Dear future life scientist,

It will not be long before you say goodbye to life as a school pupil and embark on a new adventure as a student in the greatest student city in the Netherlands: Groningen!

It is fantastic that you have chosen to study Biology, Biomedical Engineering or Life Science & Technology at the University of Groningen. These degree programmes give you the opportunity to develop in all aspects of the life sciences, and to shape your career to what you would like to do. You will soon discover that studying is not just about learning by routine – it is about developing and learning more about yourself, making new friends, having a great time as a student and above all it is about learning what you think is important in life.

Before classes, practicals and even the first exams at the University take over your life, you need to get to know the other students in your programme! To make that possible, The EI (First Year Introduction Committee) is organising plenty of introduction activities, stay tuned on [our website](#) for all the fun activities that the EI is planning to organise.

For detailed information on purchasing study books and/or the study association itself, please see the other documents in the information pack.

### Introduction activities

Together with the Programme, we will organise an Introduction day, an Introduction Camp and an End Party. For an overview of all the activities that we will be organising, check out [our website](#) or follow us on social media.

If you have questions about the introduction activities, please contact the [First Year Introduction Committee](#). For general questions, you can check our [FAQs](#) or the [GLV Idun website](#) and you can always contact the board via [email](#) or by phone (+31682470072).

We wish you a fantastic time as a student and we hope to see you around at the Introduction Day!

On behalf of the introduction committee and the board,

Bas Venhuizen

*Chairman EI*

Jippe Jansman

*Chairman GLV Idun*
