 groningen**

The author thanks the University of Groningen for the financial support through an Ubbo Emmius Scholarship.

RIJKSUNIVERSITEIT GRONINGEN

Starch Modifications in Supercritical CO₂

Proefschrift

ter verkrijging van het doctoraat in de
Wiskunde en Natuurwetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de
Rector Magnificus, dr. F. Zwarts,
in het openbaar te verdedigen op
vrijdag 21 mei 2010
om 13.15 uur

door

Henry Muljana
geboren op 20 december 1975
te Bandung, Indonesië

Promotores : Prof. dr. ir. L.P.B.M. Janssen
Prof. dr. ir. H.J. Heeres
Prof. dr. F. Picchioni

Beoordelingscommissie : Prof. dr. A.A. Broekhuis
Prof. dr. L. Moscicki
Prof. dr. K.U. Loos

ISBN : 978-90-367-4359-4

ISBN : 978-90-367-4358-7 (electronic version)

Table of Content

1. Introduction

1.1 Introduction	2
1.2 Starch and derivatives	4
1.2.1 The production and processing of starch	4
1.2.2 Structure and properties of starch	7
1.2.2.1 Molecular level	7
1.2.2.2 Granular Level	8
1.2.2.3 Important starch properties	10
1.2.3 Starch modification by chemical reactions	10
1.2.3.1 Starch esterification	11
1.2.3.2 Starch etherification	12
1.2.3.3 Cross-linking of starch	13
1.3 Properties and applications of supercritical carbon dioxide (scCO ₂)	14
1.3.1 Properties of supercritical carbon dioxide (scCO ₂)	14
1.3.2 An overview of the use of scCO ₂ as a solvent	16
1.3.2.1 The use of scCO ₂ as a solvent for chemical synthesis	16
1.3.2.2 The applications of scCO ₂ as a solvent for polymerization and polymer processing	17
1.4 Thesis Outline	19
References	20

2. Green Starch Conversions : Studies on Starch Acetylation in Densified CO₂

2.1 Introduction	28
2.2 Materials and Methods	29
2.2.1 Materials	29
2.2.2 Reactor setup	30
2.2.3 Experimental procedure for the acetylation of starch	30
2.2.3.1 Reaction in densified CO ₂	30
2.2.3.2 Reaction in water	30
2.2.4 Analytical equipment	31
2.2.5 Determination of the degree of substitution (DS)	31

2.2.5.1 Hydrolysis method	31
2.2.5.2 ¹ H-NMR method	32
2.2.5.3 Comparison between the hydrolysis and 1H-NMR method	32
2.2.6 Determination of total AAH conversion (X_{AAH}) and product selectivity (S_{SA})	33
2.3 Results and Discussion	33
2.3.1 Screening Experiments	33
2.3.2 Systematic Studies	36
2.3.2.1 Temperature effects on reaction performance	37
2.3.2.2 Pressure effects on reaction performance	39
2.3.2.3 The effect of water intake on reaction performance	40
2.3.2.4 The effect of acetic anhydride (AAH) intake on reaction performance	42
2.3.2.5 The effect of catalyst intake on reaction performance	42
2.3.2.6 Quantification of the effects of process conditions on reaction performance using empirical models	43
2.4 Conclusions	46
Acknowledgements	46
References	46
3. Insights in Starch Acetylation Reactions in Sub- and Supercritical Carbon Dioxide	
3.1 Introduction	50
3.2 Materials and Methods	51
3.2.1 Materials	51
3.2.2 Experimental set-ups	51
3.2.3 Experimental Procedure	53
3.2.3.1 Starch acetylation reactions in scCO ₂	53
3.2.3.2 Phase behavior studies	53
3.2.4 Analytical equipment	54
3.2.5 Determination of the product DS	54
3.2.6 Determination of total AAH conversion (X_{AAH}) and product selectivity (S_{SA})	54
3.3 Results and Discussions	55

3.3.1	Screening experiments	55
3.3.2	Discussion	58
3.3.2.1	Phase behavior of the CO ₂ /AAH/starch mixture as a function of temperature and pressure	58
3.3.2.2	Acetylation reactions using starch samples with different particle sizes	60
3.3.2.3	The effect of pressure and temperature on the starch acetylation reaction	61
3.4	Conclusions	64
	Acknowledgements	64
	References	64

4. Process-Product Studies on Starch Acetylation Reactions in Pressurised Carbon Dioxide

4.1	Introduction	68
4.2	Materials and Methods	69
4.2.1	Materials	69
4.2.2	Experimental set-ups	69
4.2.3	Experimental Section	70
4.2.3.1	Starch acetylation reactions in scCO ₂	70
4.2.4	Analytical equipment	71
4.2.5	Determination of the product DS	71
4.2.6	Determination of total AAH conversion (X_{AAH}) and product selectivity (S_{SA})	72
4.2.7	Statistical modeling	72
4.3	Results and Discussion	72
4.3.1	Catalyst screening experiments	74
4.3.2	Systematic studies on the acetylation of starch in pressurised CO ₂	74
4.3.3	Product properties	79
4.4	Conclusions	83
	Acknowledgements	83
	References	83

5. Synthesis of Fatty Acid Starch Esters in Supercritical Carbon Dioxide	
5.1 Introduction	88
5.2 Materials and Methods	89
5.2.1 Materials	89
5.2.2 Experimental set-up	90
5.2.3 Experimental Procedure	90
5.2.4 Analytical Equipment	91
5.2.5 Determination of the DS of the products	91
5.3 Results and Discussion	92
5.3.1 Exploratory experiments	92
5.3.2 Product characterization	92
5.3.2.1 FT-IR analyses	92
5.3.2.2 ¹ H-NMR analyses	93
5.3.3 Systematic studies	94
5.3.3.1 The effect of process conditions on the product DS for the esterification of starch with vinyl laurate	95
5.3.3.2 Effects of the type of fatty acid derivative (ester/anhydrides) on the esterification reaction	97
5.3.3.3 Catalyst screening	99
5.3.4 Product properties	101
5.4 Conclusions	104
Acknowledgements	105
References	105
6. Supercritical Carbon Dioxide (scCO₂) Induced Gelatinization of Potato Starch	
6.1 Introduction	110
6.2 Materials and Methods	112
6.2.1 Materials	112
6.2.2 Apparatus	112
6.2.3 Experimental Procedures	113
6.2.3.1 Fourier Transform Infrared (FT-IR) experiments	113
6.2.3.2 High pressure batch experiments	113
6.2.4 Analytical equipments	114
6.2.5 Thermodynamic modelling of the DG	115

6.3. Results and Discussions	115
6.3.1 Effect of temperature and pressure on potato starch gelatinization	115
6.3.2 X-ray diffraction (XRD) analysis	120
6.3.3 Morphology of the starch granules	121
6.3.4 Thermodynamic modeling	122
6.4 Conclusions	124
Acknowledgements	125
References	125

7. Experimental and Modelling Studies on the Solubility of Sub- and Supercritical Carbon Dioxide (scCO₂) in Potato Starch and Derivatives

7.1 Introduction	130
7.2 Materials and Methods	131
7.2.1 Materials	131
7.2.2 Experimental set-ups	131
7.2.3 Experimental procedures	132
7.2.3.1 Preparation of potato starch acetate	132
7.2.3.2 Sorption experiments	132
7.2.3.3 Fourier Transform Infrared (FT-IR) experiments	133
7.2.4 Solubility modelling using the Sanchez-Lacombe equation of state (S-L-EOS)	134
7.3 Results and Discussions	137
7.3.1 The effect of temperature and pressure on CO ₂ solubility in native potato starch (NPS)	138
7.3.2 The effect of temperature and pressure on CO ₂ solubility in potato starch acetate (SA)	141
7.3.3 In-situ FT-IR studies	142
7.3.4 Modelling of CO ₂ sorption in NPS and SA using the S-L EOS model	144
7.4 Conclusions	145
Acknowledgements	145
References	146
