Shigella spp.
and entero-invasive
Escherichia coli

*Diagnostics, clinical implications
and impact on public health*

Maaïke van den Beld

Shigella spp. and entero-invasive Escherichia coli

Diagnostics, clinical implications and impact on public health

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 11 December 2019 at 12.45 hours

by

Maaïke Johanna Cornelia van den Beld

born on 28 October 1980
in Utrecht

ISBN: 978-94-034-2097-4 (printed version)
ISBN: 978-94-034-2096-7 (electronic version)

The work presented in this thesis was performed at and funded by the Centre for Infectious Disease research, diagnostics and laboratory Surveillance (IDS) of the National Institute for Public Health and the Environment (RIVM), the Department of Medical Microbiology and Infection Prevention of the University of Groningen and the University Medical Center Groningen, and the Department of Medical Microbiology of Certe in Groningen. Additional funding was received from the Programmabudget Regionale Ondersteuning of the Centre for Infectious Disease Control of the RIVM. Financial support for printing this thesis was kindly provided by the RIVM, the Groningen University Institute for Drug Exploration (GUIDE), and by CO consult & onderwijs in Maarssen.

Table of Contents

Chapter 1	General introduction	9	Chapter 8	The importance of a multifactorial approach for (inter)national surveillance of <i>Shigella spp.</i> and entero-invasive <i>Escherichia coli</i>	185
Part I Taxonomy and diagnostics of <i>Shigella spp.</i> and EIEC			Part IV General discussion		
Chapter 2	Genomic taxonomy of <i>Shigella spp.</i> and Entero-invasive <i>Escherichia coli</i> (EIEC); current classification needs to be reconsidered	31	Chapter 9	Summarizing discussion, future perspectives and conclusions	229
Chapter 3	Multicenter evaluation of molecular and culture-dependent diagnostics for <i>Shigella spp.</i> and entero-invasive <i>Escherichia coli</i> in the Netherlands	61	Part V Appendices		
Part II Optimizing diagnostics of <i>Shigella spp.</i> and EIEC			Appendix I	Bibliography	247
Chapter 4	Evaluation of a culture dependent algorithm and a molecular algorithm for identification of <i>Shigella spp.</i> , <i>Escherichia coli</i> , and entero-invasive <i>E. coli</i> (EIEC)	81	Appendix II	Nederlandse samenvatting	273
Chapter 5	Matrix-Assisted Laser Desorption-Ionization Time-of-Flight mass spectrometry using a custom-made database, biomarker assignment or mathematical classifiers does not differentiate <i>Shigella spp.</i> and <i>Escherichia coli</i>	103	Appendix III	Dankwoord	281
Part III Incidence, epidemiology, clinical implications and impact on public health			Appendix IV	About the author	289
Chapter 6	Incidence, clinical implications and impact on public health of infections with <i>Shigella spp.</i> and entero-invasive <i>Escherichia coli</i> (EIEC): results of a multicenter cross-sectional study in the Netherlands during 2016-2017	125			
Chapter 7	Genome-wide association studies of <i>Shigella spp.</i> and Enteroinvasive <i>Escherichia coli</i> isolates demonstrate an absence of genetic markers for prediction of disease severity	147
