# Contents

---

<b>1 General introduction</b>	1
<b>2 Age-related changes in learning and memory in rats, assessed in the Morris water escape task</b>	15
● 2.1 Effects of age on Morris water escape behavior of outbred Wistar, hybrid Fischer 344*Brown Norway, and inbred Fischer 344 rats	21
● 2.2 Effects of age on the acquisition of a standard Morris task and of a repeated acquisition task in Wistar rats	37
● 2.3 Longitudinal assessment of spatial discrimination performance of aged rats in the Morris water escape task	51
● 2.4 Shift in the performance of 24-month-old Wistar rats in the Morris water escape task: a comparison across thirty-six experiments	61
● 2.5 Age-related changes in learning and memory in rats, assessed with the Morris water escape task: discussion and conclusions	75
<b>3 Behavioral consequences of lesioning the nucleus basalis magnocellularis (nbm) in rats</b>	81
● 3.1 Bilateral lesioning of the nbm in rats: effects on spatial discrimination in the holeboard	87
● 3.2 Effects of bilateral ibotenic acid lesions of the nbm on the performance of rats in a seven-choice problem in a radial alley maze	101
● 3.3 Behavioral effects of bilateral lesions of the nbm, induced by ibotenic acid, in young adult and old Wistar rats	121
● 3.4 Behavioral consequences of lesioning the nucleus basalis magnocellularis (nbm) in rats: discussion and conclusions	139
<b>4 Behavioral effects of stroke induced by occlusion of the middle cerebral artery (MCA) in rodents</b>	145
● 4.1 Sensorimotor impairments in Wistar Kyoto rats with cerebral infarction, induced by unilateral occlusion of the MCA: recovery of function	151
● 4.2 Sensorimotor impairments in rats with cerebral infarction, induced by unilateral occlusion of the MCA: strain differences and effects of the occlusion site	165
● 4.3 Unilateral middle cerebral artery occlusion does not affect water-escape behavior of CFW1 mice	183
● 4.4 Repeated acquisition of a spatial navigation task in mice: effects of spacing of trials and of unilateral middle cerebral artery occlusion	193
● 4.5 Behavioral effects of stroke, induced by occlusion of the middle cerebral artery (MCA) in rodents: discussion and conclusions	205
<b>5 The study of behavioral dysfunctions using animal models: summary, conclusions, and recommendations for future research</b>	211

<b>6 Appendices</b>	249
● 6.1 Calculation of the measure 'choice correspondence of reinforced visits' in the spatial holeboard discrimination task.	251
● 6.2 Effects of age on the acquisition of a seven-choice task in a radial alley maze in rats	255
● 6.3 Effects of nucleus basalis lesions on proactive and retroactive errors in a seven-choice task in a radial alley maze	257
● 6.4 Is there recovery of cortical cholinergic activity in young and aged rats after bilateral lesioning of the nucleus basalis magnocellularis?	261
● 6.5 Acknowledgments	265
● 6.6 Publications	267
● 6.7 Abbreviations used	271
<b>7 References</b>	273
