Bachelor's degree programme “Artificial Intelligence” of any university in the Netherlands is expected to have the knowledge and skills listed in Article 2.1 and is admitted to the degree programme on that basis.

3. The holder of a certificate from the Bachelor's degree programme “Information Science” of the University of Groningen is expected to have the knowledge and skills listed in Article 2.1 and is admitted to the degree programme on that basis.
Appendix VII  Transitional provisions
(Article 7.1)

The transitional provisions are an arrangement that students can use as a reference to courses that previously existed. Some course units or curriculum choices were previously part of the programme, but have since been updated. In some cases, an arrangement can consist of multiple courses. If a provision is not listed in the list of transitional arrangements, students will have to ask the permission of the Board of Examiners first – through a course replacement. The provisions are listed in reverse-chronological order. General provisions are described through text – courses that are a direct replacement for a current course are listed in table format.

Students who started in 2021–2022 or before:

Students do not have to include Methods in CCS [WMCC015-05] in their mandatory programme. They can still include it as a pre-approved elective course unit.

Students who started in 2020–2021 or before:

<table>
<thead>
<tr>
<th>Discontinued Course Unit(s)</th>
<th>Replacement Course Unit(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Course Name</td>
<td>Course Code</td>
</tr>
<tr>
<td>Non-derivational Theories</td>
<td>WMCC013-05</td>
</tr>
<tr>
<td>of Syntax</td>
<td></td>
</tr>
<tr>
<td>Pattern Recognition</td>
<td>WMCS011-05</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Students who were previously part of the Human–Machine Communication MSc need not request any transitional provisions. Since the only formal change to the master’s programme is a name change – they are formally still under the same programme. This does mean that they will graduate under the ‘Computational Cognitive Science’ name.

Students who started in 2019–2020 or before:

There are no transitional provisions for the year 2019–2020.

However, the table below shows courses that are considered equivalent, but have changed course codes since 2020–2021. While the course codes of these courses are different, they are considered equal for the intents and purposes of an MSc diploma: one does not have to take the version that is listed in the current Teaching and Examination Regulations, and can use the ‘Old Course Code’
version instead. Note that this list only contains courses that have been part of previous Teaching and Examination Regulations, and only courses that have not changed their name (otherwise it is a discontinued course unit/replacement course unit pair, listed in the TER of the organizing programme). Any other equivalences that may exist between courses that can be beneficial in the event of a course replacement or a potential block in the event of a free-choice elective will have to be checked with the Board of Examiners of the own degree programme.

No further transitional provisions apply - the current curriculum is compatible with most older versions of the Teaching and Examination Regulations. Cases not listed in the Teaching and Examination Regulations - through either the current curriculum or the transitional provisions listed - are only valid in consultation with, and through approval of, the Board of Examiners of the degree programme.
Appendix VIII   Additional requirements Open degree programmes  
(Article 3.10)

Students are permitted to obtain a diploma in the Computational Cognitive Science MSc programme without fully fitting the curriculum set out in Appendix III and Appendix IV. This can only happen in consultation with, and through approval of, the Board of Examiners of the degree programme. Students are required to finish a MSc Project, to guarantee they are able to function as a MSc level researcher in line with the Dublin level descriptors / Framework for Qualifications of the European Higher Education Area, and are required to fit the Learning Outcomes of the programme (set out in Appendix I). These Learning Outcomes have been established in accordance with the AI MSc Framework of Reference of the Netherlands.
