Activities in the introduction week – Sirius A

The first full week after the introduction weekend is called the kick-off week. During this week you get to explore the Zernike campus and the beautiful city of Groningen. Crucially, you will get to know your fellow Astronomy students! To help you settle in, we have planned two amazing social activities, one for all first-year students and another for students attending the astronomy programme:

Monday, September 5th: Pubquiz together with FMF & T.F.V. ‘Professor Francken’
Thursday, September 8th: Free Pizza & Astronomy Show

Many more activities will be planned throughout the year, such that you can also meet older students!

For more information please visit [our website](#), and make sure to read all the documents in the welcome package!

In the meantime you can visit our instagram page (@siriusagroningen) or join the 1st Year Astronomy WhatsApp group chat (click [here](#) to join) for news and updates. If you have any questions, feel free to send us an email at sirius@astro.rug.nl.

Kind regards,

Natacha Barrow
Chair of Sirius A
