Academic year 2020/2021

Assessment Plan

International Humanitarian Action (NOHA) 120 ects
CROHO 6819

1 / Vision of teaching and assessment

Aim of the programme

The aim of the degree programme is to impart an academic education to students in terms of specialized knowledge, skills and competence in the interdisciplinary field of International Humanitarian Action, such that they are able to perform successfully in specific humanitarian contexts in occupations for which specific academic knowledge and skills at Master's degree level are required or preferred.

Its purpose is to provide students with the profile of a broad formation in the area of international humanitarian action, in which both critical thinking and applied research skills are emphasised while contextualised to humanitarian action in a specific region or organisational context. The goal is to educate, in an interdisciplinary spirit, high level and highly dedicated personnel who can function with professionalism and informed by their theoretical insights and humanitarian principles, ensuring quality of services in the broad field of humanitarian relief.

Building on the Faculty of Arts' vision for education, the International Humanitarian Action Programme offers high-quality teaching that is fuelled and inspired by leading research in the field. Graduates are equipped with knowledge and skills that suit the 21st century. They are known for their language mastery, often in multiple languages, and their understanding of communication processes. Their analytical abilities and critical minds enable them to form well-founded judgements. They have the skills that match the 'digital turn' that academic research has been making in the past few years. They are able to order and analyse (large quantities of) data and information, and draw adequate conclusions for humanitarian programming and policy. In addition to these research skills, they have a strong intercultural awareness as well as the ability to work together with others in a constructive manner. The structure of the programmes prepares them for a suitable position in the non-profit sector or the business world. Academic developments, as well as a rapidly changing world, encourage us to think about how we can best equip, activate and inspire our Arts students with a view to their future role in society.

The Faculty's students and staff are characterized by an increasing heterogeneity in language, qualifications and cultural background. We want to offer all our students a safe and inclusive learning environment in which they are willing to push their boundaries, take risks and make mistakes, and in which they can be proud of their successes. A crucial factor in this is the quality of our academic and support staff. The academic expertise as well as the didactic skills of eminent researchers from the Netherlands and abroad make a significant contribution to the development of a new generation of academic professionals. They inspire their students by integrating their own research in their classes or by having students participate in their own research.

Learning pathways (LP)

To meet these objectives, The International Humanitarian Action programme is structured into four learning pathways allowing students to develop their critical and analytical skills while being exposed to the diversity of disciplinary perspectives and cultural stances on humanitarian action.

	Learning pathways	Study load ¹
	<p align="center">LP1 - Specialisation Period (semester 1)</p> <p><i>Written assessments must form at least 60% of the assessment for this component. 40% may consist of other forms of examination with due evidence of process and outcome.</i> <i>Individual assessments should account for at least 30% of the assessment for this component.</i></p>	30 ECTS
	Intensive Programme	5 ECTS
	World Politics and Humanitarian Action	5 ECTS
	Legal Dimensions of Humanitarian Action	5 ECTS
	Management in Humanitarian Action	5 ECTS
	Social and Medical Sciences for Humanitarian Action	10 ECTS
	<p align="center">LP 2 – Specialisation Period (semester 2)</p> <p><i>Written assessments must form at least 60% of the assessment for this component. 40% may consist of other forms of examination with due evidence of process and outcome.</i> <i>Individual assessments should account for at least 30% of the assessment for this component</i></p>	
	Advanced Management in Humanitarian Action	5 ECTS
	Methodology and Research Methods in Humanitarian Studies	5 ECTS
	<p>The student follows one of the following thematic specialisations:</p> <ul style="list-style-type: none"> • Humanitarian Policy and Practice: From Delivering Aid to Ending Needs (Ruhr-Universität Bochum) • Protection in Humanitarian Action (Universidad de Deusto) • Societies in Transition (University College Dublin) • Humanitarian Analysis and Intervention Design (H-AID) (Rijksuniversiteit Groningen) • Forced Migration and Human Security (University of Malta) • Conflict, Peace-Building and Religion (Uppsala Universitet) • Armed Conflicts and Humanitarian Action (Uniwersytet Warszawski) • Legal and Geopolitical Approach of Humanitarian Action (Aix-Marseille Université) 	20 ECTS
	LP3- Contextualisation Period (semester 3)	
	The student follows one of two optional tracks:	30 ECTS

	Regional Training Track including Experiential Training ¹ Work Placement Track including Career Development Training	
LP4 – Research Period (semester 4)		
	Master thesis	30 ECTS

Consistent with the vision for education promoted by the degree programme, problem and project based – taking the form of case studies, simulation exercises, or practical exercises – occupy a central role in the preferred assessment mode of the degree programme.

Dialogue

We offer our students a learning environment that stimulates them to actively work on their own learning process. A good interaction between students, academic and support staff is essential. In this, it is crucial that students and lecturers discuss the learning process together, as well as students discussing it amongst themselves, and that lecturers discuss the content of a course unit, how it will be taught and how this facilitates the student's learning process. Lecturers develop modes of instruction that stimulate interaction. They give students feedback and guide them towards achieving the intended learning outcomes. The dialogue between students and lecturers is also a way to continuously improve teaching. Digital teaching resources play an increasingly important role in this. Interaction is also the most important building block for continuously improving teaching quality outside the classroom: among colleagues and within programme teams, between the programme committee, board of examiners and degree programme board, between degree programmes, alumni and the workplace, between student representatives and the faculty board. It is exactly by shaping our teaching together that we are able to achieve a high quality.

Learning is key

Students and lecturers together form a true learning community. In each course unit, the student's learning process – both as an individual and as a group member – is key. Students of various backgrounds learn together and from each other in seminars or team assignments. They optimally prepare for a working life in which a global perspective and an open approach to other cultures are crucial. Teaching comprises recognizable learning pathways in which academic skills are integrated into course units within the entire curriculum. Lecturers choose suitable and challenging modes of instruction and assessment, provide specific feedback and stimulate students where possible to reflect on their learning process and further shape this. Assessment not only serves to assess the delivered performance, but also to provide insight into students' progress with a view to the learning outcomes. Formative evaluation (feedback) plays

¹ Written assessments must form at least 60% of the assessment for this component. 40% may consist of other forms of examination with due evidence of process and outcome. Individual assessments should account for at least 30% of the assessment for this component.

a major role in this. Students, in turn, provide feedback to their lecturers via teaching evaluations, enabling them to further improve their teaching

2 / How to follow the assessment cycle (from design to evaluation and optimization)

3 / Assessment dossier

a. The assessment dossier

The requirements of the assessment dossier are set out in §4 of the 'Protocol for Quality Assurance in the Assessment of Course Units' drawn up by the Board of Examiners.

All the examiners of a degree programme must provide the Board of Examiners with an 'assessment dossier' containing the following:

The course guide

For exams:

- Questions
- Distribution of points across exam questions
- Model answers; in case of essay questions in the exam: two filled-in assessment forms, or, if no such forms are used, two assessments (e.g. comments on the margin or any other justification of assigned points). These two examples should include one with a stronger and one with a weaker result.
- Document confirming peer review with the names of (at least) two examiners from within the department
- If available: statistical analysis of exam (usually provided by ESI) and info on any adjustments to the exam in light of this analysis (e.g. multiple choice question that was not counted).

For assessments other than exams (in particular papers and presentations):

- Any instructions and assessment criteria not mentioned in the course guide that have been communicated to students separately
- Two filled-in assessment forms, or, if no such forms are used, two assessments (e.g. margin comments or any other justification of assigned grade). These two examples should include one with a stronger and one with a weaker result.

The list of all partial and final grades

Any other documents requested by the Board of Examiners/Expertiseteam International Studies.

b. Parties involved

The following parties are involved in fulfilling duties related to the assessment dossier:

- Lecturers : prepare the assessment dossier according to the above-mentioned regulations
- Board of Examiners: oversees assessment dossiers
- Secretariat : Stores the assessment dossier on the programme Y Drive

4 / Assessment timetable

Overview of learning outcomes of the degree programme + matrix	Appendix 1
Schematic overview of time periods intended for assessment, modes of assessment used and, if relevant, learning pathways	Appendix 2

The objectives of the degree programme, set out in the learning outcomes of the degree programme (Appendix 1), form the guiding principles. All course units together fulfil a role in working towards these learning outcomes. This is reflected in a coherent curriculum with a transparent structure. The matrix of learning outcomes (Appendix 1) defines the course units that include summative assessments and distinguishes between a) course units with assessments that *lead up to* the attainment level set out in the programme-level learning outcomes and b) course units with assessments *at this attainment level* (in the latter case the learning outcomes of the course unit are thus identical to the programme-level learning outcomes of the degree programme). This distinction is expressed as follows:

' <u>x</u> ', i.e. underlined, is used for summative ² assessments at the level specified in the programme-level learning outcomes 'x' for summative assessments at lower performance levels 'fx' for formative ³ evaluations at lower performance levels

In parallel with the curriculum, the assessment programme (Appendix 2) offers a balanced, well-structured overview of modes of assessment and exam periods. Course units taught within one learning pathway may be given matching visual markings in the overview.

5 / Safeguarding of assessment quality by the Board of Examiners

² Summative assessment aims to assess a student's knowledge and skills. Such assessments are usually awarded a mark, accompanied by a justification of the mark (adapted from *Toetsen in het hoger onderwijs* (2017)).

³ Formative evaluation relates to the process of searching, aggregating and interpreting information, which students and lecturers can then use to determine how students are doing in their learning process, what they should work towards and how this can be most effectively done (adapted from *Toetsen in het hoger onderwijs* (2017)).

The Board of Examiners is responsible for safeguarding the quality of assessment at both the degree programme level and the level of individual course units.

a. Safeguarding of assessment quality at degree programme level

The Board of Examiners annually issues advice on each degree programme's draft assessment plan for the coming academic year.

b. Safeguarding of assessment quality at course unit level

The Board of Examiners aims to evaluate the assessments for all course units in a degree programme in a three-year cycle – in other words, to examine each course unit's assessment at least once every three years, bearing in mind the position of the course unit in the curriculum and in a specific learning pathway. In addition, a substantiated selection of theses is also evaluated.

6 / Archiving

Assessment dossiers are stored on the Y-Drive of the programme
(Y:\staff\let\NOHANieuw\3. Education and Courses\9. Board of Examiners)

7 / List of documents relevant to assessment

Faculty vision of teaching and assessment – see

<https://myuniversity.rug.nl/infonet/medewerkers/let/onderwijs/vision-for-education>.

NOHA Study and Examinations Regulations

Rules and Regulations – the internal regulations of the Board of Examiners.

Teaching and Examination Regulations (TER = OER; *Onderwijs- en examenregeling*) – a legally binding document that applies to the entire cohort of students who start a degree programme in a certain academic year. The TER may also contain transitional arrangements for previous cohorts.

Matrix of learning outcomes – an appendix to the Assessment Plan that specifies the course units with *summative* assessment leading up to or at the level specified in the programme-level learning outcomes and the course units with formative assessment.

Placement manual – a manual for the placement course unit.

Syllabus – a document that sets out the details of the TER and the Assessment Plan at course unit level in accordance with the information in Ocasys.

Assessment Plan – a document that is enclosed as an appendix with the TER and is therefore legally binding.

Assessment programme – a schematic overview of time periods intended for assessment, modes of assessment used and, if relevant, learning pathways (previously known as the 'assessment plan').

Assessment protocol – the implementation of the TER, Part A, Article 8.7.

Appendix 1. Learning outcomes of the degree programme + Matrix of learning outcomes

Appendix 1 - Overview of learning outcomes of the degree programme + matrix

Graduates of the degree programme are expected to have achieved at graduation at least the following programme learning outcomes, in conformity with the norms defined by level 7 of the Humanitarian Action Qualifications Framework (HAQF), level 7 of the European Qualifications Framework for Lifelong Learning (EQF-LLL) and the second cycle in the Framework for Qualifications of the European Higher Education Area (Dublin descriptors):

EQF-LLL	Academic research	Dublin descriptors				
		Knowledge & understanding	Applying knowl. & understanding	Making Judgements	Communication	Learning skills
<i>Knowledge</i>	Has specialised knowledge and a critical methodological understanding of appropriate research methods and research design for the humanitarian field and for original research in humanitarian studies.	✓				
<i>Skills</i>	Has justified and applied methodology and scientific methods correctly in an original piece of humanitarian research.		✓			
<i>Responsibility & autonomy</i>	Has studied a research topic in depth, and conducted and completed a medium-length research project largely self-directed.					✓
HAQF – Humanitarian commitment						
<i>Knowledge</i>	Has a critical understanding of the humanitarian principles and standards and the problematic nature of the dilemmas involved.	✓				
<i>Skills</i>	Has demonstrated the ability to formulate adequate and ethically sound recommendations for humanitarian action grounded in the humanitarian principles and values, translating these in innovative, practical terms to policies, strategies and programme management.		✓			
<i>Responsibility & autonomy</i>	Takes responsibility for specifying clear ethical standards informed by the humanitarian principles, values and professional codes of conduct. Applies innovatively and strategically correct the humanitarian principles and standards to dilemmas in complex and insecure contexts.			✓		
HAQF – Context analysis & reflection						

<i>Knowledge</i>	Has highly specialised knowledge and a critical understanding of humanitarian concepts and theories. Has innovative expertise on a particular current theme in humanitarian action with an interdisciplinary understanding in terms of its political, legal, anthropological, public health and management aspects.	✓				
<i>Skills</i>	Has specialised skills to conceptualise, interpret and critically analyse complex humanitarian crises and interventions on the basis of a variety of sources, generating new interdisciplinary expertise to help solve complex humanitarian problems.		✓			
<i>Responsibility & autonomy</i>	Has demonstrated the ability to position one's own research findings in the broader context of humanitarian action. Has developed an open attitude towards acquiring new knowledge and understanding about professional and academic developments in humanitarian action.					✓
HAQF – Coping & safety						
<i>Knowledge</i>	Has a thorough understanding of personal security risks in humanitarian fieldwork and possible techniques and strategies to reduce the impact of external stressors.	✓				
<i>Skills</i>	Has specialised problem-solving skills to promote the best and safest response in humanitarian emergency contexts in terms of personal and social implications and foreseeable harm by humanitarian interventions.		✓			
<i>Responsibility & autonomy</i>	Acts firmly and appropriately in insecure situations according to the security rules, taking into account advice from security sources and other stakeholders.			✓		
HAQF – Leadership						
<i>Knowledge</i>	Has a critical understanding of opportunities and threats of current trends in the humanitarian sector.	✓				
<i>Skills</i>	Has demonstrated a range of coaching and management skills to carefully assess the relevant factors for decision making in terms of operative context, possible effects and risks and the best way for successful implementation of strategic decisions.			✓		
<i>Responsibility & autonomy</i>	Has demonstrated the ability to act on decisions made. Has adopted a reflective practice analysing personal learning goals and ways to achieve them. Stimulates the involvement and development of team members and partners to achieve a successful humanitarian project.					✓
HAQF – Collaborative relationships						

<i>Knowledge</i>	Has highly specialised knowledge of the diversity of actors and stakeholders, their interaction and competition, and a thorough understanding of the importance of coordination between different levels in the humanitarian system.	✓				
<i>Skills</i>	Has demonstrated the ability to listen to beneficiaries and stakeholders and taking into account their considerations, to communicate humanitarian expertise and research findings in a structured, intelligible way to specialists and non-specialists in a multi-cultural humanitarian setting. Has the ability to cultivate relations of sensitive respect in terms of cultural and gender diversity and to cooperate in a quest for mutual benefit or compromise.				✓	
<i>Responsibility & autonomy</i>	Involves partners and team members in different levels of decision-making and acts responsible and accountable concerning own decisions. Actively contributes to team building, a balanced distribution of work, and fostering a good atmosphere and cohesion in group projects in an effort to achieve the common goal.				✓	
HAQF – Service to crisis-affected people						
<i>Knowledge</i>	Has highly specialised knowledge and critical understanding of the impact of various humanitarian action interventions on the needs and rights of crisis-affected people and their interaction with interests of relevant actors in a certain professional regional context.	✓				
<i>Skills</i>	Specialised problem-solving skills combining interdisciplinary knowledge and understanding of the range of needs and capabilities of crisis-affected people in a certain regional context toward relevant, evidence-based solutions for effective response.		✓			
<i>Responsibility & autonomy</i>	Learns from past experiences, identifies opportunities to overcome humanitarian dilemmas and proposes new work methods for increased efficiency, effectiveness and stakeholder accountability in complex and unpredictable humanitarian environments.					✓
