

Bart Noort

a.c.noort@rug.nl

Department of Operations Management and Operations Research, Faculty of Economics and Business, University of Groningen

Background

Education

MSc Biomedical Sciences, track:
Science, Business and Policy
University of Groningen

BSc Life, Science and Technology
University of Groningen

Research

An epidemiological study on
respiratory infections in Suriname.
Academic hospital, Suriname

The risk of mosquito-borne
infections in The Netherlands.
RIVM, The Netherlands

Influenza and pneumococcal
pneumonia.
UMCG, The Netherlands

Research interests

- **Quality measurement**
Quality indicators. Public reporting. Is pay-for-performance possible without proper quality measurement?
- **Case-mix adjustment**
Increasing the reliability of quality indicators. Reducing incentives for risk-selection by insurers and providers
- **Shared savings**
Incentive to realize innovation and cost reductions which benefit both providers and insurers. Do shared savings influence quality of care?
- **Appropriate care**
Providing care which is in accordance to evidence based guidelines. What are incentives for (non) adherence?
