Ever since I moved to the Netherlands to pursue my research in health psychology, I had the opportunity to share my professional and personal experience with some valuable and inspiring persons. Without their contribution and their support, this project would have probably never reached its end. For this reason I would like to express my sincere gratitude to all the people who have professionally and personally contributed to the achievement of my PhD.

First I would like to thank my promoter and supervisor Professor Robbert Sanderman for his guidance and for offering me the possibility to work on this project. I am also grateful to Professor Adelita Ranchor for her contribution and her advices along a big part of the PhD trajectory.

I would like to mention all the other persons who have collaborated to the different studies presented in this thesis. Dr. Jolanda Tuintstra, who helped to define the lines for the first research, also thanks for your kind coaching during my first year as a PhD student. Dr. Eric van Sonderen, I really appreciated your curiosity for my project and your help during the development of model of adaptation for cancer patients. Thanks to Prof. Ruud Kempen; although we worked on distance, your feedback was always punctual and your competence on the GLAS has been crucial for the good outcomes of this study. I am also grateful to Prof. Tiny Jaarsma for her enthusiasm and the stimulating participation to the research based on the COACH study. Thanks to Dr. Ellen van Jaarsveld for her help in selecting the samples from the GLAS database. I am also grateful to Ellen and Bastiaan for their friendship along all these years. Thanks to Dr. Mariët Hagedoorn for her encouragement to finish my project. To Dr. Roy Stewart thanks for his statistical advices and “interactive” teachings.

I am also grateful to the members of the reading committee Prof. Tineke Oldehinkel, Prof. Johan Groothoof and Prof Jim Coyne for their accurate evaluation of this thesis.

I would like to show my gratitude to the other people who have helped to complete my thesis and collaborated to prepare all the steps needed to reach my
promotion. Thanks to Truus van Ittersum for her help with the literature, and for responding with a smile every time I was going to her with a problem. Also thanks to Tinneke van der Wees and Renate Kroese for taking care of all the administrative issues with such a great patience and dedication.

I would like to mention all the other students, researchers and friends that I have met in the SHARE group during my PhD experience. Thanks to Inge Henselmans, Anke de Jong, Nynke Holwerda and Gemma Maters for your help with the Dutch translation of the summary. Alexandra, Inge, Lihua, Torben Joke, Marike and Tessa, thank you for your support and friendship. Multumesc Alexandra for being my “third paranymph and helping with the organization of the PhD. Thanks also to Mariska, Corinne, Daniela, Nardi, Grieteke, Maria, Marlijn, Jasperine, Maja, Sijrike, Ans, Rosemarie, Joost, Jelte, Marga, Caroline and Jetse for sharing part of this experience with me. I include in the list also Mario and Anna, thanks for bringing some Latin chaotic-warm atmosphere to the “structured” Dutch working environment. To Doretta Caramaschi grazie for all your support and help during the preparation of the ceremony.

My gratitude goes also to the friends of the 4th floor. Mare Knibbe I enjoyed the cosy tea-breaks in your office as a remedy for the stressful moments of my PhD. Catarina Rodrigues and Juliet (Gypsy) Foster, what can I say? You have been my “guardian angels”, I am so thankful for keeping your doors and hearts open any time I needed the support of a real friend.

I really owe this promotion to the great contribution of my two paranymphs. Torben, thanks for volunteering in this “mission impossible”, without any hesitation. Tim, I will be indebt with you for the rest of my life, considering the hundreds of pages that you have revised for me during the all PhD trajectory, thank you so much.

I would like to send my gratitude to the people of the department of developmental psychology of the University of Turin, particularly to Prof. Silvia Ciairano. Yes Silvia it is mainly your responsibility. I first came to the Netherlands
to collaborate on the project on risk behaviour in adolescence, which you
developed in collaboration with the department of developmental and clinical
psychology at the University of Groningen. I would also like to express my
gratitude to Prof. Silvia Bonino, and Dr. Roberta Molinar who followed with
interest the development of my research.
As a member of the P&H institute, I had the opportunity to meet some interesting
people around the Netherlands. I would particularly like to mention Bart Thoelen
Wendy Hardeman and Hans Feenstra, with whom I shared my courses, my
friendship and few beers.
Thanks to Saskia Harmsen-Kent for helping me to overcome some very difficult
moments. Thanks to Ester, Francesco, Irene, Louis, Kristin, Teresa, Margot,
Vincenzo, Jens, Juriaan, Ana, Marthe, Kana, Robin, Carlijn and all the other friends
in Groningen and surrounding for making my long staying in this city so
enjoyable.
I would like to spend some words for all the friends in Italy who followed with
curiosity my adventure in the Netherlands. Grazie a Francesca, Simona, Ivo,
Gianluca, Coco, Elena, Dario, Giuliano, Chiara, Mariateresa, Lorenzo, Emiliano,
Lidia, Maura, Eva, Barbara e tutti gli altri amici che purtroppo vedo raramente ma
di cui non mi dimentico.
Most importantly my appreciation goes to my family. Despite the long distance I
have never felt so close to them as during these last years.
Desidero esprimere tutta la mia gratitudine alla mia famiglia. Ai miei genitori:
mamma Elide e papà Lorenzo. Il vostro supporto e la vostra fiducia incondizionata
sono stati “la benzina” che mi ha permesso di perseverare nel mio lavoro e portare
a termine questo dottorato. Grazie per avermi dimostrato che si può essere molto
vicini nonostante i chilometri e che l’affetto di un genitore non è limitato dalla
distanza o dagli eventi. Vi sono infinitamente grato per tutto quello che avete fatto
per me, per questo desidero dedicare il mio lavoro principalmente a voi.
Voglio inoltre ringraziare mio zio Luciano e mia zia Nicoletta. Anche se non siete riusciti a venire a Groningen per la mia promozione so che seguite sempre con interesse il mio lavoro e i miei spostamenti. Grazie per tutto il sostegno e l’affetto che mi avete dimostrato in questi anni, che mi hanno aiutato a portare a termine questo progetto. 
La distanza e il tempo hanno consolidato il legame con mia sorella Paola, che voglio ringraziare per la sua attenzione e premura durante tutti questi anni. Grazie anche a Fabrizio ed al piccolo Gabriele che sento sempre presente nella mia vita. Un grazie a mia cugina Emanuela che mi segue ovunque io vada e rimane un importante punto di riferimento per me. Allo stesso modo ringrazio zia Lidia, Roberto e Tania per l’incredibile sostegno in tutti questi anni. Finally I would like to thank the person who joined me in this adventure from the real beginning and is still next to me in the journey of life. Ilir, Kjo eksperience e gjate nuk do te kishte pasur te njehten domethenie ne qofte se nuk do te ishe ti. Te falenderoj per gjithe vitet qe ndave me mua ne Groningen.
My last aknowledgement is for the patients who participated to the GLAS and COACH study. Without their contribution this project would have never existed.
