the versatility of an *ex vivo* model
in nanosafety studies
and fibrosis

Roberta Bartucci

The work described in this thesis was performed in collaboration with the department of Pharmacokinetics, Toxicology and Targeting, Chemical and Pharmaceutical Biology and, Pharmaceutical Technology and Biopharmacy at the Research Institute of Pharmacy (GRIP), University of Groningen (RUG)

Printing of this thesis was financially supported by the Graduate School and GUIDE.

Increasing the versatility of an ex vivo model in nanosafety studies and fibrosis

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.
This thesis will be defended in public on
Friday 26 June 2020 at 9.00 hours

by

Roberta Bartucci

born on 19 August 1989
in Rogliano, Italy

Supervisors

Prof. A. Salvati
Prof. P. Olinga

Co-supervisor

Dr. Y.L. Boersma

Assessment Committee

Prof. A. Duschl
Prof. R. Gosens
Prof. R.A. Bank

TABLE OF CONTENT

CHAPTER 1

General introduction and aim of the thesis 7

CHAPTER 2

Time-resolved quantification of nanoparticle uptake, distribution and impact in precision-cut liver slices 43

Supplementary information 73

CHAPTER 3

Comparative study of nanoparticle uptake and impact in murine lung, liver and kidney tissue slices..... 99

Supplementary information 125

CHAPTER 4

Nanoparticle-induced inflammation and fibrosis in *ex vivo* precision-cut liver slices and effects of nanoparticle exposure conditions 139

Supplementary information 170

CHAPTER 5

Vanin 1: its physiological function and role in diseases 204

CHAPTER 6

Expression study of Vanin 1 in an organ-specific comparison between onset and end-stage of fibrosis 231

Supplementary information 260

CHAPTER 7

General discussion and future prospective 264

Samenvatting 257

Acknowledgments 262

About the author 270

Awards and honors 271

Conference attendance & presentations 271

Licenses, certifications and courses attendance during the PhD ... 272

Teaching 272
