Appendix I. Learning outcomes of the Bachelor's degree programme (art. 3.1)

A. Generic learning outcomes – Knowledge

A1. Bachelor's graduates have general knowledge of the foundations and history of mathematics, natural sciences and technology, in particular those of astronomy.

A2. Bachelor's graduates have mastered the basic concepts of astronomy (see the Degree programme-specific learning outcomes, listed below, for further specification) to a certain extent and are familiar with the interrelationships of these concepts within astronomy as well as with other disciplines.

A3. Bachelor's graduates have in-depth knowledge of several contemporary topics within astronomy.

A4. Bachelor's graduates are familiar with the quantitative character of the fields of mathematics and natural sciences and have an understanding of the methods used in these fields, and particularly within astronomy, including computer-aided methods.

A5. Bachelor's graduates have sufficient knowledge and understanding of mathematics and natural sciences to successfully complete a follow-up Master's degree programme in astronomy.

A6. Bachelor's graduates are aware of the societal, ethical and social aspects involved in the fields of mathematics and natural sciences, and act accordingly.

B. Generic learning outcomes – Skills

B1 (Research) Bachelor's graduates are able to draw up a research question, design, plan and conduct research and report on it with an appropriate degree of supervision. Bachelor's graduates are able to evaluate the value and limitations of their research and assess its applicability outside their own field.

B2 (Designing) Bachelor's graduates are able to translate an astronomy problem, in particular a design problem, into a plan of approach and – taking into account the practical boundary conditions – find a solution.

B3 (Gathering information) Bachelor's graduates are able to gather relevant information using modern means of communication and to critically interpret this information.

B4 (Collaborating) Bachelor's graduates are able to collaborate in teams on technical-scientific problems.

B5 (Communicating) Bachelor's graduates are able to communicate in English, both orally and in writing in academic and professional contexts, with both colleagues and others. They are familiar with the relevant means of communication.

B6 (Reflecting) Bachelor's graduates are able to assess their own actions and those of others in a natural sciences context, bearing in mind the social/societal and ethical aspects.

B7 (Learning skills) Bachelor's graduates are able to apply learning skills that enable them to pursue a follow-up degree and acquire knowledge in new fields with a high level of autonomy.

B8 Additional subject-specific skills are listed below in Degree programme-specific learning outcomes – Skills.

Degree programme-specific learning outcomes – Basic Knowledge

1. The bachelor's graduate in Astronomy
 - 1.1. has some knowledge of the historical development of the astronomical worldview;
 - 1.2. is familiar with the principles of positional astronomy;
 - 1.3. masters the basic astrophysics of planets, stars and galaxies, interstellar medium and cosmology;
 - 1.4. knows the basic principles concerning conducting astronomical observations in different wavelength regimes and processing the obtained observational data;
 - 1.5. has a thorough knowledge of theoretical astrophysics;
 - 1.6. has a thorough knowledge of general mathematics (calculus, linear algebra, complex analysis, error analysis, and statistics);
 - 1.7. has a thorough knowledge of general physics (classical mechanics, electromagnetism, quantum physics, thermodynamics, statistical physics, wave phenomena, oscillations and optics, matter: structure and interactions);
 - 1.8. (minor) has a deeper knowledge of subjects within their own discipline or a broad general knowledge of a different discipline.

Degree programme-specific learning outcomes – Skills

2. The bachelor's graduate in Astronomy
 - 2.1. is on an elementary level able to obtain, analyse, and presents observations in different wavelength regimes of objects like stars, galaxies, and star forming regions;
 - 2.2. is able to conduct basic astronomical observations with an optical telescope;
 - 2.3. is familiar with the use of computers and computing in astronomy research:
 - has experience in working with astronomical observations and/or astronomical simulations;
 - is able to write software in a common programming language.

Appendix II. Majors and Minors (art. 3.7)

The degree programme consists of the Astronomy major (150 ECTS) and a free minor (30 ECTS).

Major:

The Astronomy major of 150 ECTS is equal and mandatory for all Astronomy students.

Minors:

1. The Bachelor's degree programme of Astronomy offers the following deepening minors:
 - Astronomy (30 ECTS)
 - Instrumentation & Informatics (30 ECTS)
2. The Bachelor's degree programme of Astronomy offers the following University Minor:
 - Astronomy through space and time (15 ECTS)

This minor is offered university wide and as such not available for students from the bachelor degree programmes Astronomy, Physics, and Applied Physics.

Appendix III. Course units in the first year of the degree programme

- **List of course units; art. 4.1.1**
- **Compulsory order of examinations; art. 9.3**

The assessment method(s) of the courses below, including information on practicals, can be found in the assessment plan of the degree programme and on Ocasys.

Course unit (course code)	ECTS	Entry requirements
Calculus 1 (for Physics) (WBPH057-05)	5	
Calculus 2 (for Physics) (WBPH058-05)	5	
Electricity and Magnetism (WBPH033-10)	10	
Introduction to Programming and Computational Methods (WBAS013-05)	5	
Linear Algebra (for Physics) (WBPH054-05)	5	
Mathematical Physics (WBPH049-05)	5	
Mechanics and Relativity (WBPH001-10)	10	
Observational Astronomy (WBAS015-05)	5

Appendix V. Contact hours (art. 3.6)

Bachelor's year 1	
Structure contact hours	Contact hours per year
Lectures	346
Tutorial	288
Practicals	140
Tutoring	8
Examinations	45
Other structured hours	50

Bachelor's year 2	
Structure contact hours	Contact hours per year
Lectures	334
Tutorial	288
Practicals	71
Tutoring	8
Examinations	45
Other structured hours	18

Bachelor's year 3 *	
Structure contact hours	Contact hours per year
Lectures	88
Tutorial	56
Practicals	40
Tutoring	8
Examinations	12
Other structured hours	24

*only semester 2

Appendix VI. Additional Requirements Open degree Programmes (art. 7.3)

Students wishing to pursue an open degree programme may file a request with the Board of Examiners of Astronomy. The Board of Examiners will evaluate whether the proposed curriculum meets the learning outcomes of the degree programme.

Appendix VII. Transitional provisions (art. 12.1)

8.1 Transitional arrangement 2024-2025

Discontinued course units				Substitute course units				
Course code	Course name	ECTS	Final exam	Course code	Course name	ECTS	Explanation	Equivalent Yes/No
