**Stress responses and sugar metabolism
in *Bacillus subtilis*: a transcriptomic portrait**

Andrzej Lulko

Marcie i dzieciom ...

The work described in this thesis was carried out in the Molecular Genetics research group of the Groningen Biomolecular Sciences and Biotechnology Institute (Faculty of Mathematics and Natural Sciences, University of Groningen) and was financially supported by the grant IGE01018 of the Innovation Oriented Research Programme on Genomics (IOP Genomics) of the Dutch Ministry of Economic Affairs.

This thesis was printed by IpskampDrukkers with financial support of the Groningen Biomolecular Sciences and Biotechnology Institute (GBB).

ISBN 978-90-367-4693-9 (printed version)

ISBN 978-90-367-4694-6 (digital version)

Cover was designed by the author. The image of *B. subtilis* DNA microarray was provided by Siger Holsappel.

RIJKSUNIVERSITEIT GRONINGEN

Stress responses and sugar metabolism
in *Bacillus subtilis*: a transcriptomic portrait

Proefschrift

ter verkrijging van het doctoraat in de
Wiskunde en Natuurwetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de
Rector Magnificus, dr. F. Zwarts,
in het openbaar te verdedigen op
vrijdag 7 januari 2011
om 14.45 uur

door

Andrzej Tadeusz Lulko

geboren op 5 april 1977
te Wrocław, Polen

Promotor: Prof. dr. O.P. Kuipers

Copromotor: Dr. G. Buist

Beoordelingscommissie: Prof. dr. T. Abee
Prof. dr. J. M. van Dijl
Prof. dr. M. Kleerebezem

Contents

Chapter 1	
General introduction and scope of the thesis	7
Chapter 2	
DNA microarrays: experimental issues and their application in <i>Bacillus subtilis</i> gene expression profiling	21
Chapter 3	
Production and secretion stress caused by overexpression of heterologous α -amylase leads to inhibition of sporulation and a prolonged motile phase in <i>Bacillus subtilis</i>	39
Chapter 4	
Mild and severe challenges with lactic acid trigger totally different regulatory responses in <i>Bacillus subtilis</i> .	63
Chapter 5	
Transcriptome analysis of temporal regulation of carbon-metabolism by CcpA in <i>Bacillus subtilis</i> reveals additional target genes	93
Chapter 6	
Regulon definition of CcpA mutants with altered activities in <i>Bacillus subtilis</i>	115
Chapter 7	
Summary and general discussion	131
Nederlandse samenvatting	141
Streszczenie dla laików	147
References	155
Afterword and acknowledgements	171
