Academisch jaar 2020/2021

Toetsplan

Bachelor Europese Talen en Culturen

1 / Visie op onderwijs en toetsing

The Faculty of Arts offers high-quality teaching that is fuelled and inspired by leading research. The Faculty is a classic Arts faculty, offering mono- and multidisciplinary programmes that are each of a high standard and together create space for interdisciplinary teaching. Graduates are equipped with knowledge and skills that suit the 21st century. They are known for their language mastery, often in multiple languages, and their understanding of communication processes. Their analytical abilities and critical minds enable them to form well-founded judgements. They have the skills that match the 'digital turn' that academic research has been making in the past few years. They are able to order and analyse (large quantities of) data and information, and draw adequate conclusions. In addition to these research skills, they have a strong intercultural awareness as well as the ability to work together with others in a constructive manner. The structure of the programmes prepares them for a suitable position in the non-profit sector or the business world. Academic developments, as well as a rapidly changing world, encourage us to think about how we can best equip, activate and inspire our Arts students with a view to their future role in society. The organization of our teaching is transitioning into a more interactive learning environment in which dialogue takes centre stage. The Faculty's students and staff are characterized by an increasing heterogeneity in language, qualifications and cultural background. We want to offer all our students a safe and inclusive learning environment in which they are willing to push their boundaries, take risks and make mistakes, and in which they can be proud of their successes. A crucial factor in this is the quality of our academic and support staff. The academic expertise as well as the didactic skills of eminent researchers from the Netherlands and abroad make a significant contribution to the development of a new generation of academic professionals. They inspire their students by integrating their own research in their classes or by having students participate in their own research.

Dialogue

We offer our students a learning environment that stimulates them to actively work on their own learning process. A good interaction between students, academic and support staff is essential. In this, it is crucial that students and lecturers discuss the learning process together, as well as students discussing it amongst themselves, and that lecturers discuss the content of a course unit, how it will be taught and how this facilitates the student's learning process. Lecturers develop modes of instruction that stimulate interaction. They give students feedback and guide them towards achieving the intended learning outcomes. The dialogue between students and lecturers is also a way to continuously improve teaching. Digital teaching resources play an increasingly important role in this. Interaction is also the most important building block for continuously improving teaching quality outside the classroom: among colleagues and within programme teams, between the programme committee, board of examiners and degree programme board, between degree programmes, alumni and the

workplace, between student representatives and the faculty board. It is exactly by shaping our teaching together that we are able to achieve a high quality.

Learning is key

Students and lecturers together form a true learning community. In each course unit, the student's learning process – both as an individual and as a group member – is key. Students of various backgrounds learn together and from each other in seminars or team assignments. They optimally prepare for a working life in which a global perspective and an open approach to other cultures are crucial. Teaching comprises recognizable learning pathways in which academic skills are integrated into course units within the entire curriculum. Lecturers choose suitable and challenging modes of instruction and assessment, provide specific feedback and stimulate students where possible to reflect on their learning process and further shape this. Assessment not only serves to assess the delivered performance, but also to provide insight into students' progress with a view to the learning outcomes. Formative evaluation (feedback) plays a major role in this. Students, in turn, provide feedback to their lecturers via teaching evaluations, enabling them to further improve their teaching.

2 / Regels voor het doorlopen van de toetscyclus (van ontwerp naar evaluatie en optimalisering)

Schriftelijke toetsen worden door examinatoren ontworpen en binnen de leerstoelgroep aan peer-review onderworpen. Examinatoren nemen de toetsen af, kijken na en beoordelen. Na afloop van het vak wordt de toetsing door studenten geëvalueerd. Voor een deel van de vakken wordt de expertise van het ESI ingeschakeld voor een statistische analyse van de toetsen, om vragen te identificeren die niet voldoende onderscheid maken tussen studenten die de leerdoelen wel of niet gehaald hebben. De uitkomsten van de evaluatie en van de statistische analyse worden in de opleidingscommissie besproken en, zo nodig, worden aanpassingen aan de examinatoren voorgesteld.

3 / Toetsdossier

a. Het toetsdossier

De eisen die aan het toetsdossier gesteld worden zijn neergelegd in §4 van het 'Protocol borging toetskwaliteit in modules' van de Examencommissie.

Alle examinatoren van een opleiding zorgen ervoor dat de EC de volgende stukken in de vorm van een 'toetsdossier' ter beschikking staan:

- a. de studiehandleiding
- b. de cijferlijst, bevattende alle deeltijfers die bijdragen aan het eindcijfer
- c. - in het geval van een toets in engere zin: de toets zoals deze afgenomen is, incl. antwoordmodel/sleutel;
- in het geval van werkstukken: de opdrachtformulering, informatie over de daarbij toegepaste

beoordelingswijze (beoordelingscriteria en normering), voor zover niet beschikbaar in studiehandleiding, en de volledig ingevulde beoordelingsformulieren

- in het geval van eindwerkstukken: de volledig ingevulde beoordelingsformulieren en de ingeleverde werkstukken (al dan niet voorzien van commentaar door de docent)

d. de blauwdruk voor de toetsing, verslagen van intervisiebijeenkomsten, (zelf)evaluaties van het modules e.d. voor zover beschikbaar

e. een verklaring per leerstoelgroep over het peer-review proces van de toetsing.

b. Betrokken actoren

Voor het vervullen van de taken rond het toetsdossier zijn de volgende actoren verantwoordelijk de docenten, de leden van de leerstoelgroep (voor peer-review) en de examencommissie.

4 / Programmering van de toetsing in de tijd

Overzicht van de eindkwalificaties van de opleiding	Bijlage 1
Matrix eindkwalificaties	Bijlage 2
Schematische weergave toetsprogramma	Bijlage 3

Leidend zijn de doelen van de opleiding, die neergelegd zijn in de eindkwalificaties van de opleiding (bijlage 1). De studieonderdelen vervullen gezamenlijk een rol in het toewerken naar die eindkwalificaties. Dit komt tot uiting in een coherent curriculum met een transparante structuur. De matrix eindkwalificaties (bijlage 2) benoemt de vakken waarin summatieve toetsing plaatsvindt en maakt een onderscheid tussen a) studieonderdelen die middels toetsing *toeleiden* naar het in de eindkwalificaties beschreven eindniveau en b) studieonderdelen waarin toetsing *op eindniveau* plaatsvindt (in dit laatste geval vallen de leeruitkomsten van het studieonderdeel dus samen met de eindkwalificaties). Dit onderscheid komt tot uitdrukking in de markering:

“x”, d.w.z. met onderstreping, wordt gebruikt voor summatieve¹ toetsing op eindniveau;
“x” voor summatieve toetsing op een lager prestatieniveau;
“fx” voor formatieve² evaluatie op een lager prestatieniveau.

¹ Summatief toetsen is het onderzoek dat erop gericht is te oordelen over de kennis en de vaardigheden van een student. Meestal gebeurt dit met een cijfer in combinatie met een vorm van onderbouwing van het cijfer (vrij naar ‘Toetsen in het hoger onderwijs’ (2017)).

² Formatief evalueren betreft het proces van zoeken, aggregeren en interpreteren van informatie die studenten en docenten vervolgens kunnen gebruiken om te bepalen waar studenten staan in hun leerproces, waar zij naartoe moeten werken en op welke manier dat het meest effectief is (vrij naar ‘Toetsen in het hoger onderwijs’ (2017)).

Parallel aan het curriculum biedt de schematische weergave toetsprogramma (bijlage 3) een evenwichtig gestructureerd overzicht van toetsvormen en toetsperiodes. Studieonderdelen binnen een leerlijn kunnen eventueel eenzelfde visuele markering in het overzicht krijgen. Om op programmaniveau inzichtelijk te krijgen of de gekozen toetsvormen aansluiten bij de leeruitkomsten van vakken en een evenwichtige mix vormen in de aanloop naar de eindkwalificaties, worden alle beoogde leeruitkomsten van de studieonderdelen aan de toetsvormen gerelateerd (bijlage 3).

5 / Borging toetskwaliteit door de Examencommissie

De borging van de toetskwaliteit door de Examencommissie speelt zich af op het niveau van het programma en op het niveau van de afzonderlijke vakken.

a. Borging toetskwaliteit op programmaniveau

Jaarlijks brengt de Examencommissie in het jaar voorafgaand aan het nieuwe academische jaar advies uit over het concept-toetsplan van de opleiding.

b. Borging toetskwaliteit op moduleniveau

De Examencommissie stelt zich ten doel de toetsing in alle vakken van de opleiding in een driejarige cyclus te evalueren, met dien verstande dat de toetsing van elk vak ten minste eenmaal in de drie jaar doorgelicht wordt. Hierbij wordt mede gekeken naar de plaats van het vak in het curriculum en de plaats ervan in een specifieke leerlijn. Daarnaast wordt een beredeneerde selectie gemaakt uit scripties.

6 / Archivering

Examinatoren zijn verantwoordelijk voor het archiveren van toetsen, rubrics en gemaakte tentamens tot 7 jaar na afnemen van de toets.

7 / Lijst van de voor toetsing relevante documenten

Facultaire visie op onderwijs en toetsing – p.m.

Regels en Richtlijnen – het huishoudelijk reglement van de Examencommissie

Onderwijs- en examenregeling (OER) – juridisch bindend document geldend voor het studentencohort dat in hetzelfde academisch jaar met de studie start. De OER bevat tevens eventuele overgangsregelingen voor eerdere cohorten.

Matrix eindkwalificaties – bijlage bij het Toetsplan, waarin gespecificeerd wordt in welke modules *summatieve toetsing op eindniveau* plaatsvindt (codering: “x”, d.w.z. met onderstreping) en in welke modules *formatieve* (codering “fx”) dan wel *summatieve toetsing op een lager prestatieniveau* (codering: “x”) plaatsvindt

Stagehandleiding –studiehandleiding voor het curriculumonderdeel ‘stage’.

Studiehandleiding – uitwerking van OER en toetsplan op moduleniveau, in lijn met de informatie in Ocasys.

Toetsplan – bijlage bij de OER en daarmee in juridische zin bindend.

Toetsprogramma - Schematisch overzicht van de tijdvakken bestemd voor toetsing, de gehanteerde toetsvormen en evt. leerlijnen (het ongewijzigde huidige “toetsplan”)

Toetsprotocol – de uitwerking van OER deel A, art. 8.7 .

Bijlage 1. Eindkwalificaties van de opleiding

Description of the Bachelor's level in accordance with the Dublin descriptors	Learning outcomes of the specialization Bachelor's graduates:
<p>1. Knowledge and understanding: Graduates have demonstrated knowledge and understanding in a field of study that builds upon and exceeds their secondary education, and is typically at a level that, whilst supported by advanced textbooks, includes some aspects that will be informed by knowledge of the forefront of their field of study.</p>	<ol style="list-style-type: none"> 1. Have knowledge of European linguistics in a broad sense 2. Have knowledge of a wide range of European literary texts as well as literary history and theory 3. Have knowledge of the political and sociocultural context of Europe in diachronic and synchronic perspectives
<p>2. Applying knowledge and understanding: Graduates are able to apply their knowledge and understanding in a manner that indicates a professional approach to their job or profession, and have competences typically demonstrated through devising and sustaining arguments and solving problems within their field of study.</p>	<ol style="list-style-type: none"> 1. Are able to adequately communicate in a second (foreign) language 2. Are able to develop innovative ideas 3. Are able to select, process and analyse information from a range of sources 4. Are able to identify, formulate and resolve problems 5. Are able to reason in the abstract and analytically and synthesize ideas
<p>3. Making judgements: Graduates have the ability to gather and interpret relevant data (usually within their field of study) to make judgements that include reflection on relevant social, academic or ethical issues.</p>	<ol style="list-style-type: none"> 1. Are able to gather and interpret relevant data in order to form judgements about relevant social, academic or ethical issues 2. Are able to take critical distance
<p>4. Communication: Graduates are able to communicate information, ideas, problems and solutions to both specialist and non-specialist audiences.</p>	<ol style="list-style-type: none"> 1. Are able to motivate and guide others 2. Are able to communicate essential information from their own discipline or field to both experts and non-experts 3. Are able to have constructive discussions with others while respecting diversity 4. Are able to express themselves correctly, carefully and at an academic level both orally and in writing, in Dutch or English and/or the second foreign language (Major language)
<p>5. Learning skills: Graduates have those learning skills that are necessary for students to continue to undertake further study with a high degree of autonomy.</p>	<ol style="list-style-type: none"> 1. Are able to stay up-to-date with developments in their field 2. Are able to plan properly and keep to deadlines 3. Are able to function independently and in a team.

Matrix gerealiseerde eindkwalificaties / onderwijsmodulen Bacheloropleiding Europese Talen en Culturen

Description of the Bachelor's level in accordance with the Dublin descriptors	Learning outcomes of the degree programme. Bachelor's graduates have:
<p>A. Knowledge and understanding: Graduates have demonstrated knowledge and understanding in a field of study that builds upon and exceeds their secondary education, and is typically at a level that, whilst supported by advanced textbooks, includes some aspects that will be informed by knowledge of the forefront of their field of study.</p>	<p>1.1 Have knowledge of European linguistics in a broad sense 1.2 Have knowledge of a wide range of European Literary texts as well as literary history and theory 1.3 Have knowledge of the political and sociocultural context of Europe in diachronic and synchronic perspectives</p>
<p>B. Applying knowledge and understanding: Graduates are able to apply their knowledge and understanding in a manner that indicates a professional approach to their job or profession, and have competences typically demonstrated through devising and sustaining arguments and solving problems within their field of study.</p>	<p>2.1 Are able to adequately communicate in a second (foreign) language 2.2 Are able to develop innovative ideas 2.3 Are able to select, process and analyse information from a range of sources 2.4 Are able to identify, formulate and resolve problems 2.5 Are able to reason in the abstract and analytically and synthesize ideas</p>
<p>C. Making judgements: Graduates have the ability to gather and interpret relevant data (usually within their field of study) to form judgements that include reflection on relevant social, academic or ethical issues.</p>	<p>3.1 Are able to gather and interpret relevant data in order to form judgements about relevant social, academic or ethical issues 3.2 Are able to take critical distance</p>
<p>D. Communication / academic ethics Graduates are able to communicate information, ideas, problems and solutions to both specialist and non-specialist audiences.</p>	<p>4.1 Are able to motivate and guide others 4.2 Are able to communicate essential information from their own discipline or field to both experts 4.3 Are able to have constructive discussions with others while respecting diversity 4.4 Are able to express themselves correctly, carefully and at an academic level both orally and in writing</p>
<p>E. Learning skills Graduates have those learning skills that are necessary for students to continue to undertake further study with a high degree of autonomy.</p>	<p>5.1 Are able to stay up-to-date with developments in their field 5.2 Are able to plan properly and keep to deadlines 5.3 Are able to function independently and in a team</p>
