

Introduction Letter

Dear first-year student of Artificial Intelligence or Computing Science,

Welcome to the Artificial Intelligence or Computing Science degree programme. We think you made a great choice! We are study association Cover and, together with your degree programme, we organize all kinds of (introductory) activities in order to provide you with a smooth and entertaining start of your studies.

Together with your degree program, we are working hard to organize a great Kick-Off week. Throughout the week, there will be activities planned, leading up to the Introduction camp that will take place during the weekend. These activities will allow you to get to know your fellow students, study program, study association and student life in Groningen in general. The exact programme of the Kick-off Week will be announced by the degree programme elsewhere in this information package.

More information on the introductory activities can be found in the other documents of the (online) information package. For more information on our study association, please check our website (www.svcover.nl) and the “Study Association” document in the information package.

Be sure to sign up for Cover at www.svcover.nl/join, so you can attend all our awesome activities even after the Kick-off Week! We hope to see you during the Kick-off Week and many times after that at Cover activities! If you have any questions, you can always send an email to Cover at board@svcover.nl.

Good luck and lots of fun with your studies in Groningen and we hope to meet you soon!

With kind regards,

The Cover Board
