Alhamdulillah! Finally I have finished my thesis! However, the completion of my thesis would not have been possible without the assistance of many people who gave their support in different ways. I cannot recall how many times I said “thank you” during these extraordinary 4 years. To these people I would like to express my gratitude and sincere appreciation. These people include not only the academics, but also my colleagues and friends who have shared my experiences in Groningen during the last four years.

First of all I would like to thank my promotors and my supervisors: Prof. Lolkje de Jong-van den Berg and Prof. Paul de Jong, for giving me a chance to do this research at the University of Groningen. It has been excellent opportunity for me and I have experienced much. I also would like to thank you both for your suggestions, constructive criticism, and incredible patience to guide me through my research. I have learned a lot from you. Both of you are my inspiration, not only in the academic and research fields, but also in your leadership and entrepreneurship. I hope our collaboration will continue in the future.

I would like also to give my deepest gratitude to my co-promotor, Prof. Maarten J. Postma. I learned many things from you, not only about pharmaco-economics, but also the way you handle the practical problems. You are an excellent teacher, easy-going and you made me feel relaxed when I discussed a problem that I had. You found solutions to any of my problems easily. Thank you so much for your support. Special thanks to my other co-promotor, Ron T. Gansevoort, there are no words to describe my gratitude for your help during the years of my study, especially the last two years. Your frequent constructive criticism and endless remarks were sometimes hard to handle, but at the end always resulted in fruitful discussions with healthy outcomes. You always gave smart solutions for any methodological or practical problems that I had during my research. This has made a great impression on me.

I would also like to thank the members of the reading committee, Prof. Jack Wetzels, Prof. Hugo Robays, Prof. Ronald Stolk for the careful reading of my thesis and your valuable remarks and suggestions. In addition, I wish to thank the people of the GUIDE office, especially to Riekje and Maaike for doing so many things for me. My warm gratitude also to Annete Korringa for arranging many administrative things for me, especially for residence permit.

My appreciation goes to my colleagues and my roommates, Adrianne, Willemijn, Fokaline, Susanne and Rogier, for making the years such a great experience. It has not been easy to live abroad and be so far away from my family,
however, all of you make me feel at home and this has made it much easier for me to live in Groningen.
