1 THE GET IT! BUTTON

The Get it! button is presented in almost all our scientific bibliographic databases. By using the Get It! button you can check whether you have access to the full text. To see the button, always start using a database, e-journal or e-book via our website.

2 DOI-LINK

Use the DOI-link presented in each publication description, if you think the Get it!-button is not working properly. If you can download the PDF there, then the library has a subscription (or it's free or Open Access). If you can not download the PDF, we do not have a current subscription for access to the full-text.
