**Latitudinal differences in the
circadian system
of *Nasonia vitripennis***

Latitudinal differences in the circadian system of *Nasonia vitripennis*. Flößner T.S.E. November 2019. PhD Thesis, University of Groningen, Groningen, The Netherlands.

This research has been carried out at the Department of Neurobiology, Groningen Institute of Evolutionary Life Science (GELIFES) of the University of Groningen (The Netherlands), according to the requirement of the Graduate School of Science (Faculty of Science and Engineering, University of Groningen, The Netherlands).

This research was founded by the EU Marie Curie Initial Training Network INsecTIME. Additional support was received from the research school of Behaviour and Cognitive Neuroscience (University of Groningen, The Netherlands).

Latitudinal differences in the circadian system of *Nasonia vitripennis*

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Friday 22 November 2019 at 11.00 hours

by

Theresa Sophie Elisabeth Flößner

born on 2 January 1986
in Berlin, Germany

Supervisors

Prof. R.A. Hut
Prof. D.G.M. Beersma

Assessment Committee

Prof. B. Wertheim
Prof. J.A. Harvey
Prof. C.P. Kyriacou

Table of contents

Chapter 1	General introduction	7
Chapter 2	Lifespan is unaffected by size and direction of daily phase shifts in <i>Nasonia</i> , a hymenopteran insect with strong circadian light resetting	23
Chapter 3	Increased circadian light sensitivity in a northern line of <i>Nasonia vitripennis</i>	39
Chapter 4	Photoperiod response corresponds to different circadian entrainment properties in northern and southern <i>Nasonia vitripennis</i> lines	57
Chapter 5	In search of the hymenopteran circadian light resetting mechanism	67
Chapter 6	Conclusion & Discussion	83
	References	91
	Summary	109
	Samenvatting	113
	Acknowledgments	117
	Academic Curriculum Vitae	121
	Publications	123
