Research Institute

SHARE

The research contained in this thesis was performed within:

- Department of Pathology and Medical Biology, University Medical Center Groningen, Groningen - The Netherlands.
- Department of Obstetric and Gynecology, University Medical Center Groningen, Groningen - The Netherlands.
- Cellular and Molecular Physiology Laboratory (CMPL), Pontificia Universidad Católica de Chile, Santiago - Chile.

Financial support for the publication of this thesis is gratefully acknowledged and was provided by the Graduate School of Medical Sciences, Comisión Nacional para la Investigación en Ciencia y Tecnología (CONICYT) (Chile), Science in Healthy Ageing and healthcaRE (SHARE) Institute, and Abel Tasman Talent program by the University of Groningen.

Gestational diabetes mellitus and fetoplacental vasculature alterations

Exploring the role of adenosine kinase in endothelial (dys)function

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C Wijmenga
and in accordance with
the decision of the college of Deans.

This Thesis will be defended in public on

Wednesday 19 February 2019 at 16:15 hours

by

Luis Alfredo Silva Lagos
born on 15 November 1990
in Santiago, Chile

Supervisors

Dr. M.M. Faas

Prof. T. Plösch

Prof. P. de Vos

Prof. L. Sobrevia

Assessment Committee

Prof. H. van Goor

Prof. M. C Harmsen

Prof. R.P.M Steegers-Theunissen

Paranymphs

Renate Akkerman

Martin Beukema

*Para **Griselda y Luis***

Table of content

Chapter 1	
Introduction	11
Chapter 2	
Design and rationale of the thesis	19
Chapter 3	
Insulin/adenosine axis linked signaling	23
Chapter 4	
Role of insulin therapy in the gestational diabetes mellitus-associated hENT1 reduction in the fetoplacental vasculature endothelium	61
Chapter 5	
Adenosine kinase and cardiovascular fetal programming in gestational diabetes mellitus	75
Chapter 6	
Key adenosine metabolism regulators are altered by high D-glucose in the fetoplacental vasculature endothelium	107
Chapter 7	
Effect of high glucose and adenosine kinase in endothelial dysfunction, inflammation and angiogenic markers in the fetoplacental vasculature endothelium	127
Chapter 8	
Role of adenosine kinase in the TNF- α effect on endothelial dysfunction, proinflammation and adenosine metabolism regulators in the fetoplacental vasculature endothelium	145
Chapter 9	
Role of adenosine kinase in the high D-glucose and TNF- α effect in mitochondrial function in the fetoplacental vasculature endothelium	161

Chapter 10

General discussion and conclusions **177**

Appendices

Summary, Samenvatting (Nederlands), Curriculum vitae and
list of publication, Acknowledgments **193**
