MSc Psychology: Talent Development and Creativity

How can we develop the best athletes? How can teachers nurture pupils’ talent and creativity in education and music? And how can we improve the selection of talented and creative employees, students, and athletes? The MSc program Talent Development and Creativity teaches you the latest skills and knowledge to answer such questions.

In any achievement domain, there is an increasing focus on the development, selection, and promotion of talent and creativity. In this unique, internationally-oriented Master's programme you will develop the expertise to enable you to select, develop, and nurture talent and creativity in individuals and organisations across achievement domains. You will learn about the theoretical approaches to talent development and creativity, and you will be in contact with different organisations in the worlds of sport, business and education so you can learn to put your knowledge and skills in practice.

As part of your MSc thesis you will carry out a research project and an internship in the achievement domain that interests you most.

- We will train you to be an expert in the key to individual and organisational success: Talent development and creativity
- This unique, internationally-oriented MSc programme equips you with the necessary scientific attitude, insight, and skills to be successful as a researcher or practitioner in the fields of work, sports, education, arts, or music
