

What is Cover?

Cover is the study association for students of Artificial Intelligence and Computing Science. Cover organizes a wide range of degree programme related as well as social activities for its members. For example, Cover organizes introductory activities at the beginning of each academic year where first-year students of our degree programmes can get to know each other as well as senior students.

Cover also organizes lots of social activities, including drinks every first Wednesday of the month. In addition, the association has many specialized committees that organize fun activities for members, for example a LAN party or paintball. There is something for everyone and new ideas are always welcome! If you want to attend all these awesome activities and be up-to-date on all of them, go to www.svcover.nl/join. We hope to see you during the Kick-off Week and many times after that at! If you have any questions, you can always send an email to Cover at board@svcover.nl.

Introductory Camp 2019/20

As well as its social activities, Cover organizes several study-related activities, including monthly activities in collaboration with companies, such as (lunch)lectures and workshops. In addition, an excursion abroad is held once a year. Previous excursions have visited Stockholm, Edinburgh, Antwerp and the USA to name just a few.

Cover maintains lively contacts with many universities and companies both in the Netherlands and abroad, and thus offers its members a wide knowledge network. Lectures about interesting topics are held regularly, and once a year a large symposium is organized with a theme that is related to our degree programme. Members of Cover are also entitled to nice discounts on textbooks. You can order your books well before you need them!

Company visit to TomTom

Cover has over 900 student members, about 100 of whom are active in committees or on the board. A committee consists of a number of members who perform certain duties for the association. For example, the StudCee organizes study support lectures to help you pass exams each period. The ActiviTee organizes the majority of all social activities and the ExCee organizes the annual excursion abroad. Joining a committee will enable you to contribute to the study association in a fun way, while making new friends along the way!

One of the goals of the association is to help improve the study programmes in collaboration with the staff members. Furthermore, we hope to welcome a whole new batch of excited first-year students, who will experience the advantages of what we have to offer. Become involved in the association and improve your student experience!
