

Dear student,

We are very pleased to welcome you to our bachelor's degree programme in Astronomy.

To get settled in as soon as possible, our degree programmes in cooperation with the study associations FMF and T.F.V. 'Professor Francken' organise several activities:

- Introduction day, **2<sup>nd</sup> of September** (mandatory)
- Official start of the programme, **5<sup>th</sup> of September** (mandatory)

Here are also some places where you can order your books for the first block:

- [Book sale](#)
- [2<sup>nd</sup> hand book sale](#)

Information about how to order your study books and the programme of the mandatory introduction day can be found in the separate documents attached or on [this web page](#).

To give you the opportunity to meet your new fellow students in an informal environment, introduction week events are organised. For more information and registration, please check out the separate document.

Furthermore, at the introduction day (**2<sup>nd</sup> of September**) mentors (senior students) will be appointed to small groups of first-year students. Your mentor will guide you through the first period and help you with practical matters. Meetings with the mentor are planned on a regular basis as well as with your tutor (a staff member). Moreover, if you encounter problems during your studies you can contact your [academic advisor](#).

We are looking forward to seeing you on the 2<sup>nd</sup> of September and wish you all the best with your studies.

Kind regards,

On behalf of the degree programme and the study associations,

Natacha Barrow,  
*Chair of Sirius A*
