

Top Master NanoScience

Assessment and grading form:

Small Research Project (NS194, 13 ECTS)

Dear supervisor of a TopMaster - small research project,

With this e-mail I like to obtain the grade for the Small research project (NS194) that a topmaster student carried out in your team. Please use the short questions below for formulating your grade for the part in your group. Note that part of the grade should be based on the quality of the student's logbook notes and related presentations of results (instead of a thesis-like report). The final grade will be based on this grade (weight 2/3) and the grade for the Symposium presentation.

A full description of this part of the curriculum is here on the web:
<http://www.rug.nl/research/zernike/education/topmasternanoscience/ns194>

Please also communicate your grading below here directly to the student.

The regular deadline for this grading is 1 July.

Thanks – Caspar van der Wal (as coordinator NS194)

Name of student:

Name of supervisor (permanent/tenure-track staff):

1) Subgrade:

Quality of logbook notes and related presentations.

2) Subgrade:

Contribution to work in the lab (hands-on work):
