Mom's sweet gift

The beneficial effects of human milk oligosaccharides and their structure-function relationships

Lianghui Cheng

This research described in this thesis was financially supported by the China Scholarship Council and University Medical Center Gronigen.

Final support by the University of Groningen, University Medical Center Gronigen, and the Graduate School of Medical Sciences (GUIDE) for the printing of this thesis is gratefully acknowledged.

Mom's sweet gift

The beneficial effects of human milk oligosaccharides and their
 structure-function relationships

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. C. Wijmenga
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on

Tuesday 23 June 2020 at 11.00 hours

by

Lianghui Cheng

born on 24 October 1991
 in Sichuan, China

Supervisor

Prof. P. de Vos

Co-supervisor

Dr. M.M. Faas

Assessment Committee

Prof. G. Folkerts

Prof. T. Plosch

Prof. L. Dijkhuizen

Table of contents

Chapter 1	More than sugar in the milk: human milk oligosaccharides as essential bioactive molecules in breast milk and current insight in beneficial effects	9
	Rationale and outline of the thesis	32
Chapter 2	Human milk oligosaccharides and its acid hydrolysate LNT2 show immunomodulatory effects via TLRs in a dose and structure-dependent way	39
Chapter 3	The human milk oligosaccharides 3-FL, LNnT, and LDFT attenuate TNF- α induced inflammation in fetal intestinal epithelial cells through shedding or interacting with TNF receptor 1	65
Chapter 4	Human milk oligosaccharides differently modulate goblet cells under homeostatic, proinflammatory conditions and under ER-stress	83
Chapter 5	Human milk oligosaccharides (hMOs) modulate the growth and fermentation of <i>Bifidobacterium longum</i> subsp. <i>infantis</i> in a hMO specific fashion in both monoculture and co-culture with <i>Faecalibacterium prausnitzii</i>	107
Chapter 6	Effects of human milk oligosaccharides on the crosstalk between commensal bacteria and intestinal epithelium in presence of intestinal peristaltic shear force	125
Chapter 7	General discussion	151
	Appendices	
	Summary	164
	Nederlandse samenvatting	168
	Acknowledgments	172
	Publication List	175
