Publications
Publications in peerreviewed international journals

- Boshuisen ML, Den Boer JA. Zolmitriptan (a 5-HT1B/1D receptor agonist with central action) does not increase symptoms in obsessive compulsive disorder. Psychopharmacology. 2000;152:74-79.

Abstracts/Presentations

- Voorjaarscongres Nederlandse Vereniging voor Psychiatrie, Rotterdam, 4-6 april 2001, abstract/posterpresentation. Veranderingen in rCBF van paniekstoornis patiënten na effectieve behandeling met sertraline. Boshuisen, ML, Paans, AMJ, den Boer, JA.
• Voorjaarscongres Nederlandse Vereniging voor Psychiatrie, Rotterdam, 4-6 april 2001, abstract/posterpresentation. Zichtbaar paniek? Boshuisen, ML, Reinders, AATS, Paans, AMJ, den Boer, JA.
• Endeoneuromeeting, Doorwerth, 5-6 juni 2001, abstract/posterpresentation. rCBF in panic disorder patients and controls in rest and during a pentagastrin induced panic attack. Boshuisen, ML, Reinders, AATS, ter Horst, GJ, den Boer, JA.
• Endeoneuromeeting, Doorwerth, 5-6 juni 2001, abstract/posterpresentation. Changes in rCBF of panic disorder patients due to effective treatment with sertraline. Boshuisen, ML, ter Horst, GJ, den Boer, JA.
• Human Brain Mapping, 10-14 june 2001, Brighton, Great Britain, abstract/posterpresentation. rCBF in panic disorder patients and controls in rest and during a pentagastrin induced panic attack. Boshuisen, ML, Reinders, AATS, ter Horst, GJ, den Boer, JA.
• World Congress of Biological Psychiatry, 1-5 july 2001, Berlin, Germany, abstract/oral presentation. rCBF in panic disorder patients and controls during pentagastrin induced panic and in rest. Boshuisen, ML, ter Horst, GJ, den Boer, JA.
• World Congress of Biological Psychiatry, 1-5 july 2001, Berlin, Germany, abstract/oral presentation. Changes in rCBF of panic disorder patients due to effective treatment with sertraline. Boshuisen, ML, ter Horst, GJ, den Boer, JA.
• Congress of European Association of Neuropsychopharmacology, october 2001, Istanbul, Turkey, abstract. Pentagastrin induced panic is not significantly different from spontaneous panic attacks. Boshuisen, ML, ter Horst, GJ, den Boer, JA.
• WetensAPdag Nederlandse Vereniging voor Psychiatrie, 2 november 2001, abstract/oral presentation. Paniek in de PET scan. Boshuisen, ML.
Fig. 2-1
Regions more activated (red) or deactivated (green) in PD patients compared to control subjects during anticipatory anxiety. The darker the color the more superficial the areas are located.
Fig. 2-2
Regions more activated (red) or deactivated (green) in PD patients compared to control subjects in rest, after a pentagastrin challenge. The darker the color the more superficial the areas are located.
Fig. 2-3
Deactivation of the amygdala during anticipatory anxiety in PD patients compared to control subjects.

Fig. 2-4
Activation of the anterior cingulate cortex during anticipatory anxiety in PD patients compared to control subjects.

Fig. 3-4: Activation of the amygdala in control subjects (N=21) but not in PD patients (N=16) during pentagastrin administration; for the corresponding Talairach coordinates see table 2.
Fig. 3-3: rCBF differences during pentagastrin challenge, PD patients (N=16) compared with healthy control subjects (N=21); relative increases in rCBF during pentagastrin in patients compared to control subjects are shown in red, relative decreases in rCBF during pentagastrin in patients compared to control subjects are shown in green (the corresponding coordinates of the peak voxels are shown in table 2)
Fig. 4-3: rCBF differences during pentagastrin challenge pretreatment versus posttreatment, 6 PD patients; relative decreases in rCBF during pentagastrin challenge posttreatment compared to pretreatment are shown in red, relative increases in rCBF during pentagastrin challenge posttreatment compared to pretreatment are shown in green (the corresponding coordinates of the peak voxels are shown in table 2).
