# Contents

---

<b>Chapter 1 Introduction</b>	<b>7</b>
1.1 Hypotheses of affective disorders	9
1.1.1 The monoamine hypothesis	9
1.1.2 The HPA-axis hypothesis/stress induced dysfunction	12
1.1.3 Neuroplasticity hypothesis	15
1.2 Affective disorders and the immune system	18
1.3 Animal models of affective disorders	19
1.3.1 Animal models based on observations	20
1.3.2 Animal models based on etiology	20
1.4 Neuropeptides and affective disorders	22
1.4.1 Neuropeptides	22
1.5 Substance P	26
1.5.1 History of substance P	26
1.5.2 Biochemistry of substance P	27
1.5.3 Clinical targets of substance P	27
1.5.4 Substance P and pain	28
1.5.5 Substance P and affective disorders	28
1.5.6 Biological substrate for the antidepressant activity of NK <sub>1</sub> antagonists	29
1.6 Scope of the thesis	31
1.6.1 Outline of the thesis	32
1.7 Reference list:	34
<hr/>	
<b>Chapter 2 Effect of the Substance P (NK<sub>1</sub> receptor) antagonist L-760735 and clomipramine on endocrine and behavioral parameters</b>	<b>49</b>
2.1 Introduction	51
Animals, Materials and Methods	53
2.1.1 Animals	53
2.1.2 Drug administration	53
2.1.3 Experimental Design	53
2.1.4 Analysis of urinary cortisol and norepinephrine	55
2.1.5 Organ weights	55
2.1.6 Behavioral analysis	56
2.1.7 Data analysis	56

2.2 Results	57
2.2.1 Neuroendocrine parameters	57
2.2.2 Organ weights	60
2.2.3 Behavioral parameters	62
2.3 Discussion	67
2.3.1 The effect of clomipramine and L-760735 treatment on the stress induced activation of the HPA axis.	67
2.3.2 The effect of clomipramine and L-760735 treatment on the behavior of chronically stressed tree shrews.	68
2.4 Reference List	69

---

**Chapter 3 Substance P (NK<sub>1</sub>) receptor antagonist and clomipramine prevented stress-induced alterations in cerebral metabolites, cytogenesis in the dentate gyrus and hippocampal volume** **75**

3.1 Introduction	77
3.2 Materials and Methods	78
3.2.1 Animals, experimental procedure and drug treatment	78
3.2.2 Localized proton magnetic resonance spectroscopy (MRS)	80
3.2.3 Histological procedures	81
3.2.4 Data analysis	82
3.3 Results	83
3.3.1 Body weight as indicator of stress	83
3.3.2 Effect of drug treatment on cerebral metabolites	84
3.3.3 Chronic antidepressant treatment prevents stress-induced suppression of adult dentate cell proliferation	85
3.3.4 Stress-induced reduction of hippocampal volume is prevented by antidepressant treatment	87
Stress	87
3.4 Discussion	89
3.5 Conclusion	91
3.6 Reference list	93

---

**Chapter 4 The effects of antidepressants and an NK<sub>1</sub> antagonist on the proliferation of splenocytes in the tree-shrew chronic psychosocial stress model** **99**

4.1 Introduction	101
------------------	-----

4.2 Materials and Methods	103
4.2.1 Animals:	103
4.2.2 Drug treatment:	103
4.2.3 Experimental design	104
4.2.4 Analysis of urinary cortisol and noradrenaline.	105
4.2.5 Organ data	105
4.2.6 Proliferation data	105
4.2.7 Data analysis	106
4.3 Results	107
4.4 Discussion	112
4.5 Reference list	115

---

**Chapter 5 Divergent substance P-serotonin interactions in prefrontal cortex and ventral hippocampus of the guinea pig** **119**

5.1 Introduction	121
5.2 MATERIALS AND METHODS	123
5.2.1 Animals	123
5.2.2 Surgery	123
5.2.3 Experiments	123
5.2.4 Drug administration	124
5.2.5 Analysis	124
5.2.6 Statistical evaluation	125
5.3 Results	126
5.3.1 Prefrontal cortex	126
5.3.2 Ventral Hippocampus	129
5.4 Discussion and conclusions	133
5.5 Reference list	135

---

**Chapter 6 In vitro and in vivo evaluation of neuropeptide microdialysis in the brain of freely moving rats** **139**

6.1 Introduction	141
6.2 Materials and methods	144
6.2.1 <i>In vitro</i> experiment	144
6.2.2 <i>In vivo</i> experiment	145
6.2.3 Analysis	146

6.2.4 Data presentation	147
6.3 Results	148
6.4 Discussion	152

---

**Chapter 7 Comparison of RIA and LC-MS/MS for the determination of Substance P in brain microdialysates of freely moving animals** 159

7.1 Introduction	161
7.2 Materials and methods	164
7.2.1 Animals, Surgery and experiment	164
7.2.2 Analysis	165
7.2.3 Data presentation	166
7.3 Results:	167
7.3.1 Analysis method	167
7.3.2 Result of analysis method <i>in vivo</i>	168
7.3.3 <i>In vivo</i> experiments	170
7.4 Discussion	173
7.5 Reference List	175
