Metabolic capabilities of *Lactococcus lactis*

Flavor, amino acids and phenotypic heterogeneity

The work described in this thesis was performed at the Department of Molecular Genetics, Groningen Institute for Molecular Biology and Biotechnology, Faculty of Science and Engineering, University of Groningen, The Netherlands. The research was supported by the Dutch Technology Foundation stw, which is part of the Netherlands Organization for Scientific Research (NWO).

The Graduate School of Science and the University of Groningen financially supported the printing of this thesis.

Printing of this thesis was financially supported by the Netherlands Society of Medical Microbiology (NVMM) and the Royal Netherlands Society for Microbiology (KNVM).

Metabolic capabilities of *Lactococcus lactis*

Flavor, amino acids and phenotypic heterogeneity

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. C. Wijmenga
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on

Friday 28 August 2020 at 14.30 hours

by

Jhonatan Alejandro Hernandez Valdes

born on 10 December 1990
 in Mexico Stad, Mexico

Supervisors

Prof. O.P. Kuipers

Prof. J. Kok

Assessment Committee

Prof. A. J. M. Driessen

Prof. L. Dijkhuizen

Prof. D. van Sinderen

CONTENTS

- 9 Chapter 1**
General Introduction

- 45 Part I**
**Development of bacterial biosensors to detect
flavor-promoting compounds**

- 47 Chapter 2**
Development of *Lactococcus lactis* biosensors for detection
of diacetyl

- 101 Chapter 3**
Draft genome sequences of three amino acid-secreting
Lactococcus lactis strains

- 107 Chapter 4**
Enhancement of amino acid production and secretion
by *Lactococcus lactis* using a droplet-based biosensing
and selection system

- 153 Chapter 5**
Development of *Lactococcus lactis* biosensors for detection
of sulfur-containing amino acids

- 185 Part II**
**A view of bacteria at the single-cell, single-species
culture, and mixed-species level**

- 187 Chapter 6**
Another breaker of the wall: The biological Function of the Usp45 protein of *Lactococcus lactis*
- 219 Chapter 7**
A riboswitch gives rise to multi-generational phenotypic heterogeneity in an auxotrophic bacterium
- 275 Chapter 8**
Impact of spatial proximity on territoriality among human skin bacteria
- 311 Chapter 9**
Summary and General Discussion
- 323 Nederlandse samenvatting**
- 329 Acknowledgements**
- 333 Publications**
