I did not expect that I would miss life in Groningen this much. After having studied and lived there for two years, I have not only achieved a Ph.D degree, but, more importantly, got to know many people and experienced a completely different life. I arrived in Groningen in the night of January 16th, 2008. Carrying 40kg of luggage, I stepped into an empty room, alone, in Winschoterdiep 46 and told myself: “Here I begin!” On January 16th 2010, the day I left Groningen, the city was sleeping, covered by thick and heavy snow. Qian Cheng picked me up by car at Damsterdiep 68 at 6am. During my 10 hour flight back to China, I started recalling every moment of my 2 year staying in Groningen. I started realizing and appreciating what life had given me in the past 2 years.

The M.D./Ph.D program is great and will benefit many more medical students. The program was initiated by Professor Xian Wang in Peking University (PKU) Health Science Center, and receives partial support by CSC. Thanks to this program; I have had an opportunity to do a Ph.D program at the University of Groningen (RuG) in the Netherlands. I would also like to thank Professor Xiaoyan Ke as my supervisor in PKU, for her long-lasting support and understanding for my Ph.D program.

Firstly, I would like to thank my promoter Professor Dr. Anke van den Berg. Dear Anke, I really feel lucky to be your Ph.D student. At every Monday noon meeting in the past two years, I really learned a lot and grew, even though it was tough for me. Your rationality and logic for science pushed me to work efficiently and more professional in the way of conducting research. I was indeed impressed by your efficient
work when I received your remarks on my paper within a very short
time frame. From my heart, I appreciate your supervision very much.
Without your support, it would have been extremely difficult for me to
finish this thesis on time.

As another promoter for my Ph.D. program, Professor Dr. Sibrand Pop-
pemagavemethisopportunitytodoaPh.DinGroningen,especiallybe
involved in the Hodgkin lymphoma group. It has always been pleasant
and inspiring to meet you, not very often though (only every Friday
morning). I miss the moments with you; looking at the slides under
the microscope, and listening to you to tell the research stories. Your
wisdom and your passion in research have had a lot of impact on me. In
spite of being the president of RuG, I was amazed for your effort to try
to attend our meeting on Friday morning as often as possible and keep
updated with the literature.

Dear Dr. Lydia Visser, you are more than a supervisor (co-promoter)
for me. I can not imagine having been able to succeed the two years
of Ph.D study without your support. I will keep many memories with
you forever: the first experiment you taught me in the lab and much
more later on; every conversation we had in front of the FACS machine
and in your office; the encouragement and support you gave me when I
felt frustrated and depressed about the research work; the lovely dinner
with you at your home; the delicious cake you made for my birthday
party and the wonderful farewell party at your home on the day before I
left Groningen. I wish you to stay humorous, happy and healthy. I really
hope to have the chance to return your kindness and effort when I am
well established in the future.

Dear Dr. Arjan Diepstra, can we count how many slides we have scored
together? Thanks for your patience and support for my study. I feel very
happy that you became one of my co-promoters. I will not forget your
enthusiasm on research and diagnostic work, when you talked to me
about diagnosis of one case of Whipple disease. I learnt to follow my
heart to be a doctor. In addition, I love the Holland Hopjes you gave
me as gift before I left, and the idea is indeed unique that I will have my
Ph.D degree if I finish the last piece by eating one piece everyday.

Dear Professor R. F. Jarrett, Professor P. Kluin and Professor L. de Leij, thank you very much for spending your precious time to read my thesis. Dear Ruth, it was very nice to meet you in the ASH meeting in New Orleans. I take it as one of the most unforgettable experiences in my first and probably only ASH meeting. Dear Phillip, I was deeply impressed by your hard work when I always saw you even during the nights and weekends in the quiet pathology department.

I would like to thank two other groups involved in my Ph.D program. Dear Professor Peter Möller, A. Viardot and N. Rüther from Institute of Pathology, University of Ulm, Germany, thank you for offering Hodgkin cell line and Hodgkin tissues for the c-Met project. Dear Professor S. D. Gadola from Division of Infection, Inflammation and Repair, University of Southampton, UK, it was an inspiring lecture on iNKT cells you gave. I am glad that I have my first paper accepted on CD1d and iNKT cells in collaboration with you.

I am honored that Hans Vos and Huang Xin will be my paranimfen for my Ph.D. defense. Dear Hans, I could always turn to you for help when I have any problem in the O&O lab. I will not forget the classic dialogue we had: “Chuanhui, how is life?” “Hans, it is tough.” Thank you very much for taking care of Hodgkin cell lines all the time. Huang Xin, it was nice to have a Chinese colleague together abroad and share an office with you. By the way, learn how to cook and take care of yourself.

Furthermore, I was also very happy to share every moment with my roommates in the last two years. Dear Johan Gibcus, you are a pleasant person for being a colleague and for having nice conversations. From you, I have learned a lot about the Dutch culture. I hope your post-doc goes smoothly in the U.S. and that you will enjoy cycling there. Dear Wang Miao and Luping Tan, you are like elder sisters for me. In the beginning of my Ph.D program, you helped me to get familiar with the pathology department and the research work. Wang Miao, I highly ap-
preciate that you helped me out in the trouble of Western Blot and other experiments in the lab. Luping, good luck for your research work in Malaysia. Dear Liqiang Qi, you are such a kind person. After you left, I felt lonely at times when I came into our office during nights and weekends. Dear Joost, how is life being a dad? I am looking forward to reading your paper on microRNAs in B cell lymphomas. Dear Iza, it was nice to share some experiences and feelings with you as foreigners in the Netherlands. Hope you can finish your Ph.D program on time, and get together with your family in Poland. Be happy in Groningen. Dear Wouter, it is a pity that we did not have more opportunities to talk. I am pretty sure that we would have a lot to talk as we both share the medical background. Dear Mirjam Boelens, is everything going well in Chicago? Good luck for your research.

I would like to thank the people present during Friday morning meeting. Dear Rikst Nynke, Riemer, Tom, Myrna, Callista, Berend, Bart and Weird, thank you for the discussions, suggestions and jokes in the early morning on every Friday. Thank you, my dear colleagues in O&O lab and DNA lab. Dear Bea and Femke, thanks a lot for helping me to do the TLR project. Dear Nancy, thanks for the work of the microRNA microarray, although the results were not as we expected. Dear Cheng Cheng, it was nice to work together with you in the lab at the beginning of my lab life in UMCG. Dear Wijnand, you are a very nice and brilliant guy, it was quite pleasant to work together with you. Dear Debora, thanks for the work of PCR work of c-Met project. There are many other fantastic colleagues I had worked with everyday: Jan-Lukas, Edwin, Marijn, Geert, Marjan, Tineke, Marnix, Teo, Wouter, Jasper, Lieve and so on.

Working in the Department of Pathology is enjoyable. Thank you, secretaries of the Department of Pathology for all the consistent patience and help. Dear Annette, thanks for offering me the precious hepatic cancer tissue as a positive control. Dear Professor Harry van Goor, it was nice to have talks with you sometimes. Hope to see you in Beijing in the future. Dear Professor W. Timens, Professor Harry Hollema, Dr. Bart Jos, Dr. Ed Schuuring, Dr. Stefano Rosati, Richard, Hans, and
other people (Forgive me that I could spell all your Dutch names correctly), thank you for your help in the past two years in the Department of Pathology.

I would also like to thank other people in RuG for their consistent support. Dear Roel, thanks for taking care of the computer all the time. Dear people from ISD and OWI, thanks for organizing all the services from the arrival to Groningen to the departure. Thanks for members from GUIDE (Han Moshage, Riekje Banus, Mathilde Pekelaar, Maaike H. Bansema), Medical Faculty (Mieke Kapteyn). A special thank to the members from Foreign Guest Club in RuG, for organizing a lot of wonderful activities to explore the Dutch culture.

I am grateful that there are so many kind Chinese friends in Groningen. The life in Winschoterdiep is lovely and unforgettable. Dear Li Jiang, Xing Quan, Ma Jianqiang, Sunwei, Jiang Meng, and Lu Yi, thanks for your company in Groningen. The time has been so lovely, when we cooked and shared our food together in the kitchen, although it is by far uncomparable to the food in China. Dear Qian Cheng and Yu Lili, Wei Yunwei, Liu Bo, Han Lina and Zhao Yan, Yin Meimei and Lv Bo, I am happy to have played badminton (although I am often absent) and celebrated New Year with you. Qian Cheng, thank you for the dinner of Jiaozi at your home and for picking me up before I left Groningen. Wei Yunwei, thank you for giving me suggestions in the clinical work. I am looking forward to meeting you in Beijing in the future. There are quite a few Chinese Ph.D students in UMCG. We enjoyed lunch together and gossiped about everything in China and in Holland. Thank you for your company, dear Ye Qingsong, Tan Hongtao, Wang Hongwei, Li Xiangyi, Long Jianhua and Zhang Ying, Hu Nan and Sun Di, Chen Min, Xue Ruiqi and Yu Zilin, Bu Shaochong. Thank Meili and Wenwen for sending me off along the way from Groningen to Schiphol airport in Amsterdam.

I would like to thank the family of Hilde Janlving for offering accommodation at Damsterdiep 68 for me. Life there has been happy and relaxing. Dear Leon, I miss our gentleman conversations about everything,
such as economics, politics and democracy etc. I am looking forward to seeing you in Beijing in this summer. Dear Nato, good luck with your study abroad. Dear Yifei, enjoy your life in Germany.

Thank Professor Dr. Zhanguo Li for supervising me during the resident training in PKU People’s Hospital. I feel excited that I can be involved into such a friendly, productive and promising Rheumatology team. Thanks for my longstanding friends during the last eight years study in PKU: Zhou Jihao, Chen Nan, Xu Xiao, Du Jingzeng, Yuan Xiao, Chen Han, Ji Xin, Chen Jing, Sun Xu, Yang Dejin, Huang Cong, Zhou Jing, Shou Chong, Li Wenqi, Gu Yangchun, etc.

Dear Liming, you are the most unforgettable memory for me in Groningen. All the moments I shared with you remain my happiest memories about Groningen. Without your smile, my life in Groningen would have been much less interesting and colorful. As the cover of this thesis is designed by you, let us remember the moments we have had in Groningen.

How to express gratitude for the love of my parents? I know you counted down the days everyday when I can come home. It is your support that I am not afraid of being alone and going further.

父母之恩，何以言谢，何以为报？异国两年，我知道你们每天都在数着我能回家的日子。妈妈，每一次出门，您都会流泪，从第一次离家到京上大学，到第一次出国念书。爸爸，每一次您送我上车，看着车后渐渐模糊的您，我知道我您还在那里望着我。在你们眼里，我永远是个孩子。爸，妈，无论我走得多远，只要想到身后还有你们，我就能勇敢地继续走下去。父母在，不远游。我不能亲侍身旁，请务必照顾好自己身体。弟弟，虽然你选择了一条和我完全不同的路，但成功不是别人来评判的。勇敢地走下去。还要感谢我的小舅舅，对我从小到大的关心。

I am very grateful that life gave me such a great experience!
