RISET Pro
 RESEARCH & INNOVATION IN SCIENCE & TECHNOLOGY PROJECT

The work described in this thesis was performed at the Department of Chemical Engineering, Engineering and Technology Groningen Institute, University Groningen, Nijenborgh 4 9747 AG Groningen, The Netherlands.

The research project was financially supported by The Indonesian Ministry of Research, Technology, and Higher Education, via the Riset Pro Scholarship Program (Keputusan Menristek Dikti No. 46/M/Kp/XI/2014).

Syntheses and Applications of Thermally Reversible Polymeric Networks from Vegetable Oils

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Monday 29 June 2020 at 14.30 hours

by

Frita Yuliati

born on 26 July 1979
in Bandung, Indonesia

Supervisors

Prof. H.J. Heeres
Prof. F. Picchioni

Assessment Committee

Prof. J. Yue
Prof. P.P. Pescarmona
Prof. M. Letizia Focarete

**Dedicated to my beloved family
For all the sacrifice to support me in this journey**

Table of Contents

1	Introduction	1
2	Furan-functionalization of Jatropha Oil	29
3	Thermally Reversible Polymeric Networks from Vegetable Oils	57
4	Comparison between Irreversible and Reversible Cross-linking in Biobased Polymeric Networks from Jatropha Oil	89
5	Potential Applications of Thermally Reversible Networks from Vegetable Oils	119
	Summary	143
	Samenvatting	147
	Acknowledgements	151
	List of Publications	157
	Participation in Conferences	157
