Four years ago, I thought “four years” was really a long time. But actually when I have been through this journey, it felt like a flash. I still remember the first day I arrived to Microbial Ecology group: Dick was introducing me to all the colleagues and I was so nervous yet excited about this new experience. It was just like yesterday. I am happy that I made each day count. I am also grateful to all the people that appear in my life and walk me through these four years.

First of all, I would like to thank my supervisor Professor Dirk van Elsas for giving me the opportunity to work in MicEco group. Thank you for all your help, guidance, advice and patience. Thank you for your door always open for me. Your passion, enthusiasm and sharp minds for science showed me what a real scientist is. I feel lucky to be one of your students and what I have learned from you will be the treasure of my life.

I also would like to thank Joana for your valuable comments and suggestions during the meetings. To Joukje as well, you are always so kind to help with all the paperwork. My thanks also goes to Jolanda, you are the coolest person I have known in scientific field! You have a completely different life outside the lab, which I admire a lot. Working with you at the last stage was also great, efficient and easy. Thank you for helping with designing my thesis cover, you are so gifted!

No man is an island. I am so happy to meet so many great people during my four years of PhD. Jan, although we only worked together for 2 months, your creativity and optimism inspired me a lot. Thank you for all your input and encouragement, I appreciated a lot. Rashid, thank you for all your help and discussions, I learned a lot also by helping with your project. Cyrus, you are an amazing office mate, positive and caring! You can always tell interesting stories and show me funny videos. Thank you for sharing the office with me. Michele, I appreciated your involvement in my work and you have been helpful. Manoj, I miss all our dinners and pool games during the weekend, it was so much fun!

Sander, thank you for working with me. You are such a smart and good student and I appreciated a lot for all your help. I had really good memories about those days. You are a friend that I can trust and share happiness with. I miss all the jokes, talks and laughs! Victor, I am grateful for your help during different stages of my PhD. You are open-minded and always ready to help. I think you have the good qualities of Dutch people. Thanks also goes to my other students Kexin, Aron and Jakob who helped me in different courses.

Thanks to the ones who already left the group: Silvia, Ozgul, Anna, Patricia, Ritta, David and Sasha; the ones who only worked for a short time but left memorable times: Irem, Sandy, Simone, Elisa, Layanne, Mylenne, Armando, Irene, Diana, Jonas, Doman, Muhammad, Kashif, Tahir, Daniel, Felipe, Joelma, Memonna, Henrique, Megga, Arjen. To the current group members: Patricia, Mukil, Maryam, Stephanie J, Francisco, Maju, Irshad, Deigo, Larisa, Aji, Britt, Dorotéia, Camila, Thais, Deborah. Thank you for the all the bear o’clock, cakes and “after holiday” candies from all over the world in the common room. The Wig Party (Stephanie J), Girl’s Night (Maju) and the International Dinner (Maryam) were really awesome, we had so much fun. Thank you for making such a nice atmosphere in the MicEco group!

Special thanks to my paranymphs: Stephanie G, although we have totally different personalities, it did not affect us becoming good friends! You are such a generous friend, always willing to share and help. I miss our apple pie time, pool games and all the fun time a lot! Thank you for always being there for me. Pilar, you are a girl who is caring, responsible, honest, strong and thoughtful! You have all the
good virtues! I feel lucky that I could share the office during the last few months with you. Thank you for all your help and the friendship.

How can I forget my Chinese companion in the group! I am so happy to finally have some Chinese colleagues at my last year of PhD. Pu, you are not only smart but also have a warm heart. Thank you for all your help inside and outside the lab! Miao, you made the most beautiful scientific graph I have ever seen! You will be more successful! Yuan, you are a girl full of energy as well as considerate, I will miss our gym time! All the laughs, talks, dinners and trips, you guys helped me feel at home and thank you for giving me such wonderful memories. You are the best! Of course, I would also like to thank other Chinese friends I met in Groningen: Yeshuai, Kexin, Tianling, Chaojun, Heqiao, Zuan, Bin, Min, Wenxuan, Liang, Wenjuan, Yanping, Xiangfeng, Yuxiang, Dong and Yuwei.

To my besties in China: Yufan, Di, Ziyuan. Thank you for always having my back, listening to me, cheering me up and making me laugh! Although we are thousand miles away, I feel like you are just by my side. My deepest and endless gratitude goes to my parents! Your unconditional love and support have been my driving force of going forward. I can’t express enough how much you mean to me. I feel blessed with all your love, encouragement and faith in me!

Last but not least, thanks to my boyfriend Nuan. Although you seem quiet, I know you are the person who expresses feelings with actions rather than words. You take care of me when I am sick, you bring me dinner when I work late, you comfort me when I feel down, you try to help when I have experimental troubles, you travel with me when I wanna see the world, you filled up my moments with all these small things, day by day, piece by piece. I could not have made it without you. Thank you for being with me all these years. Finally I would like to thank my boyfriend’s turtle Dudu. She made me feel less lonely at home when my boyfriend was away from me during the last year. I will miss her a lot.
