The author of this thesis was financially supported by several funders. The paper presented in Chapter 2 is an output of a research project implemented as part of the Basic Research Program at the National Research University Higher School of Economics (HSE). Preparation of the papers presented in Chapters 3 and 4 has been funded by the Center for Language and Brain NRU Higher School of Economics, RF Government grant, ag. No 14.641.31.0004. The work was also partially supported by the Russian Foundation for Humanities (RGNF), grant 11-06-12033v; by Short Term Scientific Mission COST Action IS1208 COST-STSM-ECOST-STSM-IS1208-011014-050781; by the Academic Fund Program at the National Research University Higher School of Economics (HSE) in 2015-2017 (grant №15-01-0110); and by the Russian Academic Excellence Project "5-100".

Publication of this thesis was financially supported by the University of Groningen and Stichting Aphasie Nederland (SAN).

Individual Behavioural Patterns and Neural Underpinnings of Verb Processing in Aphasia

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Thursday 12 November 2020 at 12.45 hours

by

Yulia Akinina
born on 19 April 1989
in Moscow, USSR

Supervisor
Prof. Y.R.M. Bastiaanse

Co-supervisor
Dr. O. Dragoy

Assessment Committee
Prof. C.G. Luzzatti
Prof. B.A.M. Maassen
Prof. N.O. Schiller

ACKNOWLEDGMENTS

Doing a PhD is a serious challenge, but you never do it alone. I am greatly indebted to so many people around me who made it possible.

First of all, I dearly thank my supervisors, Prof. dr. Roelien Bastiaanse and Dr. Olga Dragoy, for guiding me, giving me topics and tests to adapt, and providing me with all the unique opportunities in career and life. I owe you tremendously, and I cannot thank you enough.

I thank my reading committee, Prof. Claudio Luzzatti, Prof. dr. Ben Maassen and Prof. dr. Niels Schiller, for taking their time to read my thesis and assess it.

I want to express my gratitude to my senior collaborators and co-authors, Prof. Nina Dronkers and Dr. Maria Ivanova. Although not my formal supervisors, you were indeed my mentors, I learned so much from you, and it was a real pleasure working with you.

Thank you to Victor Shklovsky and Roman Cheremin for providing access to the resources of the Center for Speech Pathology and Neurorehabilitation in Moscow, Russia, without which the research with people with aphasia would not be possible. Likewise, special thanks to my clinician colleagues and collaborators Ekaterina Iskra, Elena Mannova and Svetlana Kuptsova, for their help and advice on navigating the real-life clinical setting and the insights from their fields of speech pathology and neuropsychology.

I wholeheartedly thank all our research participants who gave their time to help advance scientific research.

I thank all the co-authors of the papers that are part of this thesis (and now the lists start to intersect!) – Anna Artemova, Roelien Bastiaanse, Olga Buivolova, Olga Dragoy, Nina Dronkers, Oksana Fedina, Maria Ivanova, Ekaterina Iskra, Svetlana Malyutina, Elena Mannova, Alexey Petrushevsky, Viktor Shklovsky, Olga Soloukhina, And Turken, and Andrey Zyryanov. Thank you for your invaluable contributions, it has been so fun working with you! Thanks to the proofreaders of the papers, Kelly Callahan (chapter 1, 2 and 5) and Katrina Gaffney (chapter 4). For the help on chapter 3, I would like to mention our colleagues and collaborators for their invaluable contributions to the paper: Svetlana Malyutina for her helpful comments on the text, Anna Yurchenko for her assistance with lesion data processing, Roelien Bastiaanse for her suggestions for manuscript revisions, and all those who assisted with behavioral data pre-processing (Anna Kotova, Tatiana Rylko, Anastasia Novikova, Julia Edeleva, Grigory Ignatyev, Valeriya Garkavaya, Maria Melnikova, Maria Grabovskaya, Viktoriya Silayeva, Anna Vechkaeva, and Olga Rudina).

For their contributions to the work on chapter 4, I express my gratitude to Lilya Kazakova, Alexey Koshevoy, Oksana Kovaleva, Natalia Krasikova, Taisiya Metelkina, Stepan Mikhailov, Evgeniya Miller, Anastasia Panova, Elena Savinova, Evgeniya Slepak, and Elena Sokur, for their assistance with collection of data. I also thank Ekaterina Iskra for her help with data collection in people with aphasia and for her invaluable clarifications of the standard language diagnostic procedures in the Center for Speech Pathology and Neurorehabilitation.

I would like to express my profound gratitude to my former and now-colleagues at the Center for Language and Brain (formerly Neurolinguistics Lab) in Moscow. Andrey, Anna (A.), Anna (Yu.), Anna (Lau.), Anna (Chr.), Anastasia (K.), Anastasia (L.), Anastasia (S.), Anastasia (Sh.), Daria, Dima, Ekaterina (St.), Ekaterina (T.), Evdokiya, Galina, Grigory, Kirill, Maria (G.), Maria (I.), Maria (Kh.), Nina (L.), Nina (Z.), Olga (S.), Olga (B.), Rosa, Svetlana (M.), Svetlana (D.), Tatiana, Natalia, Nikita, Valeriya (T.), Valeriya (Z.), Vardan, Victor, Victoria, Zara, Zoya – thank you for your support and help with scientific and technical questions, for your intellectually stimulating discussions and for the friendships that I hope will last wherever our future career paths take us.

Thanks to the current and former IDEALABers and members of the Neurolinguistics group: Aida, Annie, Assunta, Camila, Fleur, Frank, Jakolien, Jidde, Juliana, Kaimook, Katya, Liset, Miren, Nat, Nienke, Sana, Seçkin, Silvia, Srđan, Svetlana, Suzy, Pauline, Teja, and Toivo. We were not formally in the same program, but I really enjoyed our time together during my short stays in Groningen, and I learned from you a lot. I really wish we had spent more time together.

Thanks a million to my wonderful paranymphs Annie and Alice who helped me organize everything remotely – quite a challenging task in these challenging corona-times.

Life is not all work, so I will now also mention those outside academia who make my life so much fuller and better.

Many thanks to my choir *A Posteriori*: its director Danya, choirmasters Ira and Masha, and all the basses, tenors, altos, and fellow sopranos, for the singing we did together over the last two years. It brought me so much joy and gave much needed energy. I would probably not have finished without something like this. Thank you!

Also, special thanks to my dear friends! Masha, I couldn't choose between 'my bff' and 'my old bestie', but what can I say? you know everything already. Everyone (sorry for unintentional omissions!) – Alex, Asya, Dasha, Dima, Emil, Gosha, Grisha, Ilona, Ilya, Ilya, Katya, Marianna, Nastya, Nika, Nikita, Sabira, Samer, Tema, Vanya, Uliana, Yasya – I am so lucky to have met you! Thank you for your support, and for just being there.

Finally, I express my profoundest gratitude to my family who supported me no matter what. Thanks to my grandpa, a fellow scholar. Sis, I love you more than anything. Mom and dad, I don't know what I would do without your unconditional support. Thank you, baba Sasha, you are the best; thank you, ded Tolya! And finally, with all my heart, thanks to my grandma Olga, who made it all possible. God, I wish you were here to see this.
