Before I arrived in Groningen, my husband did not think I could stay here longer than two months based on my poor oral and written English. Three years passed and I like the city more and more because the people here are always hospitable and helpful. The hospital provided a good research and study environment for me and I would like to thank all the people for helping me finish this thesis.

I would like to thank my promoter, Prof.dr. Kluin, for giving me such a valuable opportunity to do the PhD study in the UMCG. Your hard work and humility impressed me so much. You read my manuscripts quickly and focused on all the details. I am amazed by your quick learning about the new knowledge even with your busy diagnostic work. Your attitude to work and learning impact me very much.

My utmost thanks to my copromotor, Dr. Lydia Visser. Without you, I do not think I can finish my thesis smoothly. You let me feel at home to stay in the Netherlands. How can I express my gratitude to you with my poor English? You help me so much in life and work. You are the first Dutch person who can understand my oral English. You inspire me how to do research and were not just teaching me. You encouraged me to do the project independently. No matter what kinds of difficulties I met, I am always sure that Lydia can help me. I am looking forward to seeing you in Beijing. Please also let me help you a bit!

Dr. Anke van den Berg, I feel lucky that I can do research under your direction. Without your patience and suggestions, I could not have finished my first English article. You inspired me how to organize, analyze and write the article. Your organization and analysis ability impressed a lot.

Dr. Stefano Rosati, how can I forget that you pick me up in the Schiphol Airport three years ago? You are always kind and nice. Thank you very much for your patience and suggestions during my whole stay.

Prof. Dr. S. Poppema, Prof. Dr. M. P. Peppelenbosch and Prof. Dr S. T. Pals, I appreciated very much that you accepted to be a member of the reading committee of my thesis.

During the three years, I had so many nice colleagues. Çiğdem Atayar, you really impressed me with your talent in research and your strong personality. Your daughter is a pretty girl and I like her very much. Luping, it is lucky for me to be your roommate. Even you are from Malaysia, you can speak Chinese. We are good friends and can talk freely about everything. You help me a lot with the microRNA studies and I am proud you want to be my paranimf. Johan Gibcus, you are nice and like to encourage the people around you. Your patience to your students impressed me so much. Thank you veru much for your help with the design and printing of my thesis. Mirjam Boelens, thank you very much for giving me all the information for the graduation. Joost Kluiver, we were roommates in 2005, then after 2 years, you are back from America and we are roommates again. You are always patient in answering my
questions about research. You always say, if you do not understand; I can explain again. Renata Rust, you have such a lovely personality. You are always considerate for others. Do you know when I take the analysis course, the teacher asked me if I am your roommate. Because of your suggestions, the course is changed into English. I still have a warm feeling about that now. Liqiang Qi and Chuanhui Xu, it is really a small world right? We can meet here in Groningen. Good luck with your projects. Meet you all in China. Jan Lukas Robertus, I will always remember your sense of humor, your hard work and encouragement. It is my pleasure that I can work together with you. Luckily, you are one of my paranimfen. I really appreciated your help. By the way, your girl friend, Pauline, is also a very nice girl. I liked her very much and her hospitality really made me feel at home.

I like the friendly environment in the O&O lab. Wenjiao Zeng and Chen Cheng, I really learned a lot from you all about western blot. Thanks a lot for the experiment experience you shared with me. Marjan Luinge, you like to work so much. When you are free, you always ask me: if I can do something for you just let me know. Hans, you are so patient to culture so many cell lines for me. I also want to thank all the people working in the lab. I always feel free to ask questions and share my results with you all. It is nice to work and chat in the lab with you all, which make the daily work more exciting and cheerful.

The strict rules of the DNA lab impressed me so much. Before I am allowed to work in this lab, Ed Schuuring patiently introduced me to a lot of things about molecular work that I need to pay attention to. Geert Harms, Tjasso Blokzijl, Klaas Kooistra, Rikst Nynke Schakel, thank you very much for teaching me do experiments.

I deeply appreciated all the help from my coauthors. Kaushal Parikh, you are really a nice boy and you help me so much with the kinome profiling study. I want to thank the help from Erasmus Medical Center, Department of Hematology, Rotterdam. M Dijkstra, K van Lom, Mojca Jongen-Lavrencic, although I never met you, I always feel gratitude for your help. I also would like to thank the Department of Hematology at the UMCG.

I got so much help and shared so much happiness together with my Chinese friends in Groningen. Fan Chunyan, I met you on the first day I arrived in Groningen. You are always like a sister to me. You showed me around the city and help me find a new house. I go to your house and play with your daughter, which all makes me feel like at home. I admire that you have such a pretty and clever daughter. Ding Ning, Li Xiao Ning, Wang Qiu Ju, Ren Yong Qing, Zhao Bo, it was so nice to meet you all.

Prof. Zifen Gao, I became your master student in 2001. Under your direction, I learned the basic knowledge about lymphoma and research. Without you, I could not have come to study in Groningen and got the position in Capital Medical University of Beijing. You also make the laboratory like a family. How can I forget the people in the lab, Liu Cuiling, Li Min, Li Ning, Li Jie, Liu Kan, Huang Xin, Dong Gehong and Gong Li Ping. Huang Xin, I am sure that you will have a nice life in Groningen and I will see you soon in Beijing.
Dr. Gong Liping, thanks a lot for your recommendation for the Capital Medical University position. You have given me so many help since I knew you during my master study. Your hard work impressed me so much. Now you are also a very successful master supervisor and have a good molecular diagnostic laboratory. Nice to meet your students and they are all nice girls. They all did good experiments and wrote good articles. Prof. Dai Jie, thanks a lot for providing me the valuable opportunity to be a young staff member in the pathology department of Capital Medical University. Your kindness impressed me very much and let me look forward to joining your group soon.

Prof. Ming Qing Du, without your help, I could have not come to study in Groningen. I appreciate your help and concern very much. You also have a wonderful laboratory, especially with a group of good teamwork people, Dr. Hongxiang Liu, Dr. Hongtao Ye et al. They are nice people and I can imagine how cheerful and helpful the atmosphere in your laboratory must be. Dong Gehong, I really spent a wonderful time in Cambridge. You have a very nice personality. Your hospitality and hard work impressed me very much.

Finally, I want to thank my family, my parents, my husband, my sisters and brother. My parents, thanks a lot for the long time you supported me. I can imagine how difficult it must be for you to support me to study and help me bring up my daughter. Thanks a lot to my sisters and brother for helping me care for my daughter. Liu Jiang, thanks a lot for your support of three years study abroad.

执子之手，与子偕老。 (Hold your hand, grow old together.) This is my favorite sentence about the love and marriage. I like to share with you all and all best wishes to you!

1. Scabourough Fair is a book published about two thousand years ago. It includes 305 poets which are about several aspects things, such as labour work, war, love and marriage.
Future plans:

The pathology department of Capital medical University (Beijing) provided a young staff position for Miao Wang. She will get her pathology diagnosis training there.

Welcome Beijing, China!
