Acknowledgments

I always thought that writing the acknowledgements will be the easiest and most relaxing thing of the whole PhD thesis. I was wrong. In fact, I have to confess that actually this piece took me more time than writing chapter 9. Although the main meaning of this section is to say thanks, I realized that this is also the only chance a PhD student have to tell a bit more about him/herself, to show that, besides the 40+ weekly hours spent on working, the sweat and the frustration, he/she had also friends and hobbies to fill up his/her life. When I started my PhD, I thought 4 years would be an extremely long time to stay away from my family and friends, confined in a small city of The Netherlands I had never have heard about before. Again, I was wrong. During the last 4 years, I challenged my personal limits in many ways, I achieved important aims, I expanded my geographic, social and scientific knowledge and I had fun, but all these things would not have been realized without the contribution of the wonderful people I met, who made this experience the most extraordinary to me so far.

So, a big thanks go to the people who made this PhD possible for me in the first place: my promoters Martina Schmidt and Herman Meurs.

I would like to thank Martina for many things: first of all, to pick me up from the station of Groningen in a rainy day in June 2006. Thanks for choosing me to carry on the challenging and interesting discovery of the potential of Epac in the lung, I hope many more people will have a benefit from it. Thanks for pushing me all the time I felt frustrated, defeated or disappointed. Thanks to let me feel important in my work and to let me improve my theoretical and practical skills. From you I learned things I will never forget in my entire life (not only pull-down assays)!

Dear Herman, thanks for your valuable lessons on asthma and COPD. I wish I had you as a teacher during my school years, It would have been an easier start for my PhD. Your cure of details was very important in the improvement of all my manuscripts. Thanks for helping me in the last crazy period of deadlines.

I also have to thank the University of Groningen and the School of Behavioural and Cognitive Neuroscience to support my project and give me the opportunity to follow educative courses and conferences. Diana and Janine, thanks to reply to all my e-mails and requests.

Kees, thanks for giving my curriculum to Herman and Martina, without your help I would have never reached so high!

A special thanks go to Harm, my co-promotor. Although unexpected, it turned out to be a good choice of fate. Interestingly, you were also the first person I met in the lab, in Herman’s office, when you were busy finishing up as a “terminal” PhD-student. To you (as well as to Martina) goes my thanks for the organization, the preparation, the correction and the revision of my chapters. You were also the only one in the lab who actually beat me in a squash game (you know I don’t like to lose!!). Your acting skills are exceptional: I will miss the Harm-Hans and Harm-Sinterklaas shows very much!
I also would like to thank the many other people I met while working in the Molecular Pharmacology lab and I hope I won’t forget anybody because the list is very long.

Sophie, although our working collaborations are restricted to the disappointing zymography, luckily we had much more to share besides work. I become addicted to our coffee breaks very soon, and not because of the quality of the coffee. I enjoyed the time we spent together in and outside the lab. I become attached to your wonderful family (Richard, Michelle and Claudia) and it will not be easy for you to get rid of me. Thanks for giving me advices and to support me in period of stress, my mum is also very grateful!

Caro, you introduced me to the practical work in the lab: cell culture, western blotting and contraction experiments don’t have secrets (?!?) for me anymore thanks to you! Moreover, talking with you helped me to lighten my burdens in the most difficult time of my PhD, I will never forget it!

Bart, you were an example for me as PhD student. From the first year, I had a big admiration for you: for your organizational, theoretical and practical skills…then I went playing squash with you! I will never forget our American trip to Ray’s lab and especially our night trip in New York, at least the part where I was awake!

Tonio, I really enjoyed sharing the office with you. Thanks to you, I discovered my love for the Muse and the Hitchcock’s movies.

Reinoud, for you I have a special thanks as you offered Hoeke a PhD position and your decision has probably changed my life forever. Thanks for the moment spent outside work, the quizzes and the football: Thanks to you, I will never forget the WK of 2010 although it was one of the worst performances of the Italian team! You are also in the list of my co-authors in chapters 4 and 6 for a reason: thanks!

Mark, I think in almost 3 years I know you, I have never seen you sad or angry, please tell me what’s your secret! Your contribution to my work was technically probably the most important as your name is actually in all my experimental chapters: THANKS!

I also want to thank the other members of the Department for offering me an ideal working environment: Prof. Hans Zaagsma, Dr. Ad Nelemans, Prof. Jaques Hille and then Christa, Dedmer, Efi, Annett, Marieke, Anita, Tjistke, Loes, Kuldeep and Julia. Anouk, thanks for helping me with the realization of chapter 5 in the busiest moment of my PhD. Girls, was nice to have special evenings with you: playing games and eating a lot of chocolate together! Janneke thanks for helping me with Dutch forms!

Frank-Jan, Hans, Lonneke, Marieke, Loes, Janke, Geert&Kristian, Alwin, Esther and Clelia. With your technical support I managed to realize this thesis and I would like to thank each and every one of you for the time you have spent listening to my ideas without thinking I am crazy (I hope). A thanks goes to the reading committee for actually finding the time to read my thesis.
Acknowledgments

I would like to thank the members of Squadraat, the squash team I have been part of for the last 3 years, for giving me the possibility to get rid of my stress and frustration on the squash court.

I also take the occasion to thank my private “little Italy”: Ale and Ruut (and Joona), Fiora, Erka and Massimo. Ruut, our talen-avonden will always be in my memories, more for the food you prepared next to it that for their actual scope! Ale thanks for your wonderful Sinterklaas gifts and your fish-stick cake recipe (obviously ironic!!). Fiora and Erka, I really enjoyed living with you! I will never forget our Friends evening (before you cheated for Grey’s Anatomy, Lost or Sex in the City!), our parties together, the crazy shopping, the movie nights (especially Harry Potter’s) and the innumerable coffees (and hight tea), lunches and dinner together with all the gossiping included. I still wish to be invited to your weddings!!

Massimo, thanks for sharing with me the difficult process of learning dutch. Also thanks for your precious help in refining the thesis and for your support in the creation of the high-resolution figures, the PDF file and in the delivery of the thesis. If I could choose 3 paramiphs instead of 2, you will be definitely the one! I will never forget the *typical* hilarious moments spent with you!

A very special thanks goes to my best friend Girste. Thanks for deciding to participate in a trip to Schiermonnikoog with a group of unknown people and to sit next to me in the bus. In 10 minutes I realized that I have never met a girl so similar to me (maybe because in 10 minutes you managed to tell me about your entire life!!). Talking with you was like talking to myself sometimes, as we have been through the same happy, sad and busy moments at almost the same time. Thanks for listening to me, giving me wise advices and for trusting me as your confidant. Thanks for let me laughing with your special habits, for being my traveling companion in Spain and Egypt and my buddy in our diving adventure. Thanks for deciding to stay in the Netherlands with Massimo in your future, as it would be sad not to have you around.

I would like to thank the Baarsma’s and the Boomstra’s: Sipke, Johanna, Rein, Welmoed, Jojanneke and Joukje: thanks for letting me feeling at home everytime I come to visit. Friesland has become a Warmland to me!

I also could not have managed without the help of my italian family. Grazie allo zio Angelo, alla Franci e Marco per avermi aiutato in un momento difficilissimo come la stesura della tesi. Grazie per aver letto le mie 153768593 mail, di aver trovato il tempo per rispondere e darmi suggerimenti e grazie per aver realizzato la copertina della tesi! Non so come avrei fatto senza di voi.

Grazie a Roby, Franci e Marco per aver anche solo pensato allo sbattimento di prendere 2 aerei in 3 giorni, piu’ 5 ore di treno per venire fin quassù a condividere con me 45 minuti di pura tensione! Spero di non deludere le vostre aspettative!

Grazie a Benny che seppure non legata a me da parentele di alcun genere, fa ormai parte della mia famiglia da tempo!

Grazie a Sergio, che dopo 4 anni, ha capito che per farmi le foto deve venire in Olanda!
Grazie a tutti i miei familiari, la nonna, gli zii e le zie e i cugini, perché ogni volta che vi rivedo è come se non fossi mai partita.

Papà e mamma, grazie per avermi spinto a partire per l’Olanda quando non ne ero sicura, e per avere tenuto la porta aperta nei miei momenti di sconforto. Senza di voi non sarei dove sono ora e a voi va il mio ringraziamento più profondo. Sono felice che la mia partenza non ci abbia impedito di vederci regolarmente e spero che col tempo possiamo trovare una soluzione più stabile alla lontananza.

I would like to thank the owners of Grunopark and Stadspark for offering my parents a convenient place to stay in winter and in summer times.

Last but definitely not least, I want to thank Hoeke, mijn lieve vriend! Although it is easy to share moments of happiness, I know I am not the easiest person to deal with in period of stress, so thanks for standing me, Hoeke. Thanks to welcome my parents in your life, it means a lot to me!

You are the reason why I will never regret my choice, as meeting you is the nicest thing which has ever occurred to me in my entire life!

Sara, Groningen 2010
