Lanthipeptide engineering:

non-canonical amino acids, click chemistry and ring shuffling

Jingjing Deng

The work described in this thesis was performed in the Department of Molecular Genetics, Groningen Biomolecular Sciences and Biotechnology Institute (GBB), Faculty of Science and Engineering (FSE), University of Groningen, the Netherlands, and financially supported by the China Scholarship Council (CSC).

Printing of this thesis was financially supported by the Graduate School of Science and Engineering and the University of Groningen.

university of
 groningen

Lanthipeptide engineering: non- canonical amino acids, click chemistry and ring shuffling

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Monday 3 February 2020 at 9.00 hours

by

Jingjing Deng

born on 20 August 1990
in Anhui, China

Supervisor

Prof. O.P. Kuipers

Co-supervisor

Prof. J. Kok

Assessment Committee

Prof. G.N. Moll

Prof. J.G. Roelfes

Prof. N.I. Martin

Contents

Chapter 1	General introduction	7
Chapter 2	Specificity and application of the lantibiotic protease NisP.....	23
Chapter 3	Analysis of modular bioengineered antimicrobial lanthipeptides at nanoliter scale	53
Chapter 4	Generation of nisin derivatives with an altered spectrum by incorporating methionine analogues.....	107
Chapter 5	Synthesis of nisin conjugates via click chemistry and their char- acterization	129
Chapter 6	Summary and general discussion.....	149
Nederlandse samenvatting.....		157
Acknowledgments		159
List of publications.....		162
