Acknowledgments
In the past four and half years, I was very lucky to work in such a wonderful lab: Molgen full of friendship, joy, passion and smart people, to study in such a tranquil, peaceful and clean garden city: Groningen and to live in so great and exquisite a country: Netherlands. I am sure in the rest of my life when someone asks me about the Netherlands I will say “Oh, it’s a country worth visiting, studying in and living in.” At this exciting moment, I would like to thank many people. This dissertation would never have been finished without the guidance of my colleagues, help from my friends, and support from my family.

My earnest gratitude firstly goes to my respectable supervisor Oscar. Thank you for offering me this opportunity to work in Molgen and the interesting lantibiotics project. Your kindness, patience and way to guide students impress everyone who works and ever worked in this group. Your expertise on lantibiotics field, your criticism and praise, your encouragement when I was depressed and your cheerfulness when I was excited, are the sources of energy to support my finishing this thesis.

Similarly, I express my sincere thankfulness to Jan and Jan-willem. Thank you for leading our group together with Oscar in which we work conveniently.

My gratitude also goes to Siger, Anne H., Anne DJ., Jannet and Klazien. Thanks for your kind help to maintain the good status of Molgen.

Manolo, I can’t express my gratitude enough to you. From my first day in Molgen, I began learning lab skills, western social culture and so on from you. This thesis would not have been possible without your careful and serious guidance. The encouragement, the sarcasm, the joke and the solicitude I received from you made me stanch enough to bear the pressure from “doing a PhD”.

Auke, It is my fortune to make friends with you. You are always eager to offer your help to others and a strict watchdog of Molgen to maintain the comfortable lab for everyone. Thank you very much for so many helps on both my studying and my daily life during the past years. Moreover I am very grateful for your correcting the Dutch abstract of this thesis and being my paranymph. The specific gratitude also goes to Tomas. Thank you for those nice chats regarding every aspect we had in the lab and your generous help on my experimental design (the ZireX one). Besides, I am very grateful that you help me write the Dutch abstract of this thesis. Elrike, it was good to meet you in Leipzig. your subtle observation always makes you attractive. Thank you for accepting the invitation to be my paranymph.
The sincere thanks must be expressed to the Chinese “mafia”: Haojie, Yanglei, Qian, Xin and Jingjing. I will definitely miss the time we spent altogether. Your coming to Molgen brought plenty of joy to me. We ran together, travel together and celebrate Chinese New Year together. All scientific topics and social life subjects we gossiped on our lunch table will surely become good memories in my life. I wish you all succeed in your PhD career and hope to see you guys soon somewhere in China.

I would like to say thanks to the great lanti-group which includes Rustem, Anne-Stephanie, Yoshi, Maike, Andrius, Liang, Ruben, Djoke, Martijn, Erik, Niels, Maarten, Eliene, Lorena, Rocio, Davide, Sijmen and Baptiste. I appreciate all your kind support and help. The lanti-dinner we had brought us so much laugh and joy.

There is a Chinese wisdom saying: “Living away from hometown, we depend on our friends to live happily.” Lieke and Angel, it is my honor to have you guys as my officemates. Robyn, I appreciate your straight, honest and supportive advice. Jeoren, your environment-friendly attitude impresses everybody. Ganish, my perfect badminton partner, you are very modest and good friend and best wishes for you in Oslo. Tom, I feel fortunate to sit by you in the lab. I think everyone in Room 659 misses the happiness you created. Additionally, I want to give my earnest gratitude to all colleagues I meet here in Molgen, which includes Kei, Bart, Harma, Rik, Sulman, Wout, Arnaud, Mikkel, Morten, Jimmy, Taketo, Afzal, Rieza, Katrin, Laetitia, Julio, Akos, Maarten, Claire, Mirjam, Ruud, Marielle, Clement, Ard Jan, Martijn, Tonia, Irfan, Barbara, Sjoerd, Luiza, Renske, Jelle, Ana and Robin.

I am grateful to Hjalmar, Marcel and Annie from the Mass Spectrometry Core Facility of the University of Groningen for the assistance with LC-ESI and MS/MS.

I heartily thank the Chinese community in Groningen. Xiaoguang, Keming and Ranran, I appreciate the time we lived together. Jianjun and Chongxia, we become the best friends with each other from the first sight and our friendship what is so called “Gang of three” become firmer as the time goes. Ning, as an old sister, you give me a lot of help, Thank you. The earnest gratitude also goes to friends listed, thank all of you for being friends of mine. They are Lei S., Nuan, Xiangfeng, Wenjuan, Jianlei, Yuxiang, Boqun, Wenwen, Yanping, Wangli, Miaozhi, Nana, Youtao, Lei, Jingzhi, Tao, Yuanze, Jieqiang, Zhe, Wenzuan, Wenxin, Jing, Mengying, Jiabao, Fei and so on.
Here I would like to give my specific thanks to two people in China. Xiaofeng Yang, my
dear brother, I could not have finished this thesis without your support and concern. Guihua
Weng, my close confidant, thank you for always being around me when I was in depressed
mood. The patience and rationality that you gave encouraged me to figure out things bothered
me. Of course, we share joy as well.

I earnestly thank Prof. A.J.M. Driessen, Prof. G.N. Moll and Prof. G.P. van Wezel for their
contributions on reading and proofing this thesis.

My study in this country is financially supported by China Scholarship Council. I am
undoubtedly grateful that Chinese government launched this students-studying-abroad project.
Many thanks go to CSC and all friends and colleagues in Chongqing University or elsewhere
of China. My idea of going aboard to study would not have come true without the support of
my former supervisors: Prof. Youping Yin and Prof. Zhongkang Wang. Thank you.

We Chinese have an old saying that is “父母在，不远游，游必有方。(You should not go
on a long journey when your parents are still alive, if you have to do so you must have
reasonable reasons)”. Living apart from their children is a big challenge to every Chinese
parent. Dad and Mom, thank you for bringing me up healthily, teaching me strictly,
concerning me warmly and supporting me unconditionally. 爸爸，妈妈，多谢你们这么多年
对我的支持和付出。世界很大，但只有你们在的地方才是我真正的家，我快要回家
了。

Acknowledgments
