The work described in this thesis was performed in the research group Nanostructures of Functional Oxides — Zernike Institute for Advanced Materials at the University of Groningen, the Netherlands. This work was supported by China Scholarship Council (CSC, No. 201506140086) and Van Gogh travel grants.

Ferroelectricity and Devices

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus prof. dr. E. Sterken,
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Friday 17 January 2020 at 16:15 hours

by

Yingfen Wei

born on 6 June 1990
in Jiangsu, China

Contents

1	Introduction	1
1.1	Basic properties of ferroelectrics	1
1.2	Issues of conventional ferroelectrics in modern electronic devices . . .	6
1.3	A new type of ferroelectrics: HfO ₂ -based thin films	9
1.3.1	The origin of ferroelectricity in HfO ₂ -based films	10
1.3.2	Perspectives of ferroelectric HfO ₂ -based films in applications .	13
1.4	Thesis outline	19
	Bibliography	21
2	Experimental techniques	31
2.1	Pulsed laser deposition	31
2.1.1	PLD set-up	31
2.1.2	Basic principles	32
2.1.3	Growth modes	34
2.2	Characterization methods	35
2.2.1	Reflection High Energy Electron Diffraction	35
2.2.2	X-ray Diffraction	36
2.2.3	Scanning Probe Microscopy	40
2.2.4	Scanning Transmission Electron Microscopy	42
2.2.5	Magnetic properties characterization	43
2.2.6	Macroscopic ferroelectric polarization measurements	43
	Bibliography	46
3	A rhombohedral ferroelectric phase in epitaxially strained HZO thin films	51
3.1	Introduction	51
3.2	Experimental methods	52

3.3	Results and discussion	53
3.3.1	A rhombohedral phase of HZO	53
3.3.2	Ferroelectricity of rhombohedral HZO	58
3.3.3	Density functional theory calculations	60
3.4	Conclusion	63
3.5	Outlook	65
	Bibliography	66
4	Guidelines for polar-phase formation in epitaxial HZO thin films	69
4.1	Introduction	69
4.2	Experimental methods	70
4.3	Results and discussions	71
4.3.1	HZO on LSMO-buffered (001)-oriented perovskites	72
4.3.2	HZO on hexagonal substrates	79
4.3.3	Polar o-phase	82
4.4	Conclusion and outlook	82
	Bibliography	83
5	Magnetic tunnel junctions based on ferroelectric HZO tunnel barriers	89
5.1	Introduction	89
5.2	The fabrication of MFTJs devices	90
5.3	Results and discussion	92
5.3.1	HZO-based MTJs	92
5.3.2	Four resistance states	95
5.3.3	Bias-dependent TMR	97
5.4	Conclusion	98
	Bibliography	99
6	Magneto-ionic control of spin polarization in multiferroic tunnel junctions	105
6.1	Introduction	105
6.2	Experimental methods	106
6.3	Results and discussion	107
6.3.1	Electrical switching of spin polarization	107
6.3.2	Loss of bias-induced TMR sign change	110
6.3.3	TER built-up	110
6.3.4	Ion exchange mechanism	112
6.4	Conclusion and outlook	115
	Bibliography	116
	Summary	121
