RIJKSUNIVERSITEIT GRONINGEN

**Counterregulation to acute and recurrent
hypoglycemia in rats**

Proefschrift

ter verkrijging van het doctoraat in de
Wiskunde en Natuurwetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de
Rector Magnificus, dr. F. Zwarts,
in het openbaar te verdedigen op
vrijdag 20 februari 2009
om 16:15 uur

door

Stephan Daniël Bouman

geboren op 5 september 1973
te Nieuw-Lekkerland

Promotor:

prof. dr. A.J.W. Scheurink

Beoordelingscommissie:

prof. dr. P.G.M. Luiten

prof. dr. G.J. ter Horst

prof. dr. R.J. Vonk

ISBN: 978-90-367-3720-3 (printed version)

Counterregulation to acute and recurrent hypoglycemia in rats

Tegenregulatie op enkelstaande en herhaalde hypoglycemie in ratten

Stephan D. Bouman

The experiments, the presenting of the results at scientific conferences, and the printing of the thesis have been generously supported by:

Dutch Diabetes Research Foundation

European Association for the Study of Diabetes

Center for Behavioral and Cognitive Neurosciences

Insulin Pharmacology, Novo Nordisk A/S

University of Groningen

The studies have been performed at the Department of Animal Physiology, University of Groningen, The Netherlands, and at the Department of Animal Sciences, University of Illinois at Urbana-Champaign, USA.

Printed by Reprocenter, University of Copenhagen, Denmark.

*From the moment I picked it up until I laid it down,
I was convulsed with laughter.
Some day I intend reading it.
- Groucho Marx*

Table of contents

Nederlandse samenvatting.....	vii
English summary	ix
Abbreviations and definitions.....	xi
Chapter 1 General introduction	3
Glucose homeostasis	3
Diabetes and hypoglycemia.....	4
Counterregulation to hypoglycemia.....	5
Recurrent hypoglycemia and hypoglycemia unawareness.....	6
Counterregulation to acute and recurrent hypoglycemia in rats.....	6
References.....	7
Section I – Counterregulation, insulin, and the nutritional state	13
Chapter 2 Insulin levels and fasting independently co-determine the counterregulatory responses to hypoglycemia.....	17
Introduction.....	17
Methods	18
Animals and surgery	18
Experimental design.....	18
Analysis.....	19
Results.....	19
Experiment 1 – Insulin-induced hypoglycemia in fed rats.....	19
Experiment 2 – Insulin-induced hypoglycemia in fasted rats.....	23
Discussion.....	24
Glucose and insulin are independent moderators of the counterregulatory responses.....	25
Fasting enhances all counterregulatory responses	28
Summary	29
References.....	31
Chapter 3 Inhibition of fatty acid oxidation strongly potentiates the counterregulatory responses to insulin-induced hypoglycemia.....	37
Introduction.....	37
Methods	38
Animals and surgery	38
Experimental design.....	38
Determinations and analysis	39
Results.....	39
Discussion.....	41
References.....	43
Section II – Central nervous mechanisms.....	47
Chapter 4 Noradrenergic and GABAergic systems in the medial hypothalamus are activated during hypoglycemia	51
The ventral hypothalamus	51
Research design and methods	52
Surgical procedures	52
Sample collection	53
Effect of insulin-induced hypoglycemia on NE and GABA.....	53
Sample analysis	54

Data analysis.....	54
Supplies.....	55
Results.....	55
Discussion.....	58
Perspectives.....	61
References.....	61
Chapter 5 Blockade of paraventricular hypothalamic alpha-adrenoceptors impairs the counterregulation to hypoglycemia	67
Introduction.....	67
Methods.....	68
Animals and surgery.....	68
Experimental design.....	68
Analysis.....	69
Results.....	70
Discussion.....	72
References.....	73
Section III – Recurrent hypoglycemia	77
Chapter 6 Hypoglycemia-Associated Autonomic Failure in rats	81
Introduction.....	81
Methods.....	82
Animals and surgery.....	82
General protocol.....	82
Specific protocols.....	83
Results.....	84
Experiment 1 – One antecedent hypoglycemic episode.....	84
Experiment 2 – A higher insulin dose.....	86
Experiment 3 – Three times a hypo.....	86
Experiment 4 – Food intake and nutrient preference.....	87
Experiment 5 – GAAF.....	89
Discussion.....	90
References.....	92
Chapter 7 General discussion.....	99
Section I – Counterregulation, insulin, and the nutritional state.....	99
Insulin.....	99
The nutritional state.....	101
Section II – Central nervous mechanisms.....	102
Activation of noradrenergic pathways.....	102
Blockade of noradrenergic pathways.....	103
Section III – Recurrent hypoglycemia.....	104
Rat model for HAAF.....	104
HAAF is GAAF?.....	105
Conclusions and perspective.....	105
References.....	106
Author's papers and published abstracts	112
Dankwoord	114
