“Alles van waarde is weerloos” (“All that has value is defenseless”)
Lucebert 1974

Gratitude is what I feel while completing this work. Gratitude to all the people who somehow contributed to my development to reach this moment. Please if I do not mention you by name; accept my excuse for that.

It started with my very existence thanks to my parents Wim en Metje van Heest-Bikker who supported me always. With the unlimited solidarity of my brother Jos leading e.g. to our traveling together with his future wife Margreet in a deux-chevaux to Kaisersberg the place of birth of Albert Schweitzer.

Gratitude to my family, the brothers and sisters of my parents where I was always welcome. The sister of my mother, Tineke and her husband Kees de Geus who cared for me during the seven years that my parents worked in Indonesia. My puberty was not an easy time for them. Gratitude to my cousin Elies. We developed a sister-like bond we enjoy very much.

To Tante Gerry Hunink – my third mother as I always called her – with whom I found rest and I could laugh and share thoughts on difficult relational issues.

To school friends, Joke Vroegop from Broek op Langedijk, Ellen Valk now Abma from Moerkapelle; Jaap Boersma from Waddinxveen with whom I was related for five years. To study friends Germa Joppe, Jan Groot en Thea Kelderman. To Ineke van Mierlo who gave me a place to stay at a difficult moment in my life and with whom I shared the house for five years.

During the 4 years in Agogo, Ghana: Christian Kippenberg, Harry and Mieke Angeneind-Schaeffner, Jeltje van de Mei, Irene Senn en Margarit Krattiger, Stella Nyinah, Nana Enyimayew, Ed Ninepense, all the nurses and other workers in the hospital and the patients.

Mari Hoevenaars and Wout van Gelder who contributed much to my training as a GP.

The people I worked with in Dalen and in Schoonoord, colleagues, other health workers, patients.

All general practitioners and other doctors who consulted me and trusted me to share thoughts with me. Team members of palliative care teams in Drenthe thank you so much for the opportunity to work together and to
improve quality of care for the patients. Some colleagues supported me at stressful moments: Carolien van Leeuwen and Anke Poelman thank you. All friends that did not complain about the reduced hours for sharing life.

A special thanks for my colleagues from the IKN, Karel Schuit, Christa Rolf and Paul Cost Budde. For ten years (!) we had and have good times sharing experiences in learning about, in advising in and in teaching in palliative care.

Betty, in 1998 it started with a visit to you about writing a thesis. You always supported me also when things were difficult and it seemed that there was no progress. Your unconditional dedication has made it possible for me to write this book. Your feedback, fast, to the point, according to the rules (first the positive then the more critical parts) has taught me a lot in a pleasurable way. I wanted to identify with a female professor, you were a very sympathetic model.

A simple thank you is not enough for all that we shared. I am happy that you revealed that you have a plan to do some writing together in the future.

Ilora, in 2000 we met at the IKN. We were in need of education in palliative care and thanks to you we could start on short terms in Cardiff. This helped us and through us GPs and their patients in the north of the Netherlands. Christa and I completed the masters, it was great to be given that opportunity. The ceremony at the Cardiff University was an experience. You stimulated the publication of the reports about our project. It took a long time but we persisted. You were often the first to give a reaction to my mails although Betty also has a reputation on that. You had an enormous overview over the palliative literature and methodological problems. What was really a kind of wonder was the understanding from the heart that we share. Thank you so much and I hope we can find some way to continue the writing activities.

Renée in 1999 I first came to your office as a applicant for the job of GP advisor. In the four years of the project there was a regular contact and a feeling of excitement about the new developments and the possibilities in palliative care. You supported the project straight forward. With the research part of my work you commented on my intuitive and perceiving style of working and I took this to heart.

Thank you for your permission to go on with the publication of the results of our project and all the support that you gave me, either direct or through others. Carolina, as the head of the palliative care department I want to thank you, also for the opportunities given to me to have assistance in typing references (Wieneke, thank you) and administrative support.

Robbert, in 2002 when I started with the masters project I had the first contacts with you. You supported me with the masters, the overall structure of the thesis and the structure of several chapters. The cooperation with you
was very sympathetic. Thank you so much. The support of your department was very helpful as well.

Jeen and Annelies, you have supported me in a fantastic way ever since I started to work in Schoonoord, thank you very much.

Wilma, Minie, Nicolette, Marchien, Jenny en Elly, working with you in the practice is a pleasure. Because of that it was possible to write this book.

Frans, you mean so much to me and you have done so much. Thank you, for being there, for exchanging thoughts and for doing the laundry and all the other things in the house the last years when I got too much other work to do.

Florien
