- I. Learning outcomes
- II. Majors and Minors
- III. Course units first year of the degree programme
- IV. Course units second and third years of the degree programme
- V. Contact hours degree programme
- VI. Additional Requirements Open degree Programmes
- VII. Transitional provisions

Appendix I Learning outcomes of the Bachelor's degree programme (Article 3.1.1)

Graduates are able to:

1. Explain general basic principles of biology and describe how they relate to each other;
2. Estimate the relevance of research results in one or more areas of biology published in academic journals and discuss these results with peers;
3. Describe fundamental and/or applied scientific research and recognize areas of interest within it;
4. Describe the relationship between various disciplines and integrate terms and concepts from the subject areas;
5. Recognise and analyse scientific problems, and design a scientific/academic approach to them in a systematic manner.
6. Under supervision, formulate a research hypothesis or propose a research design within their own discipline, and possess sufficient practical skills to conduct the research themselves;
7. Explain the societal relevance of the discipline, evaluate the related responsibilities and judge their individual role in that context.
8. Develop a work method independently and proactively, justify it, and carry it out in order to achieve a specific aim;
9. Contribute to and take responsibility for solving a specific problem or task in a specific role as part of a team;
10. Report about research in a structured manner, both orally and in writing;

The degree programme also offers the student:

11. To explore career opportunities and opportunities for follow-on degree programmes.

Appendix II Majors and Minors of the degree programme (Article 3.7.4 and 7.1.3)

The degree programme has the following Major(s):

- Behaviour and Neurosciences (BN)
- Biomedical Sciences (BMS)
- Ecology and Evolution (EE)
- Integrative Biology (IB) (until cohort 2024)
- Molecular Life Sciences (MLS)

The degree programme has the following Minor(s):

- Minor Biomedical Life Sciences
- Minor Ecology & Evolution

Students can also participate in:

- Faculty minor programmes;
- University minor programmes
 - The minor programme “Neuroscience” is not accessible for students from the Bachelor’s degree programme Biology
- Teacher Training minor programme
- Minor programmes at other national universities;
- Minor programmes at international universities.

Appendix III Course units in the first year of the degree programme

- List of course units; (Article 4.1.1 and 9.4.3)
- Compulsory order of examinations (Article 9.3)

First semester (all majors):

Course unit name	Course code	ECTS	Entry requirements
Basic Cell and Molecular Biology	WBBY001-05	5	n/a
Biostatistics 1	WBBY014-05	5	n/a
Basic Academic Skills	WBBY086-02	2	n/a
Genetics, Ecology & Evolution	WBBY005-05	5	n/a
Lab Course ¹	WBBY021-03	3	n/a
Microbiology	WBBY022-05	5	n/a
Physiology	WBBY011-05	5	n/a

Second semester:

Majors Behaviour and Neurosciences, Biomedical Sciences, Molecular Life Sciences

Course unit name	Course code	ECTS	Entry requirements
Behavioural Neurosciences	WBBY026-05	5	n/a
Cell Biology and Immunology	WBBY033-05	5	n/a
Metabolism	WBBY058-05	5	n/a
Molecules of Life	WBBY047-05	5	n/a
*Laboratory Research Skills in Life Sciences	WBBY087-05	5	Yes (see Art. 4.4.1.)
*Theoretical Research Skills in Life Sciences	WBBY088-05	5	

Major Ecology & Evolution

Course unit name	Course code	ECTS	Entry requirements
Behavioural Neurosciences	WBBY026-05	5	n/a
Biochemistry and Cell Biology in Ecology and Evolution	WBBY029-05	5	n/a
Ecophysiology of Plants and Animals	WBBY052-05	5	n/a
Evolutionary Ecology	WBBY038-05	5	n/a

¹ Biology students can get a certificate for Safe Microbiological Techniques (SMT)/Veilige Microbiologische Technieken (VMT) via this course.

Appendix IV Course units in the second and third years of the degree programme

- List of course units (Article 7.1.1 and 9.4.3)
- Compulsory order of examinations (Article 9.3)

4.1. Major-specific requirements

The second and third year of the degree programme are composed of 90 ECTS major-specific course units (described below for each major), plus a minor programme of 30 ECTS.

4.1.1. Major Biomedical Sciences

Compulsory course units (50 ECTS)

Course unit name	Course code	ECTS	Entry requirements
*Bachelor's Thesis Life Sciences	WBBY901-05	5	Yes (see Art. 4.4.7.)

4.2. Minor programmes

Minors in the Life Sciences

The Bachelor's degree programme Biology offers its students two minors within the Life Sciences.

- Minor Biomedical Life Sciences

Accessible to students following the major EE.

Course unit name	Course code	ECTS	Entry requirements
Bioinformatics <i>or</i> Chronobiology	WBBY002-05 WBBY003-05	5	n/a n/a
Human Genetics and Genomics <i>or</i> Python Programming for Biologists	WBBY042-05 WBBY089-05	5 5	n/a n/a

Minor congress	WBBY023-05	5	n/a
Molecular Genetics	WBBY008-05	5	n/a

- Minor Ecology & Evolution

Accessible to students following the major BMS, BN, MLS, or IB¹

Course unit name	Course code	ECTS	Entry requirements
Behavioural Biology <i>or</i> Python Programming for Biologists	WBBY013-05 WBBY089-05	5	n/a n/a
Genes & Behaviour <i>or</i> Conservation Biology	WBBY018-05 WBBY016-05	5	n/a n/a

*Systems Ecology & Ecological Interactions 2	WBBY071-05	5	Yes (see Art. 4.4.3.)

University minor "Neuroscience"

The Bachelor's degree programme Biology is also responsible for the University minor "Neuroscience". This minor is not accessible to students from the Bachelor's degree programme Biology.

Course unit name	Course code	ECTS	Entry requirements
Neuroscience	WBBY009-15	15	n/a
*Behavioural Neuroscience	WBBY010-15	15	Yes (see Art. 4.4.8.)

4.3. Courses with one or several practical components

Course details, practicals, entry requirements, mode of assessment, examination and entry requirements are described in Ocasys.

¹ Whether the minor is accessible to students from the major IB depends on their choice of electives in semester 1, Year 2.

4.4. Compulsory order of examinations

All course units in the curriculum are accumulative and assume knowledge, insight and skills to have been obtained in previous course units. Any deficiencies should be repaired as soon as possible.

Courses with specific entry requirements have been provided with a * in Art. 4.1.

4.4.1. Laboratory and Theoretical Research Skills in Life Sciences

This course unit (10 ECTS) consists of two different parts with separate course codes. Students are obliged to follow both parts at the same time. Students cannot follow a part individually (except for resits).

4.4.2. Research Skills in Ecology and Evolution 1, 2, and 3

This course unit (10 ECTS) consists of three different parts with separate course codes. Students are obliged to follow all three parts at the same time. Students cannot follow a part individually (except for resits).

4.4.3. Systems Ecology & Ecological Interactions 1 & 2

Participation in the course “Systems Ecology & Ecological Interactions 1” is an entry requirement for participation in the course “Systems Ecology & Ecological Interactions 2”. An exception is made for students for whom the old curriculum course “Systeemecologie” is compulsory in their major.

4.4.4. Ecological and Evolutionary Modelling

Successful completion of the course “Modelling Life” is an entry requirement for participation in the course “Ecological and Evolutionary Modelling”.

4.4.5 Molecular Research in Human Disease

In order to follow the course “Molecular Research in Human Disease”, students need to have followed the course “Biomedical Sciences Practical”.

4.4.6. Research Projects

All students need to have obtained the following entrance conditions before being able to start a major-specific Research Project in year 3 of the Bachelor’s programme:

- 90 ECTS
- Including all course units from the first year of the Bachelor’s degree programme Biology,
- Excluding the minor programme (30 ECTS).

Students can only follow the research project of their chosen major programme. A student is excluded from participation in a major-specific research project when the student has already completed the research project of another major programme. Consequently, students cannot graduate with two major programmes.

4.4.6.1 Students in the major Molecular Life Sciences

In order to start a Research Project, students in the major Molecular Life Sciences need to have followed the course “Practical Carrousel”.

4.4.6.2. Students in the major Ecology & Evolution

In order to start a Research Project, students in the major Ecology & Evolution need to have followed the course “Biostatistics II”.

4.4.6.3. Students in the major Integrative Biology

Students who want to follow a Research Project within the research area of ecology or evolution need to have followed the course “Biostatistics II”.

4.4.7. Bachelor’s Thesis

All students need to have obtained the following entrance conditions before being able to start the Bachelor’s Thesis:

- Students must have completed all course units from the first year of the degree programme,

- Students must have earned at least 60 ECTS from the second and third year of the degree programme.

4.4.8. University minor “Neuroscience”

Participation in the course Neuroscience is an entry requirement for participation in the course Behavioural Neuroscience. This entry requirement does not apply to students of Medicine and Human Movement Sciences.

Appendix V Contact hours (Article 3.6.1)

Information about contact hours

The contact hours in the bachelor degree programme Biology depend on the chosen major and the chosen course units throughout the bachelor programme. Students can expect an average of contact hours as listed below.

Degree programme year 1	
Structure contact hours	Average contact hours per year
Lectures	270
Tutorials	150
Practicals	200
Examinations	32

Degree programme year 2	
Structure contact hours	Average contact hours per year
Lectures	336
Tutorials	98
Practicals	183
Examinations	36

Degree programme year 3 (excl. minor programme)	
Structure contact hours	Average contact hours per year
Lectures	53
Tutorials	47
Practicals	250
Examinations	6

Appendix VI Additional Requirements Open degree Programmes (Art. 7.3)

Students who wish to pursue an open degree programme will have to file a request with the Board of Examiners. Any additional requirements to the open degree programme will be determined by the Board of Examiners and Programme director of the Bachelor's degree programme Biology.

Appendix VII Transitional provisions (Article 12.1)

Course units that are no longer part of the Biology curriculum as of 2025-2026

The course units in the first column are no longer part of the curriculum. These will be replaced by course units in column “Alternative options in 2026-2027”. The extensive table can be found on the next pages.

Students who have passed the course unit “Programming for Life Sciences” or “C++ for Biologists” are not allowed to follow the course unit “Python Programming for Biologists”.

There are several course units that have been provided with a new course title, but that have the same content as a course unit in the curriculum of 2024-2025 and earlier. Therefore, students are not allowed to include the following course units next to each other in their individual course programme.

- Students who have passed the course unit “Biomedical Research Laboratory Course” are not allowed to follow the course unit “Biomedical Sciences Practical”.
- Students who have passed the course unit “Big Data Management in Ecology and Evolution” are not allowed to follow the course unit “Machine Learning in Ecology and Evolution”.

Students can only enroll for the last chance exam(s) when they have already followed the lectures and practicals of the old curriculum course. Students can only enroll for the alternative course(s) when they have not followed the lectures and practicals of the old curriculum course.

			# Biomedical Sciences Practical (WBBY090-05) has been added as a compulsory course unit for students following the major Biomedical Sciences from 2025-2026. It is compulsory for students from cohort 2025 and later. Students from cohort 2024 and earlier can choose any elective from the major Biomedical Sciences instead.			
			* Students who still have to complete Research Skills in Life Sciences 1 (WBBY066-02) will have to contact the academic advisor. Students who still have to complete both Research Skills in Life Sciences 1 (WBBY066-02) and 2 (WBBY067-03) must follow Laboratory Research Skills in Life Sciences (WBBY087-05).			
			1. Students can only enroll for <u>the last chance exam(s)</u> when they have already followed the lectures and practicals of the old curriculum course. 2. Students can only enroll for <u>the alternative course(s)</u> when they have <u>not</u> followed the lectures and practicals of the old curriculum course.
