The PhD journey in the past four years was full of ups and downs, which was a big challenge that worried me at the beginning as to whether I was able to overcome what was ahead of me. But when the time is up, all the experience feels as valuable. I would not reach the end without the help of many people and I would like to take this opportunity to express my sincere gratitude to those who have helped me, encouraged me, and supported me over the years.

First and foremost, I would like to thank my promoter Prof. Grietje Molema and co-promoters Dr. Jan Kamps and Dr. Matijs van Meurs for supervising me in performing this research and completing this dissertation. Dear Ingrid, thank you for giving me the opportunity to study in this excellent research group and for your guidance and enlightenment academically and personally in these four years. You have influenced me in many aspects on my way to be a scientist. Thank you for helping me to make my learning curve steep. You were very understanding and thoughtful when I was passing through tough and stressful times. Thank you for helping me with my Dutch summary. Dear Jan, thank you for your consideration and encouragement over the years. You taught me to stay positive even when the data is negative, and you taught me how to tell the information in the right way in a presentation. I really appreciate the effort you put in to help me with my work. Dear Matijs, you are so smart - I am always impressed by the questions you raise during discussions. And I respect your dedication in doing research while saving people in ICU. You have taught me to always think in a clinical perspective when doing basic research. It was an invaluable experience to be ever trained by all of you in my life.

My sincere gratitude goes to the members of the reading committee, Prof. Dr. Leon P.H.J. Aarts, Prof. Dr. Christa Boer, and Prof. Dr. Rob H. Henning, for their time and effort put into reading and approving my thesis. I also want to thank Prof. Marianne G. Rots for offering advice and help during my exploration of the epigenetic field.

My utmost thanks go to all people from the EBVDT group and the Medical Biology department who helped me during these four years. I

would like to thank Dr. Jill Moser. Dear Jill, many thanks to you for your willingness to share your brilliant ideas with me and for the positive energy you have passed on to me, as said by the Dutch words you taught me, “altijd blijven lachen!” I wish you a lot of success in the future. Dear Rianne, I am very grateful for your excellent assistance with my experiments and for your inspiring supervision and collaboration over the years. Thank you for your effort in making the layout of this book and for being my paranimph to support me at the special moment. Peter Zwiers, thank you for training me to learn RT-qPCR from zero and for helping me with my experiments. You are always so generous to help me out of problems. Thank you. Dear Henk, I appreciate your help with the cell culturing, tissue sectioning, and a lot of other things. You are such a kind person that I always feel comfortable to work with you. The experience of making jams together with you is a precious memory for me. Thank you for everything. Henriette, thank you for teaching and helping me with the liposome formulation and thank you for your dedication in preparing liposomes for the animal study. Jan Zijlstra, thanks for always sharing interesting articles and for your help and support with my work. Peter Heeringa, thank you for keeping your door open for me to answer my questions when necessary. I am very grateful for you to introduce me to Dr. Min Chen to earn the postdoctoral training opportunity in Beijing. Eliane, thank you for your valuable suggestions with regard to my writing and your corrections for my paper. Guido and Jan Renier, thank you very much for the troubleshooting of the flow system to save my cells and me in time. Marlies, thank you for sharing your precious protocols and antibody information. Good luck with your PhD project. Harold, thanks a lot for your generous help from time to time. Anita, Linda, Saskia, Pytrick, Marja, Geert, Roelof Jan, Jelleke, and Jasper, thank you all for helping me with all kinds of issues in the lab.

Many thanks to my fellow PhD students and colleagues from the EBVDT group. Dear Piotr, thank you for all the valuable advices for my PhD journey. During our collaboration, you set a good example for me, which benefited me a lot in my own studies. Thank you and I believe that you will obtain great achievements in your research. I would also like to thank Neng for teaching me the flow technique and many other things in my first half year. Thank you for being so patient to answer my all kinds of stupid questions! -best of luck with your academic
Appendices

career. Gopi, thank you for consoling and encouraging me when I was panicking about my research progress, it helped a lot. I wish you all the best with your postdoctoral training in Singapore. Niek, you were always very passionate and it was always nice to have you around to warm the atmosphere. Titia, thanks for teaching me the liposome formulation and for your good advice. Good luck with your teaching. Adnan, thank you for your contribution in the animal study and for always willing to help. Best of luck with your M.D. career. Roel, because we started the PhD journey at the same day, so it seemed that we were urged and encouraged by the progress of each other^^ I wish you all the best for your PhD defense and good luck with your career. Special thanks to the top-master student Ilona for her contribution to the animal study. Dear Ilona, you are a nice and friendly person and a great co-worker. I enjoyed the time that we worked together. Success in your PhD study! I also would like to say thank you to Mirjan, Ganesh, Francis, Gesiena, Manon, Sandra, Timara, Melanie, Tiede, Rieza, Marijn, Marja, Fransien, Thijs, and all the former EBVDT group members and students for providing help and sharing time with me in these four years.

Many thanks to my fellow PhD students and colleagues from other groups or other departments. Neha, Genaro, Nato, Nikola, Fahimeh, Tamara, David, Julio, Christian, Bram, Rutger, Olaf, Diana, Marike, Alberto, Ghazaleh, Mojtaba, Byamba, Vincenzo, Masum, Tushar, Malgosia, Khayum, and all the others that are not mentioned here. Thank you for sharing the time and providing help over the years. Many thanks to people from the Pathology department. Marian and Lydia, thank you for your help. Ali and Ahmed, I enjoyed our chats in the coffee room during breaks. Good luck with your thesis and PhD defense.

Special thanks to my ever-changing office mates Ee Soo, Monika, Jill, Jan Renier, Gea, Monique, Maaike, Grissel, and Rui. We have created and maintained such a good atmosphere in our room which I liked a lot. It was my pleasure to share moments with all of you. Dear Ee Soo, I was so lucky to have you accompany me in these four years. I really enjoyed our daily discussions about our endothelial cells in hands. Together, we shared happiness and sadness, laughs and tears. Whatever happened, we stood by each other. I cherish our forever friendship. All the best for your PhD defense. Stay in touch! Monika, thank you for willing to

share your knowledge and experience from time to time. Enjoy your postdoc life in Germany! Maaike, you are a warm-hearted person and I enjoyed our conversations during the breaks of our writing. Thank you for sharing protocols and your experience with me. I wish you a lot of success in your future. Monique, you were always so enjoyed and enthusiastic when talking about your research. Good luck with your PhD defense and I believe you will achieve your success in the future. Dear Rui, I was so happy to have you around in my last year. Remember our struggle of whether we should speak English or Chinese when doing experiments together? The four year PhD journey is fleeting. Enjoy it! Let’s keep in touch.

I would like to express my gratitude to our secretaries, Annet and Susan. Annet, thank you for taking care of me in these four years by helping me to arrange things and solve problems. Susan, thank you for taking care of the orderings, especially those urgent ones from time to time. Dear Hans van der Plas, thank you for your help with all kinds of financial issues and for being so nice to me.

I would also like to express my appreciation to the team of the animal facility: Miriam van der Meulen, Martin Houwertjes, Arjen Petersen, Annemieke Smit-van Oosten, Michel Weij, Andre Zandvoort, Marloes, and all the others that I don’t mention here for your extensive effort and excellent assistance in planning and executing my animal experiments.

My big and warmest thanks go to my Chinese friends in Groningen. Dear Yuan, my paranymph, thank you for sharing all kinds of things with me all the time. You were always around to console me during my stressful and depressing times, which made me feel supported. I wish you the best of luck with your thesis and I am sure that we’ll see each other in China. Yi, thank you to be around to care about me as my younger brother. And whatever you choose for your next, I support you. I am sure that you will earn your success in the future. Good luck. Qi, I am impressed by your humorous words all the time and thank you for sharing your delicious cooking. All the best for you. Doctor Jun Yuan, thanks for sharing your knowledge with me. Jing, we already knew each other through email before I came here, and I am glad that I can be friends with you, a so thoughtful and kind girl. Hope to see you in
Appendices

Shanghai! Rae from Pathology, thank you for your consideration and encouragement over the years. Good luck with finishing up your thesis. Hui, your intelligence and diligence in research impressed me. Thank you for helping me with the troubleshooting of my western blot. Sister Chen Cheng, thank you for sharing your knowledge as a nephrologist. I really appreciated your help with my trouble in experiments. I wish you and Doctor Li Benhui and little Qiqi all the best. Doctor Li Naishi, thank you for your suggestions and help about my career. Ren Chengcheng, Yue Chongxia and Song Lei and your little Kevin, Deli and Qi and your little Iris, Song Juan, Cao Junjun, Zeng Xiang, Bai Xueling, Cao Qi, Li Jun, Zeng Ni, Yan Xiaomei, Han Bing and Zuo Haoxiao, Yuan Ye, Wang Rong, Yu Zilin, and all the others that I don’t mention here, thank you all for sharing time and experience over these four years. Mu dongdong, when we shared the house, thank you for not being annoyed by my once in a while bad temper. Thank you for sharing a lot with me in these four years. Best of luck to all of you for your PhD defense and future!

Last but not the least, I would like to express my heartfelt gratitude to my dearest families for their continuous support and encouragement in my life. 爸爸妈妈，谢谢你们教会我善良和感恩。四年的国外生活和风风雨雨让我变得更加独立和坚强。你们的鼓励和支持是我前进的最大动力。为了成为你们的骄傲，我将不断努力。你们的健康和快乐是我最大的心愿。哥哥嫂子，姐姐，谢谢你们的关心和支持，感谢这四年里你们对爸妈的陪伴和照顾。愿亲爱的小侄女牛牛健康快乐地成长。我爱你们。Love you all.

It is time to depart again, so, be prepared for the new adventure!
About the author-Curriculum Vitae

Ranran Li was born on the 2nd November, 1986 in Shandong, China. After graduation from Chiping No.1 High School, she studied Pharmaceutics in Qingdao University of Science and Technology from 2004 on. In 2008, she obtained her Bachelor degree in Pharmacy, and subsequently, she started to be trained in Shanghai Jiaotong University & Shanghai Institute of Pharmaceutical Industry for her master study. In 2011, she gained her master’s degree in Medicine in Shanghai. In the same year, she was awarded a scholarship from the Chinese Scholarship Council and started her PhD study in the Department of Pathology & Medical Biology of the University of Medical Center Groningen. Since her arrival in the Netherlands on the 1st September, 2011, she has worked on the research project presented in this thesis titled “Therapeutic interventions in shock: responses of the (microvascular) endothelium”.
