Enhancing the possibilities of LC-  
MS/MS for the absolute  
quantification of proteins in  
biological samples

The work described in this thesis was realized in a scientific collaboration between PRA Health Sciences and the University of Groningen, with financial support from the Samenwerkingsverband Noord-Nederland (grant T3041).

# Enhancing the possibilities of LC-MS/MS for the absolute quantification of proteins in biological samples

**PhD thesis**

to obtain the degree of PhD at the  
 University of Groningen  
 on the authority of the  
 Rector Magnificus Prof. E. Sterken  
 and in accordance with  
 the decision by the College of Deans.

This thesis will be defended in public on

Friday 30 October 2015 at 16.15 hours

by

**Kornelis Jouke Bronsema**

born on 21 January 1977  
 in IJsselstein

**Supervisors**

Prof. N.C. van de Merbel

Prof. R.P.H. Bischoff

**Assessment Committee**

Prof. D.J. Touw

Prof. G. Hopfgartner

Prof. W. Niessen

## Table of Contents

---

Chapter	Title	Page
1	Scope of the thesis	6
2	Internal standards in the quantitative determination of protein biopharmaceuticals using liquid chromatography coupled to mass spectrometry.	11
3	High-sensitivity LC-MS/MS quantification of peptides and proteins in complex biological samples: the impact of enzymatic digestion and internal standard selection on method performance.	45
4	High-sensitivity quantification of a Nanobody® in plasma by single-cartridge multi-dimensional SPE and UPLC-MS/MS.	75
5	Absolute quantification of the total and anti-drug antibody bound concentrations of recombinant human $\alpha$ -glucosidase in human plasma using protein-G extraction and LC-MS/MS.	107
6	Development, validation and application of a quantitative LC-MS/MS method for insulin-like growth factor-1 in human plasma.	141
7	Summary and future perspectives.	171
	Nederlandse samenvatting en toekomstbeeld.	175
	List of publications.	179
	List of presentations.	180
	Acknowledgements.	181
