Chapter 10

Reference list

Reference list

Chapter 10

SecD and SecF play an important role in SecDF functioning. 33

Translocation across the cytoplasmic membrane of proteins regulated by the temperature.

Aureocin A70, a multi-peptide bacteriocin isolated from direct involvement and important function of SecG in the protein translocation of Enterococcus faecalis signal peptides and prediction of their cleavage sites.

Calcium promotes sorting signal binding by altering the mobility and structure of an active site loop.

Vancomycin-intermediate resistance.

Analysis of aureocin A53, a new, atypical bacteriocin from Staphylococcus aureus.

Chapter 10

Ronen, M., Rosenberg, R., Shraiman, B.I., and Alon, U.

Chapter 10

“I only got seventh-grade education, but I have a doctorate in funk and I like to put that to good use”

-James J. Brown-
