university of groningen

Bioinformatics of Genomic Association Mapping

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. E. Sterken
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 23 September 2015 at 09:00 hours

by

Ahmad Vaez Barzani

born on 11 May 1973
in Isfahan, Iran

Supervisor

Prof. H. Snieder

Co-supervisors

Dr. B.Z. Alizadeh

Dr. I.M. Nolte

Assessment Committee

Prof. H.M. Boezen

Prof. O. Franco

Prof. D.I. Chasman

CONTENTS

Chapter 1 General introduction 7

Part 1 | How to check if the phenotype is appropriate for genomic association mapping

Chapter 2 Genetic and environmental influences on stability and change in baseline levels of C-reactive protein: a longitudinal twin study 21

Part 2 | How to perform a GWAS analysis

Chapter 3 lodGWAS: A software package for genome-wide association analysis of biomarkers with a limit of detection 41

Chapter 4 QCGWAS: A flexible R package for automated quality control of genome-wide association results 63

Part 3 | How to follow up GWAS results: post-GWAS analyses

Chapter 5 Bivariate genome-wide association study identifies novel pleiotropic loci for lipids and inflammation 89

Chapter 6 Investigating the causal relationship of C-reactive protein with 32 complex somatic and psychiatric outcomes: A large scale cross-consortia Mendelian randomization study 115

Chapter 7 An *in silico* post-GWAS analysis of C-reactive protein loci suggests an important role for interferons 215

Part 4 | Bioinformatics of genomic association mapping: an A to Z walk-through

Chapter 8 General discussion 277

Appendices 303
