Role of autophagy-related proteins and cellular microRNAs in chikungunya and dengue virus infection

Sandra Liliana Echavarria Consuegra

The research described in this thesis was primarily performed at the Department of Medical Microbiology and Infection Prevention and the Department of Biomedical Sciences of Cells & Systems of the University Medical Center Groningen, University of Groningen, Groningen, The Netherlands.

Part of the work presented in this thesis was funded by the Graduate School of Medical Sciences, the Erasmus Mundus Action 2 mobility programme (EURICA), and the Jan Kornelis de Kock Foundation (Groningen).

The printing of this thesis was partly supported by the University of Groningen and the Groningen University Institute for Drug Exploration (GUIDE).

Role of autophagy-related proteins and cellular microRNAs in chikungunya and dengue virus infection

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 18 December 2019 at 11.00 hours

by

Sandra Liliana Echavarria Consuegra

born on 23 February 1987
in Medellin, Colombia

Supervisor

Prof. J.M. Smit

Co-supervisor

Prof. F.M. Reggiori

Assessment Committee

Prof. H.H. Kampinga

Prof. A.J. Moshage

Prof. F.J.M. van Kuppeveld

CONTENT

Chapter 1	General introduction and scope of the thesis	7
Chapter 2	Role of autophagy during the replication and pathogenesis of common mosquito-borne flavi- and alphaviruses <i>Published in Open biology</i> 2019 , 9(3), 190009	33
Chapter 3	siRNA-based evaluation of the role of autophagy-related proteins and autophagy receptors in dengue virus infection	71
Chapter 4	An autophagy-specific siRNA screen reveals BNIP3 as a regulator of chikungunya virus infection	95
Chapter 5	MicroRNA profiling of human primary macrophages exposed to dengue virus identifies miRNA-3614-5p as antiviral and regulator of ADAR1 expression <i>Published in PLoS Neglected Tropical Diseases</i> 2017 , 11(10), e0005981	127
Chapter 6	Summarizing discussion and future perspectives	159
